As is known to us, the leading status of the knowledge-based economy has been established progressively. It is more and more important for us to keep pace with the changeable world and improve ourselves for the beautiful life. So the NCP-AIN certification has also become more and more important for all people. Because a lot of people long to improve themselves and get the decent job. In this circumstance, more and more people will ponder the question how to get the NCP-AIN Certification successfully in a short time.

As you know that the number of the questions and answers in the real NCP-AIN exam is fixed. So accordingly the information should be collected for you. Our NCP-AIN study materials have done the right thing for you. However, we will never display all the information in order to make the content appear more. Our NCP-AIN learning guide just want to give you the most important information. This is why NCP-AIN actual exam allow you to take the exam in the shortest possible time.

>> NVIDIA NCP-AIN Flexible Testing Engine <<

NCP-AIN Flexible Testing Engine Aids You to Evacuate All Your Uncertainties before Purchase

Are you trying to pass the NCP-AIN exam to get the longing NCP-AIN certification? As we know, there are a lot of the advantages of the certification, such as higher salaries, better job positions and so on. Perhaps at this moment, you need the help of our NCP-AIN Study Materials. As our company's flagship product, it has successfully helped countless candidates around the world to obtain the coveted NCP-AIN certification.

NVIDIA-Certified Professional AI Networking Sample Questions (Q37-Q42):

NEW QUESTION # 37

You are troubleshooting connectivity issues in your InfiniBand network and need to test basic connectivity between nodes. Which command should you use to test basic connectivity between InfiniBand nodes?

- A. `ibnetdiscover`
- **B. `ibping`**
- C. `ping`
- D. `traceroute`

Answer: B

Explanation:

The tool specifically designed for testing InfiniBand connectivity is `ibping`. It functions similarly to the traditional ping utility but is optimized for InfiniBand fabrics.

From the NVIDIA InfiniBand Diagnostic Utilities Documentation:

"`ibping` tests the connectivity of InfiniBand nodes by sending management datagrams (MADs) and verifying the response from the destination LID or GUID."

- * Tests basic node-to-node reachability
- * Supports testing via LID, GUID, or port number
- * Helps verify subnet manager routing and fabric health

Incorrect Options:

- * `ping` and `traceroute` are IP-based, not fabric-aware.
- * `ibnetdiscover` maps topology but doesn't test live connectivity.

Reference: InfiniBand Diagnostic Tools - `ibping`

NEW QUESTION # 38

You are troubleshooting an InfiniBand network issue and need to check the status of the InfiniBand interfaces. Which command should you use to display the state, physical state, and link layer of InfiniBand interfaces?

- A. `sudo ibnodes -C mlx5_0`
- B. `ibv_devices -c mlx5_0`
- C. `cat /proc/net/ib/device`
- **D. `ibstat -d mlx5_X`**

Answer: D

Explanation:

The `ibstat` command is utilized to display the operational status of InfiniBand Host Channel Adapters (HCAs).

It provides detailed information, including the state (e.g., Active, Down), physical state (e.g., LinkUp, Polling), and link layer (e.g., InfiniBand, Ethernet) of each port on the HCA. This information is crucial for diagnosing connectivity issues and ensuring that the InfiniBand interfaces are functioning correctly.

Reference Extracts from NVIDIA Documentation:

- * "The `ibstat` command displays the status of the host channel adapters (HCAs) in your InfiniBand fabric. The status includes the HCAs' state, physical state, and link layer."
- * "For proper operation, you are looking for 'State: Active' and 'Physical State: LinkUp!'."

NEW QUESTION # 39

What are the prerequisites for performing Flow Analysis with NetQ?

- A. Cumulus 4.x and later / Spectrum-2 and later / LCM enabled
- **B. Cumulus 5.x and later / Spectrum-2 and later / LCM enabled**
- C. Cumulus 5.x and later / Spectrum-3 and later / On-premises deployment
- D. Cumulus 5.x and later / Spectrum-2 and later / On-premises deployment

Answer: B

Explanation:

To perform Flow Analysis with NetQ, the following prerequisites must be met:

- * Cumulus Linux Version: NetQ Flow Analysis requires Cumulus Linux 5.x or later.
- * Switch Hardware: The feature is supported on Spectrum-2 and later switch models.
- * Lifecycle Management (LCM): LCM must be enabled to utilize Flow Analysis capabilities.

These requirements ensure compatibility and proper functioning of the Flow Analysis feature within NetQ.

Reference: NVIDIA NetQ Documentation - Flow Analysis Prerequisites

NEW QUESTION # 40

When upgrading DOCA on a BlueField DPU, what command should first be run on the host?

- A. `sudo apt-get install doca`
- B. `sudo apt-get upgrade doca`
- C. `./usr/sbin/ofed_uninstall.sh -force`
- D. `sudo apt-get autoremove`

Answer: C

Explanation:

Before upgrading the DOCA SDK on a BlueField DPU, it is mandatory to uninstall the existing OFED drivers to prevent compatibility conflicts.

From the NVIDIA DOCA Installation Guide:

"Before upgrading DOCA or BlueField-related software, you must remove existing OFED packages using:

`./usr/sbin/ofed_uninstall.sh -force.`" This ensures:

- * Clean driver state
- * No residual kernel modules or userspace libraries
- * Proper registration of new DOCA/OFFED versions

Incorrect Options:

- * `A and C` may not resolve conflicts.
- * `D` installs but doesn't remove conflicting packages.

Reference: DOCA SDK Installation - Uninstall OFED Requirement

NEW QUESTION # 41

In order to configure RoCE on a Cumulus switch, which command should be used?

- A. `nv roce qos enable on`
- B. `nv qos roce enable on`
- C. `nv set qos roce enable on`
- D. `nv set roce qos enable on`

Answer: C

Explanation:

To enable RDMA over Converged Ethernet (RoCE) on a Cumulus switch, the correct command is:

`nv set qos roce enable on`

This command configures the Quality of Service (QoS) settings to support RoCE, ensuring that the necessary parameters for lossless Ethernet are applied.

Reference: NVIDIA Cumulus Linux Documentation - RDMA over Converged Ethernet (RoCE)

NEW QUESTION # 42

.....

Once you have practiced on our NVIDIA-Certified Professional AI Networking test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There have a timer on the right of the interface. Once you begin to do the exercises of the NCP-AIN test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the NCP-AIN Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not. Then you can make your own learning plans based on the report of the NCP-AIN test guide. Also, you will do more practices that you are not good at until

you completely have no problem.
