

NSE6_OTS_AR-7.6 Customized Lab Simulation & NSE6_OTS_AR-7.6 Updated Demo

Nowadays everyone is interested in the field of Fortinet because it is growing rapidly day by day. The NSE6_OTS_AR-7.6 credential is designed to validate the expertise of candidates. But most of the students are confused about the right preparation material for Fortinet NSE6_OTS_AR-7.6 Exam Dumps and they couldn't find real Fortinet NSE 6 - OT Security 7.6 Architect (NSE6_OTS_AR-7.6) exam questions so that they can pass NSE6_OTS_AR-7.6 certification exam in a short time with good grades.

BraindumpQuiz have a strong IT expert team to constantly provide you with an effective training resource. They continue to use their rich experience and knowledge to study the real exam questions of the past few years. Finally BraindumpQuiz's targeted practice questions and answers have advent, which will give a great help to a lot of people participating in the IT certification exams. You can free download part of BraindumpQuiz's simulation test questions and answers about Fortinet Certification NSE6_OTS_AR-7.6 Exam as a try. Through the proof of many IT professionals who have use BraindumpQuiz's products, BraindumpQuiz is very reliable for you. Generally, if you use BraindumpQuiz's targeted review questions, you can 100% pass Fortinet certification NSE6_OTS_AR-7.6 exam. Please Add BraindumpQuiz to your shopping cart now! Maybe the next successful people in the IT industry is you.

Free PDF Quiz Fortinet - NSE6_OTS_AR-7.6 - Fortinet NSE 6 - OT Security 7.6 Architect –Efficient Customized Lab Simulation

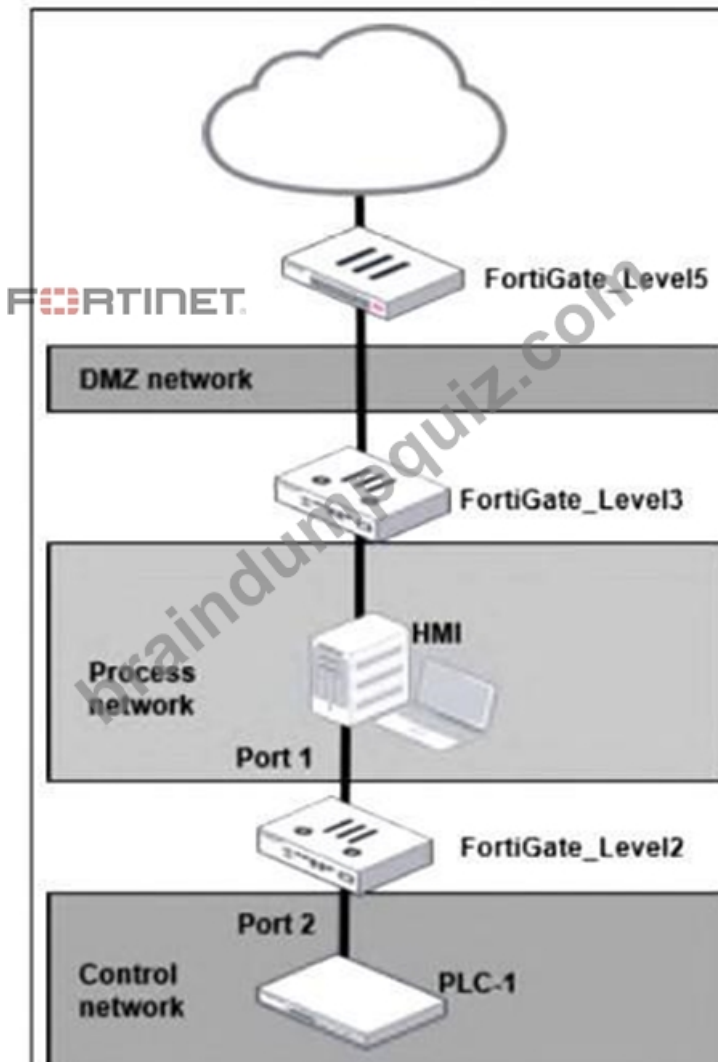

Nowadays a lot of people start to attach importance to the demo of the study materials, because many people do not know whether the NSE6_OTS_AR-7.6 guide dump they want to buy are useful for them or not, so providing the demo of the study materials for all people is very important for all customers. A lot of can have a good chance to learn more about the NSE6_OTS_AR-7.6 certification guide that they hope to buy. Luckily, we are going to tell you a good new that the demo of the NSE6_OTS_AR-7.6 Study Materials are easily available in our company. If you buy the study materials from our company, we are glad to offer you with the best demo of our study materials. You will have a deep understanding of the NSE6_OTS_AR-7.6 exam files from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you NSE6_OTS_AR-7.6 exam.

Fortinet NSE 6 - OT Security 7.6 Architect Sample Questions (Q76-Q81):

NEW QUESTION # 76

Refer to the exhibits.

Partial OT network

Partial firewall policy configuration

A partial OT network and the Security Profiles section of the FortiGate_Level2 firewall policy are shown. You have configured the FortiGate_Level2 firewall policy with a virtual patching profile because PLC-1 has vulnerabilities. A penetration test performed from the HMI device still reports vulnerabilities visible on PLC-1. Which two additional parameters must you enable on FortiGate_Level2? (Choose two.)

- A. OT signatures
- B. Device detection on port2
- C. OT application control
- D. Device detection on port1

Answer: A,B

Explanation:

Virtual patching relies on OT-specific IPS signatures to detect and block exploitation attempts, so OT signatures must be enabled.

Additionally, device detection must be enabled on the interface connected to the PLC to properly identify the OT device and apply the correct protection.

NEW QUESTION # 77

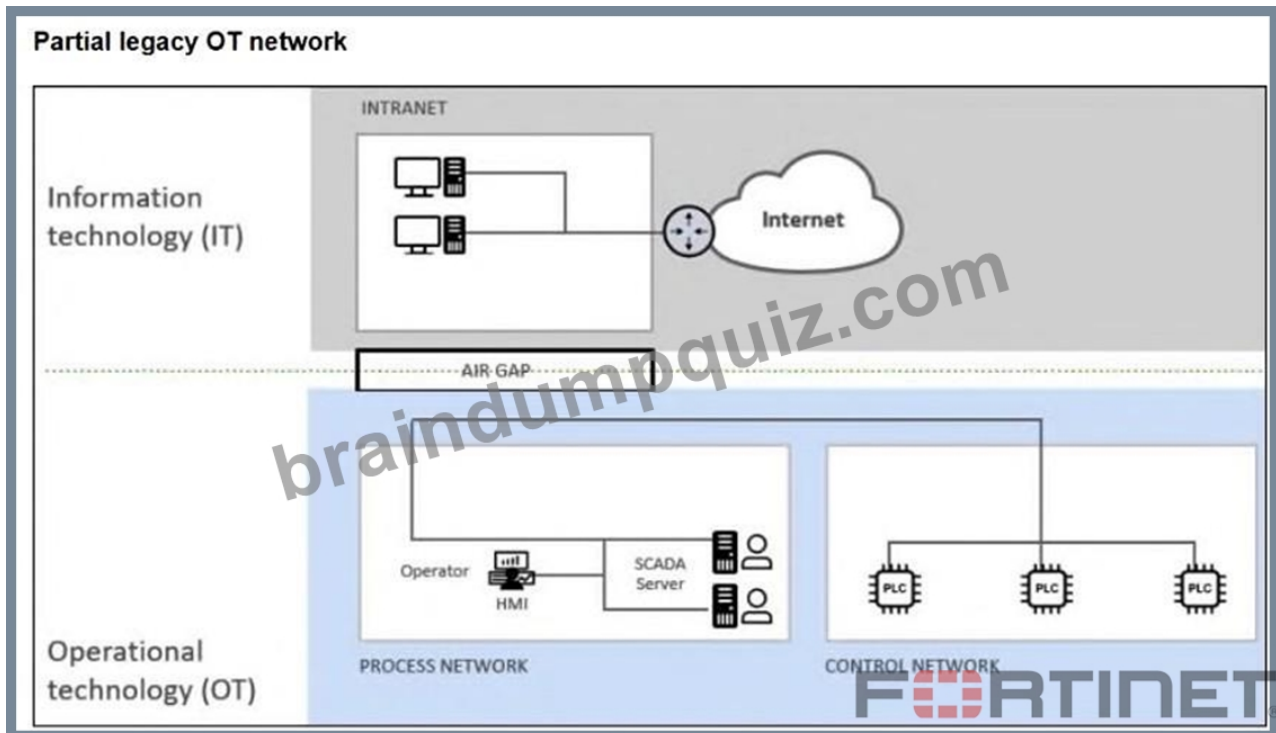

An administrator needs to group FortiGate wireless interfaces in NAT mode with multiple physical interfaces. What interface type must the administrator select to group multiple FortiGate interfaces with the wireless interface?

- A. Redundant interface
- B. Aggregate interface
- C. VLAN interface
- D. Software switch interface

Answer: D

NEW QUESTION # 78

Refer to the exhibit.

A partial legacy OT network is shown.

You must improve this historically flat OT network and minimize the risk of lateral movement.

Which action must you perform?

- A. You must add two-factor authentication.
- B. You must segment the network with a hardware switch.
- C. You must implement SD-WAN.
- D. You must implement micro-segmentation with firewall policies.

Answer: D

Explanation:

Micro-segmentation using firewall policies creates granular control between devices and zones within the OT network, effectively limiting lateral movement and reducing the attack surface.

NEW QUESTION # 79

Refer to the exhibit. The FGT-Edge device is a VPN gateway that allows remote administrators access to the local ICS network. Management hires a third-party company to conduct health and safety on site. The third-party company must have outbound access

to external resources.

What is the best scenario to provide external access to the third-party company while continuing to secure the ICS networks?

Network topology

- A. Create VPN tunnels between downstream FortiGate devices and the edge FortiGate to protect ICS network traffic.
- **B. Split the edge FortiGate device into multiple logical devices to allocate an independent VDOM for the third-party company.**
- C. Configure outbound security policies with limited active authentication users of the third-party company.
- D. Implement an additional firewall using an additional upstream link to the internet.

Answer: B

Explanation:

By splitting the edge FortiGate into VDOMs, you isolate the third-party company in its own virtual firewall. That VDOM can have outbound internet policies without exposing or risking the ICS networks protected by the other VDOMs.

NEW QUESTION # 80

With the limit of using one firewall device, the administrator enables multi-VDOM on FortiGate to provide independent multiple security domains to each ICS network.

Which statement ensures security protection is in place for all ICS networks?

- A. Traffic between VDOMs must pass through the physical interfaces of FortiGate to check for security incidents.
- **B. The management VDOM must have access to all global security services.**
- C. Each traffic VDOM must have a direct connection to FortiGuard services to receive the required security updates.
- D. Each VDOM must have an independent security license.

Answer: B

Explanation:

In a multi-VDOM setup, one VDOM typically acts as the management VDOM (often called "root") which manages global settings and security services like FortiGuard updates.

This management VDOM handles access to global security services that benefit all traffic VDOMs.

Individual traffic VDOMs process their own traffic and enforce security policies but rely on the management VDOM for centralized access to global security services.

Each VDOM does not need an independent security license; the license is for the device as a whole.

Traffic between VDOMs does not need to pass through physical interfaces to be inspected; inter-VDOM links and policies handle traffic inspection.

Each VDOM does not require direct FortiGuard connections; this can be centralized in the management VDOM.

NEW QUESTION # 81

.....

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. We provide timely and free update for you to get more NSE6_OTC_AR-7.6 Questions torrent and follow the latest trend. The NSE6_OTC_AR-7.6 exam torrent is compiled by the experienced professionals and of great value.
