By investing time and effort into preparing for Nonprofit-Cloud-Consultant Exam, individuals can enhance their skills and knowledge and demonstrate their commitment to supporting nonprofit organizations.

## Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q39-Q44):

### NEW QUESTION # 39

A nonprofit wants its staff to spend most of their time in Salesforce, but the staff needs access to several other applications as well. The nonprofit wants a solution that allows staff to use other applications without leaving Salesforce. How should the consultant integrate these applications?

- A. Configure External Data Sources
- B. Configure External Objects
- C. Implement Distributed Marketing
- **D. Implement Salesforce Canvas**

**Answer: D**

Explanation:

When a nonprofit organization needs to integrate external third-party applications into the Salesforce user interface while maintaining a seamless "single pane of glass" experience, Salesforce Canvas is the specialized tool designed for this purpose.

How Salesforce Canvas Works:

\* Application Encapsulation: Canvas allows a consultant to take an existing external web application (such as a legacy accounting tool, a specialized document management system, or a custom program tracking app) and "embed" it directly within Salesforce.

\* Authentication and Identity: Unlike a simple <iframe>, Canvas provides a secure way to handle authentication. It can pass the current Salesforce user's identity and session information to the external app, enabling Single Sign-On (SSO). This means staff don't have to log in a second time.

\* Bi-directional Communication: Canvas provides a JavaScript API that allows the external application to communicate with the Salesforce record it is sitting on. For example, an external billing app embedded on a Person Account page can "read" the Account ID and "write" a status update back to Salesforce.

\* Placement: The consultant can place the Canvas app in the Utility Bar, as a tab on a record page, or even within a Chatter feed.

Why other options are incorrect:

\* External Objects/Data Sources (Option A & B): These are part of Salesforce Connect. They are used to view and query external data as if it were stored in Salesforce tables, but they do not provide a way to "use" the full interface and logic of the external application itself.

\* Distributed Marketing (Option D): This is a specific tool for Marketing Cloud integration and has no relation to general application embedding.

By implementing Salesforce Canvas, the consultant ensures that staff remain productive within the Salesforce ecosystem while still having full access to the external tools necessary for their daily mission- driven work.

### NEW QUESTION # 40

A consultant is tasked with implementing NPSP for a UK-based nonprofit. One of their requirements is to localize the US-focused labels of some NPSP fields, such as replacing all references to Organization with Organisation.

What should the consultant do to meet the requirement?

- A. Create a support case to change the label.
- B. Override the default English labels in Translation Workbench.
- C. Reword the field label in Setup.
- **D. Activate English (UK) In Language Settings.**

**Answer: D**

### NEW QUESTION # 41

A consultant has is encountering an issue when configuring Nonprofit Cloud Case Management and wants to know if it is a documented issue.

Where should the consultant look first to confirm if it is a known product issue?

- **A. AppExchange**
- B. Salesforce Help
- C. Salesforce Trust Site
- D. Trailblazer Community

**Answer: A**

#### NEW QUESTION # 42

A nonprofit organization associates a Gift Commitment to a Gift Designation in Nonprofit Cloud. What occurs when a Gift Transaction is added to the Gift Commitment?

- **A. The designation is inherited from the Gift Commitment, and the designation can be changed,**
- B. The designation is inherited from the Gift Commitment, but the designation cannot be changed,
- C. The designation its not inherited, and the designation can be added.

**Answer: A**

#### NEW QUESTION # 43

A nonprofit organization uses Nonprofit Cloud and wants to ensure that members of the fundraising department cannot access the program department's Interaction Summaries. What should the organization use to accomplish this goal?

- **A. Compliant Data Sharing**
- B. Session Security Levels
- C. Permission Sets

**Answer: A**

Explanation:

In many nonprofits, "Interaction Summaries" (meeting notes) contain highly sensitive information. A caseworker's notes on a victim of domestic violence must be kept strictly confidential from a fundraiser who might be looking at the same constituent record for a donation appeal.

To solve this challenge, Nonprofit Cloud utilizes Compliant Data Sharing (CDS).

How CDS Secures Interaction Summaries:

- \* Record-Level Restriction: By default, Interaction Summaries can be set to "Private" in the Organization-Wide Defaults (OWD).
- \* Role-Based Access: Compliant Data Sharing allows the organization to grant access based on the user's specific role in relation to that record. For example, only the "Assigned Caseworker" and "Program Supervisor" roles are granted "Read" access to the summary.
- \* Departmental Silos: Because fundraisers are not assigned a "Program" role in the CDS configuration for those specific records, they will not be able to see the Interaction Summaries, even if they have access to the Person Account record.
- \* Auditability: CDS provides a clear audit trail of who was granted access to sensitive notes and why, which is critical for legal compliance in social services.

Why other options are incorrect:

- \* Permission Sets (Option A): These grant the ability to use the Interaction Summary object (CRUD), but they do not control which specific records a user can see. If OWD is set to Public, Permission Sets won't hide specific department notes.
- \* Session Security (Option B): This deals with 2-factor authentication and login requirements, not record-level data visibility between departments. Compliant Data Sharing is the standard Industry Cloud tool for this level of granular privacy.

#### NEW QUESTION # 44

.....

Managing time during the Salesforce Nonprofit-Cloud-Consultant exam is a challenging task. Most candidates cannot manage their time during the Salesforce Nonprofit-Cloud-Consultant exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the Nonprofit-Cloud-Consultant Exam. Salesforce Nonprofit-Cloud-Consultant practice exam on the software helps you identify which kind of Salesforce Certified Nonprofit Cloud Consultant Exam Nonprofit-Cloud-Consultant questions are more time-consuming, and they would be able to assess their efficiency in answering questions.
