

# 2026 100% Free 2V0-16.25–100% Free Test Collection Pdf | Certification VMware vSphere Foundation 9.0 Administrator Test Questions

BONUS!!! Download part of DumpsTorrent 2V0-16.25 dumps for free: [https://drive.google.com/open?id=1wX35oli\\_TOV4tPAHgsEkM0X1vLLpa4O](https://drive.google.com/open?id=1wX35oli_TOV4tPAHgsEkM0X1vLLpa4O)

If you want to advance in this fast-growing technological world, VMware 2V0-16.25 certification is a must. Yet, the common problem the aspiring candidates undergo is seeking updated, authentic, and trustworthy VMware 2V0-16.25 Dumps for the most cherished 2V0-16.25 certification exam.

## VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Troubleshoot and Optimize the VMware Solution:</b> This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>VMware vSphere Foundation Fundamentals:</b> This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>IT Architectures, Technologies, Standards:</b> This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Deploy, Configure, and Operate VMware vSphere Foundation (VVF):</b> This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Plan and Design the VMware by Broadcom Solution:</b> This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.</li> </ul>

## Test 2V0-16.25 Collection Pdf Free PDF | Reliable Certification 2V0-16.25 Test Questions: VMware vSphere Foundation 9.0 Administrator

As the captioned description said, our 2V0-16.25 practice materials are filled with the newest points of knowledge about the exam. With many years of experience in this line, we not only compile real test content into our 2V0-16.25 practice materials, but the newest in to them. Allowing for there is a steady and growing demand for our 2V0-16.25 practice materials with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our 2V0-16.25 practice materials for exam and related tests in the future.

### VMware vSphere Foundation 9.0 Administrator Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

In VMware Cloud Foundation (VCF) Operations for Logs, which node type is responsible for coordinating the overall functioning of the cluster?

- A. Data Node
- **B. Primary Node**
- C. Replica Node
- D. Worker Node

**Answer: B**

Explanation:

In VCF Operations for Logs (formerly vRealize Log Insight):

\* The Primary Node is responsible for coordinating the overall functioning of the cluster, including configuration management and directing traffic.

\* Worker/Data Nodes handle log ingestion and query execution.

\* Replica Node provides HA for the Primary Node but does not act as the main coordinator.

References:

VMware Cloud Foundation 9.0 - VCF Operations for Logs Node Roles

VMware Docs: Log Insight Cluster Architecture

#### NEW QUESTION # 54

An organization requires a centralized platform to monitor the performance, health, and capacity of their entire VMware vSphere

Foundation (VVF) environment.

Which two components would provide this capability? (Choose two.)

- A. VCF Operations for Networks
- B. vSphere Supervisor
- C. VCF Operations
- D. VCF Operations for Logs

**Answer: A,C**

Explanation:

The requirement is for a centralized platform to monitor performance, health, and capacity across the entire VMware vSphere Foundation (VVF) environment.

\* VCF Operations

\* Provides end-to-end performance monitoring, capacity management, and health analytics across vCenter, ESXi, vSAN, and NSX.

\* Includes FinOps and Capacity Planning performance diagnostics, and AI-driven troubleshooting for faster remediation.

\* This is the primary component for monitoring the entire VCF environment.

\* VCF Operations for Networks

\* Extends observability to network operations by monitoring NSX health, VPCs, and network flows.

\* Provides traffic summaries, alerts, and network capacity metrics.

\* Integrated with VCF Operations to ensure a complete platform-wide view of health and performance.

\* Why not the others?

\* VCF Operations for Logs# Focused on log management, troubleshooting, and diagnostics (not holistic performance/capacity monitoring).

\* vSphere Supervisor# Provides Kubernetes namespace and workload management, not centralized performance/capacity monitoring.

### NEW QUESTION # 55

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT\_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT\_USERS group the Read-only role to the vCenter Object and check propagate.
- B. Disconnect the vCenter from Active Directory.
- C. Assign the SUSPECT\_USERS group the No access role to the vCenter Object and check propagate.
- D. Assign the SUSPECT\_USERS group the Administrator role to the vCenter Object and uncheck propagate.

**Answer: C**

Explanation:

To ensure compromised users cannot access vCenter resources:

\* Assign the No Access role at the vCenter level.

\* Enable propagation so this restriction applies to all child objects.

\* This guarantees zero permissions for SUSPECT\_USERS.

Other options:

\* B. Administrator with uncheck propagate# Still gives dangerous access at root level.

\* C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.

\* D. Read-only role# Still grants access, not acceptable during investigation.

References:

VMware vSphere 9.0 - Roles and Permissions Best Practices

VMware KB 1025569 - Assigning the No Access Role in vCenter

### NEW QUESTION # 56

An administrator has noticed occasional performance degradation during peak usage times and needs to address this issue

proactively by creating a mechanism that doesn't give data or outputs too often to overload the team.

Which of the following steps is required to create the mechanism in VMware Cloud Foundation (VCF) Operations?

- **A. Implement an alert specifying the metric, threshold, and duration.**
- B. Implement an alert that notifies the IT team during off-peak hours.
- C. Create a custom dashboard to visualize all alerts.
- D. Implement an alert with the default alert settings.

**Answer: A**

Explanation:

The administrator wants to proactively manage performance degradation during peak times without overwhelming the IT team.

- \* The correct method is to create a custom alert with specific metric, threshold, and duration (A).
- \* This ensures alerts are triggered only when sustained performance issues occur, reducing noise.
- \* B. Default alert settings# Too generic, may cause alert storms.
- \* C. Custom dashboard# Useful for visualization but not proactive alerting.
- \* D. Notify during off-peak hours# Defers the issue, not proactive.

References:

VMware Cloud Foundation 9.0.3 -Creating Alerts and Policies

VMware Docs: [Configuring Alerts in vRealize Operations]

### NEW QUESTION # 57

Which of the following statements describes hardware abstraction in VMware server virtualization?

- A. Isolating memory access from the operating system and applications running in a virtual machine.
- B. Encrypting all data processed by a virtual machine on the operating system level.
- C. Allowing virtual machines to be live migrated between physical servers with Intel and AMD processors.
- **D. Allowing virtual machines (VMs) to use hardware resources without being tied to specific physical devices.**

**Answer: D**

Explanation:

Hardware abstraction in VMware virtualization:

- \* The hypervisor abstracts physical resources (CPU, memory, storage, networking) and presents them to VMs as standardized virtual hardware.
- \* This allows VMs to run independently of underlying physical devices, enabling features like vMotion and hardware independence.

Other options:

- \* A. Encrypting data# Security feature, not abstraction.
- \* B. Isolating memory access# Memory protection, not full abstraction.
- \* C. Live migration between Intel and AMD# Possible with compatibility modes, but not a direct definition of abstraction.

### NEW QUESTION # 58

.....

2V0-16.25 dumps at DumpsTorrent are always kept up to date. Every addition or subtraction of 2V0-16.25 exam questions in the exam syllabus is updated in our braindumps instantly. Practice on real 2V0-16.25 exam questions and we have provided their answers too for your convenience. If you put just a bit of extra effort, you can score the highest possible score in the real 2V0-16.25 exam because our 2V0-16.25 Exam Preparation dumps are designed for the best results. Start learning the futuristic way. 2V0-16.25 exam practice software allows you to practice on real 2V0-16.25 questions. The 2V0-16.25 Practice Exam consists of multiple practice modes, with practice history records and self-assessment reports. You can customize the practice environment to suit your learning objectives.
