

HPE7-A03 Schulungsangebot - HPE7-A03 Simulationsfragen & HPE7-A03 kostenlos downloaden

Übrigens, Sie können die vollständige Version der ZertSoft HPE7-A03 Prüfungsfragen aus dem Cloud-Speicher herunterladen: https://drive.google.com/open?id=1uSIPS6hj_cDXlocd72phnXN0gp1UJkyJ

Was unsere ZertSoft für Sie erfüllen ist, dass alle Ihrer Bemühungen für die Vorbereitung der HP HPE7-A03 von Erfolg krönen. Wenn Sie sich davon nicht überzeugen, können Sie zuerst unsere Demo probieren, erfahren Sie die Aufgaben der HP HPE7-A03. Nach dem Probieren werden die Mühe und die Professionalität unser Team fühlen. Wenn Sie neben HP HPE7-A03 noch auf andere Prüfungen vorbereiten, können Sie auch auf unserer Webseite suchen. Unsere große Menge der Unterlagen und Prüfungsaufgaben werden Ihnen Überraschung bringen!

HP HPE7-A03 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.
Thema 2	<ul style="list-style-type: none"> Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Thema 3	<ul style="list-style-type: none"> Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Thema 4	<ul style="list-style-type: none"> Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.

Das neueste HPE7-A03, nützliche und praktische HPE7-A03 pass4sure Trainingsmaterial

Mit den Schulungsunterlagen zur HP HPE7-A03 Zertifizierungsprüfung von ZertSoft können Sie die neuesten Fragen und Antworten zur HP HPE7-A03 Zertifizierungsprüfung bekommen und somit die HP HPE7-A03 Zertifizierungsprüfung erfolgreich einmalig bestehen. Die HP HPE7-A03 Zertifizierungsprüfung ist nützlich für Ihre Berufskarriere. Die Schulungsunterlagen zur HP HPE7-A03 Zertifizierungsprüfung von ZertSoft garantieren, dass Sie die Fragen sowie deren Konzept verstehen können.

HP Aruba Certified Campus Access Architect Exam HPE7-A03

Prüfungsfragen mit Lösungen (Q48-Q53):

48. Frage

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2- based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client is looking to utilize lower-cost OS-CX switches in their wiring closets. They calculate that each closet will need a stack of qty 6 PoE (AT) and qty 4 Gigabit Ethernet switches stacked with low-cost DACs.

Which series switch should you recommend?

- A. CX 6100
- B. CX 6000
- **C. CX 6200M**
- D. CX 6300F

Antwort: C

Begründung:

Cost-Effectiveness: The CX 6200M series is designed for cost-sensitive deployments while still providing essential features for modern network requirements, making it suitable for the client's goal of maintaining budget constraints.

PoE Support: The CX 6200M series supports PoE (Power over Ethernet), including PoE AT, which is necessary for powering devices like IP phones, cameras, and wireless access points throughout the retail and office environments.

Sufficient Port Density: With the ability to stack multiple switches, the CX 6200M can efficiently accommodate the requirement for both PoE and Gigabit Ethernet connections, supporting the overall network design.

DAC Compatibility: The switches in the CX 6200M series are compatible with low-cost DACs for stacking, making it a practical choice for the client's stacking solution.

49. Frage

ACME retail has 38 locations spread out across five US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HQ with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board.

A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores.

The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current PBX system later this year.

With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would be to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The MDF is in the basement, and you have multiple WAN circuits for the HQ links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.
What should the architect be concerned about regarding the solution? (Choose two.)

- A. IP addresses
- B. Regulatory Domains
- C. multiple locations
- D. Active Directory

Antwort: B,C

Begründung:

In designing a network solution for ACME Retail, which operates across various regions in the US and Canada, the architect must consider Regulatory Domains and the challenges posed by multiple locations. Regulatory Domains are crucial because wireless standards and allowed frequencies vary by country, affecting how WLAN equipment is configured and deployed.

Compliance with local regulations is essential to avoid legal issues and ensure optimal network performance. The challenge of multiple locations involves ensuring consistent, high-quality network service across all sites, despite geographical distances and site-specific characteristics.

This requires a scalable, flexible network architecture that can be centrally managed while accommodating the unique needs of each location.

50. Frage

What is the recommended bandwidth of a VSX Inter-Switch Link?

- A. It should be equal or higher than the speed of the uplink.
- B. It should be equal to the sum of the downlink ports' bandwidth.
- C. It should be the same speed as the one used for VSX Keepalive speed bandwidth.
- D. It should be equal to the sum of the uplink ports' bandwidth.

Antwort: A

Begründung:

The VSX Inter-Switch Link (ISL) must support all traffic that may need to traverse between the two VSX peers during convergence or asymmetric forwarding. Aruba recommends sizing the ISL equal to or greater than the uplink speed, ensuring sufficient bandwidth for peak forwarding without creating an ISL bottleneck.

51. Frage

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1 neighborhood health center and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management solution that can provide uninterrupted availability of all systems.

Locations:

- * XYZ Regional Hospital is located in New York City.
- * Dila Health Center is located in City A.
- * Mount Health Center is located in City B.
- * Rock Health Center is located in City C.
- * Branch clinics are located at different locations across the United States.

Requirements:

- * Provide, via management software, one single pane of glass to manage wired/wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture with near real-time insight, troubleshooting, and service-level performance reporting.
- * Seamless integration across wired, wireless, WAN, SD-Branch, and IoT.
- * Provide secure wireless access to all employees and partners, and guest Wi-Fi to patients/visitors.
- * All APs must support Wi-Fi 6E (802.11ax certified).
- * Security: WPA2/WPA3, 802.1X with RADIUS.
- * Identify and authenticate every wired and wireless device.
- * Provide end-to-end role-based security.
- * Enable seamless mobility for staff, patients, and visitors.
- * Support zero-touch deployment to cut deployment times from days to hours.

- * Establish a resilient, future-ready network infrastructure with intelligence, scalability, and intuitive toolsets.
- * Provide a fully redundant branch solution with dynamic path selection to the hospital.

NAC Solution Requirements:

- * Fully redundant NAC solution for management and authentication.
- * Local wireless and wired authentication for the main hospital.

The IT director of XYZ Regional Hospital is interested in a solution for nurse workstation tracking. What solution would meet the customer's requirements? (Select three.)

- A. AirWave
- **B. Asset Tracking Subscription**
- C. Client Insight
- D. User Experience Insight
- **E. Map Subscription**
- **F. Tags Configuration App**

Antwort: B,E,F

52. Frage

During the Stakeholder interview, an agenda is built where customer expectations are clarified. The customer is worried about future business requirements where network scalability and flexibility are key.

Which expectations can be considered for solving upcoming business problems? (Select two).

- A. network deployment
- **B. anticipated growth**
- **C. business outcomes**
- D. pain points
- E. critical needs

Antwort: B,C

53. Frage
