## C\_S4PM2\_2507 Learning Mode | Real C\_S4PM2\_2507 Testing Environment

GetValidTest is an authoritative study platform to provide our customers with different kinds of C\_S4PM2\_2507 practice torrent to learn, and help them accumulate knowledge and enhance their ability to pass the exam as well as get their expected scores. There are three different versions of our C\_S4PM2\_2507 Study Guide: the PDF, the Software and the APP online. To establish our customers' confidence, we offer related free demos for our customers to download before purchase. With our C\_S4PM2\_2507 exam questions, you will be confident to win in the C\_S4PM2\_2507 exam.

## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q38-Q43):

### NEW QUESTION # 38

In which type of extensibility is SAP Business Technology Platform used to host a custom extension?

- A. Side-by-side extensibility
- B. Developer extensibility
- C. Classic extensibility
- D. Key user extensibility

**Answer: A**

Explanation:

SAP Business Technology Platform (SAP BTP) provides an environment for developing, integrating, and running custom applications and extensions that work with SAP S/4HANA Cloud without modifying the core system. When SAP BTP is used to host an extension, it is known as Side-by-Side Extensibility.

A). Key user extensibility

Key user extensibility allows in-app changes such as adding custom fields, business logic, or UI adaptations directly within the SAP S/4HANA Cloud system. It does not require SAP BTP for hosting, as these changes occur inside the core system environment.

B). Side-by-side extensibility

In side-by-side extensibility, the extension is developed and deployed on SAP Business Technology Platform and connected to SAP

S/4HANA Cloud through APIs or events. This approach ensures that the core system remains clean and stable while allowing for more advanced custom development capabilities.

C). Developer extensibility

Developer extensibility (also known as embedded steampunk) allows developers to extend the core system using ABAP Cloud within the S/4HANA environment. It does not involve SAP BTP hosting.

D). Classic extensibility

Classic extensibility refers to the traditional on-premise modification or enhancement approach using custom code directly in the SAP core. This is not applicable to SAP BTP-hosted extensions.

### NEW QUESTION # 39

How is SAP's organizational change management framework connected with the SAP Activate methodology? Note: There are 2 correct answers to this question.

- A. Some change management activities are executed in more than one SAP Activate phase.
- B. Each change management dimension is assigned to a specific SAP Activate phase.
- C. The start of each change management activity is assigned to one specific SAP Activate phase.
- D. The SAP Activate phases build the dimensions of the organizational change management framework.

**Answer: A,C**

### NEW QUESTION # 40

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Business role requirements
- B. Target customer go-live date
- C. SAP Fiori application extensions
- D. Known integration requirements

**Answer: B,D**

### NEW QUESTION # 41

When doing a new implementation on premise or private cloud, which system is recommended to demonstrate standard functionality in the Explore phase?

- A. Trial
- B. Starter
- C. Sandbox
- D. Development

**Answer: B**

Explanation:

During a new implementation project of SAP S/4HANA-whether on-premise or in a private cloud environment-the Explore Phase of the SAP Activate methodology focuses on validating standard SAP Best Practices processes through Fit-to-Standard workshops. The system used to demonstrate these standard processes should contain activated best practice content and be preconfigured for demonstration.

D). Starter system

The Starter system is specifically designed for this purpose. It comes preloaded with SAP Best Practices content, including configuration, sample master data, and transactional data. It allows project teams to explore standard functionality, perform Fit-to-Standard workshops, and validate requirements before system configuration begins.

Other options:

- \* A. Trial system Used for learning and exploration but not suitable for formal project phases.
- \* B. Development system Used later during configuration and realization, not for initial demonstrations.
- \* C. Sandbox system Used for testing or practice, not the recommended system for Explore workshops.

## NEW QUESTION # 42

How do you define the term Organizational Change Management?

- A. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users.
- B. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits.
- C. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users.
- D. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits.

**Answer: D**

## NEW QUESTION # 43

If you want to inspect the quality of our C\_S4PM2\_2507 Study Dumps, you can download our free dumps from GetValidTest and go through them. The unique questions and answers will definitely impress you with the information packed in them and it will help you to take a decision in their favor. The high quality and high pass rate has become a reason for thousand of candidates to choose.
