Technical DEP-2025 Training & Test DEP-2025 Cram

Don't waste your time with unhelpful study methods. There are plenty of options available, but not all of them are suitable to help you pass the Apple Deployment and Management Exam (DEP-2025) exam. Some resources out there may even do more harm than good by leading you astray. Our DEP-2025 Exam Dumps are available with a free demo and up to 1 year of free updates.

Apple Deployment and Management Exam Sample Questions (Q107-Q112):

NEW QUESTION # 107

Which order would iPhone use to automatically join a Wi-Fi network?

- A. Public network, preferred network, private networks
- B. Private networks, preferred network, public network
- C. Preferred network, private networks, public network
- D. Preferred network, public network, private networks

Answer: C

Explanation:

iPhones prioritize preferred networks. The iOS Deployment Reference states, "iPhone prioritizes Wi-Fi networks in this order: preferred (known) networks, private networks, then public networks." References:

iOS Deployment Reference, "Wi-Fi Behavior" section.

Apple Platform Deployment Guide, "Network Priority" section.

NEW QUESTION # 108

Which apps are published through the App Store but are discoverable only with a direct link?

- A. Provisional
- B. Unlisted
- C. Managed
- D. TestFlight

Answer: B

Explanation:

Unlisted apps require a link. The Apple Business Manager User Guide states, "Unlisted apps are published to the App Store but are discoverable only via a direct link, often for private distribution." Reference:

Apple Business Manager User Guide, "Custom Apps" section.

Apple Platform Deployment Guide, "App Distribution" section.

NEW QUESTION # 109

What's required to install a configuration profile on a device?

- A. An ADE token
- B. An APNs certificate
- C. User acceptance
- D. An MDM solution

Answer: C

Explanation:

To install a configuration profile on an Apple device, user acceptance is required unless the device is enrolled in an MDM solution with specific automation (e.g., Automated Device Enrollment). Configuration profiles, which contain settings or policies, are typically downloaded manually (e.g., via a website or email) and must be approved by the user through the Settings app on iOS/iPadOS or System Settings on macOS. An MDM solution (option A) can push profiles, but it's not required for manual installation. An APNs certificate (option B) is needed for MDM communication, not profile installation itself. An ADE token (option D) is for Automated Device Enrollment, not general profile installation. The Apple Platform Deployment Guide notes that user consent is a default step for manual profile installation.

NEW QUESTION # 110

Which two of these can MDM optionally provide with the EraseDevice command when you use the Return to Service workflow?

- A. Preserve supervision status
- B. Enrollment profile
- C. Wi-Fi payload
- D. Register data plan
- E. Location Services

Answer: B,C

Explanation:

The Return to Service workflow is designed to redeploy iPhones and iPads with minimal IT interaction. Apple Learning details that when sending the EraseDevice command, MDM can optionally attach a Wi-Fi payload and the enrollment profile. The Wi-Fi payload ensures the freshly erased device automatically reconnects to the network during Setup Assistant, enabling seamless MDM re-enrollment. The enrollment profile ensures the device knows which MDM server to connect to. Apple specifies that supervision status is retained automatically for supervised devices; it is not an optional payload. Data plans and Location Services are unrelated to the Return to Service workflow. These options allow organizations to quickly cycle devices for redeployment, particularly in education and enterprise shared-use environments.

References: Apple Platform Deployment - "Return to Service workflow with EraseDevice."

NEW QUESTION # 111

What's required to unenroll a device from an MDM solution?

- A. User acceptance
- B. A wipe command
- C. An administrator's approval
- D. The device's passcode

Answer: C

Explanation:

To unenroll a device from an MDM solution, an administrator's approval is typically required, especially for supervised or organization-owned devices. This involves removing the MDM profile from the device via the MDM server, which may also require removing the device from Apple Business Manager or Apple School Manager if enrolled via ADE. The device's passcode (option B) isn't required for unenrollment. User acceptance (option C) isn't needed for administrator-initiated unenrollment, though users might remove profiles manually on unsupervised devices if permitted. A wipe command (option D) isn't necessary unless unenrollment includes data removal. The Apple Platform Deployment Guide outlines this process.

NEW QUESTION # 112

.....

Your final purpose is to get the DEP-2025 certificate. So it is important to choose good study materials. In fact, our aim is the same with you. Our DEP-2025 study materials have strong strengths to help you pass the exam. Maybe you still have doubts about our DEP-2025 exam materials. We have statistics to prove the truth.
