## Best Way to Prepare For Cisco 400-007 Certification Exam

Actual4Cert is one of the trusted and reliable platforms that is committed to offering quick Cisco Certified Design Expert (CCDE) Written Exam (400-007) exam preparation. To achieve this objective Actual4Cert is offering valid, updated, and real Cisco Certified Design Expert (CCDE) Written Exam (400-007) exam questions. These Cisco exam dumps will provide you with everything that you need to prepare and pass the final Cisco 400-007 exam with flying colors.

## Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q68-Q73):

### NEW QUESTION # 68

Company XYZ has a new network based on IPv6. Some of the subnets that they are planning to use will be confidential and need an addressing scheme that confines them to the local campus network. Which type of IPv6 addresses can be used for these networks in the IPv6 addressing design?

- A. unique local addresses
- B. link-local addresses
- C. private addresses
- D. local addresses

**Answer: A**

**NEW QUESTION # 69**

Data governance allows setting and enforcing controls that allow greater access to data, which gains the security and privacy from having the controls on data. What is one of the use cases of data governance?

- A. quality assessment
- B. data stewardship
- C. risk monitoring
- **D. policy management**

**Answer: D**

Explanation:

A key use case of data governance is policy management, where organizations define and enforce rules about data access, usage, and handling. This ensures compliance, security, and privacy while enabling greater controlled access to data.

**NEW QUESTION # 70**

Network operators have many options available, from fully centralized to fully distributed control planes, and each approach has its own set of characteristics. Drag and drop the characteristics from the left onto the corresponding approach on the right.

**Answer:**

Explanation:

**NEW QUESTION # 71**

An international media provider is an early adopter of Docker and micro services and is using an open-source homegrown container orchestration system. A few years ago, they migrated from on-premises data centers to the cloud. Now they are faced with challenges related to management of the deployed services with their current homegrown orchestration system. Which platform is well-suited as a state-aware orchestration system?

- A. Ansible
- **B. Kubernetes**
- C. Terraform
- D. Puppet

**Answer: B**

**NEW QUESTION # 72**

Refer to the table. A customer investigates connectivity options for a DCI between two production data centers to aid a large-scale migration project. The migration is estimated to take 20 months to complete but might extend an additional 10 months if issues arise. All connectivity options meet the requirements to migrate workloads.

Which transport technology provides the best ROI based on cost and flexibility?

- A. MPLS
- **B. Metro Ethernet**
- C. DWDM over dark fiber
- D. CWDM over dark fiber

**Answer: B**

**NEW QUESTION # 73**

.....
