Training Esri EAPA_2025 Tools, EAPA_2025 Valid Exam Vce

PrepPDF real Esri EAPA_2025 Exam Dumps are ideal for applicants who are busy in their routines and want to do quick preparation for the Esri EAPA_2025 certification test. We guarantee that our actual ArcGIS Pro Associate 2025 (EAPA_2025) questions will be enough for you to prepare successfully for the ArcGIS Pro Associate 2025 (EAPA_2025) examination.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q18-Q23):

NEW QUESTION # 18
An attribute table contains three columns with details of monthly rainfall for three consecutive years. A GIS analyst wants to compare the total rainfall, mean rainfall, and the minimum and maximum rainfall for each year.
Which tool should the analyst use to most efficiently compare this tabular data?

- A. Summary Statistics
- B. Data Engineering view
- C. Create Field Statistics Chart

Answer: B

Explanation:
The Data Engineering view in ArcGIS Pro provides quick access to key statistics (total, mean, min, max, etc.) for any numeric fields in a table. This allows rapid inspection of multiple fields without running separate geoprocessing tools or creating charts.
* Create Field Statistics Chart (Option B) creates charts but is not as efficient for comparing multiple fields simultaneously.
* Summary Statistics (Option C) creates grouped output tables but is more suitable for aggregation across rows, not across multiple fields.

NEW QUESTION # 19
Which workflow should be used to share a map as a TIFF file?

- A. Share > Export Map
- B. Share > Print Map
- C. Share > Capture To Clipboard

Answer: A

Explanation:
Export Map under the Share tab provides options to export maps into various formats, including TIFF, PDF, PNG, JPEG, and others. This is the standard workflow for creating a high-quality raster file suitable for sharing and archiving.
* Print Map (Option A) is for sending the map directly to a printer.
* Capture To Clipboard (Option C) copies the current map extent as an image to the clipboard for temporary use, not for file creation.
Therefore, the correct answer is B.
-

NEW QUESTION # 20
A GIS specialist creates a model tool to allow others to run analysis on their own data. When users open the model tool, they are unable to configure input data or output location.
How should the specialist expose this functionality to users?

- A. Right-click the model variables > Open > Properties
- B. Right-click the model variables > Parameter
- C. Right-click the tool in the model > Create Variable > From Parameter

Answer: B

Explanation:
To make variables editable by users when running a model, you must right-click the model variables and check "Parameter." This exposes the variable as an input or output parameter in the tool interface.
* Create Variable > From Parameter (Option A) is used when building the model, not when exposing variables.
* Open > Properties (Option C) accesses variable properties but does not expose parameters for tool users.
Therefore, the correct answer is B.
-

NEW QUESTION # 21
A GIS analyst is reviewing the work of an intern and realizes that the intern added feature attribute information directly to the attribute table. Many of the features have no geometry and do not display on the map. The analyst uses Check Geometry to identify all features with null geometries.
Which method should the analyst use to allow adding the geometry to existing features so that they can be visualized in the map?

- A. Analysis > Tools (Geoprocessing) > Data Management > Features > Add Geometry Attributes
- B. Analysis > Tools (Geoprocessing) > Data Management > Features > Repair Geometry
- C. Edit > Modify (Modify Features) > Reshape > Replace Geometry

Answer: C

Explanation:
The Replace Geometry tool, accessed via Modify Features in the Edit tab, allows the user to assign or redraw geometry for existing features that are missing it (null shape). This allows previously non-spatial records to be given a spatial location, enabling visualization on the map.
* Repair Geometry is used to fix corrupt geometry but does not create new geometry for null shapes.
* Add Geometry Attributes calculates existing geometry fields but cannot generate geometry for empty features.
* Replace Geometry directly enables assigning missing shapes.
Therefore, the correct answer is B.

NEW QUESTION # 22
A GIS technician working with 3D building data wants to interactively view only specific floors of a building at a time.
Which layer property allows for this type of visualization?

- A. Time
- B. Range
- C. Elevation

Answer: B

Explanation:
The Range property allows dynamic filtering of features based on numeric attributes such as floor number. By setting the floor number as the range field, users can interactively slide through floors in a 3D scene.
* Time (Option A) filters features based on temporal data.
* Elevation (Option C) controls the vertical placement of features but does not allow interactive filtering by floor.
Therefore, the correct answer is B.

NEW QUESTION # 23
.....

For some difficult points of the EAPA_2025 exam questions which you may feel hard to understand or easy to confuse for too similar with the others. In order to help you memorize the EAPA_2025 guide materials better, we have detailed explanations of the difficult questions such as illustration, charts and referring website. Every year some knowledge of the EAPA_2025 Practice Braindumps is reoccurring over and over. You must ensure that you master them completely.
