This puts your mind at ease when you are Certified Pega Decisioning Consultant 25 (PEGACPDC25V1) exam preparing with us.

Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q35-Q40):

NEW QUESTION # 35
U+ Bank, a retail bank, is facing an unforeseen technical issue with its customer care system. As a result, the bank wants to share the new temporary contact details with all customers over an SMS. All customers must receive this communication regardless of the engagement policy conditions and constraints.
Which type of communication do you configure to implement this requirement?

- A. One-time action
- B. Promotional action
- C. Transactional action
- D. Mandatory action

Answer: A

NEW QUESTION # 36
An outbound run identifies 150 Standard card offers, 75 on email, and 75 on the SMS channel. If the following volume constraint is applied, how many actions are delivered by the outbound run?

- A. 0
- B. 1
- C. 75 emails 25 SMSes
- D. 75 SMSes and 25 emails

Answer: C

Explanation:
The outbound run delivers 75 emails and 25 SMSes for the Standard card offer because the volume constraint is set to limit the number of actions per channel per day. The email channel has a limit of 75 actions per day, so all 75 email offers are delivered. The SMS channel has a limit of 25 actions per day, so only 25 SMS offers are delivered. The remaining 50 SMS offers are not delivered because they exceed the volume constraint.

NEW QUESTION # 37
As a decisioning architect, you are setting up the action hierarchy for MyCo. Select the correct action hierarchy level for each of the

hierarchy items identified.

Answer:

Explanation:
Explanation:
A screenshot of a survey AI-generated content may be incorrect.

NEW QUESTION # 38
MyCo, a telecom company, wants to send promotional SMSs with data plan offers to their qualified customers. The business intends to use the same action flow template with their target flow pattern for all the data plan actions.
What do you configure to implement this requirement?

- A. A file template
- B. An SMS treatment
- C. A dynamic template
- D. An output template

Answer: B

NEW QUESTION # 39
U+ Bank wants to offer credit cards only to customers with a low-risk profile. The customers are divided into various risk segments from AAA to CCC. The risk segmentation rules that the business provides use the Age and the customer Credit Score based on the following table. The bank uses a scorecard model to determine the customer Credit Score.
As a decisioning architect, how do you implement the business requirement?

- A. Add the risk segmentation rules in the Results tab of the scorecard rule.
- B. Add three contact policies that correspond to the three risk segments.
- C. Add a decision table to a decision strategy and pass the credit score as the parameter.
- D. Add a decision table to a decision strategy and reference it in the scorecard component.

Answer: C

Explanation:
To implement the business requirement, you need to add a decision table to a decision strategy and pass the credit score as the parameter. A decision table allows you to define rules based on one or more input parameters and return an output value. In this case, you can use the credit score as an input parameter and return the risk category/grade as an output value. You can then use this output value to filter out customers who are not in the low-risk segment (AAA). Verified References: Pega Academy - Decisioning Consultant - Using decision tables

NEW QUESTION # 40
.....
