Microsoft Power Platform Functional Consultant Sample Questions (Q177-Q182):

NEW QUESTION # 177

You are creating a business process flow for a Power Apps app.

The business process flow must meet the following requirements:

- * Must be available offline.
- * Send an email to the team when a record is created.

You need to set up business process flow.

What should you do? To answer, select the appropriate options in the answer area.

Each correct selection is worth one point

Requirement	Configuration
Make it available offline.	Ensure that the business process flow is referencing one table. Ensure that the business process flow is referencing two tables. Ensure that the business process flow is referencing one table per stage.
Send an email to the team.	Create a step. Create a stage. Create a required column.

Answer:

Explanation:

Requirement	Configuration
Make it available offline.	Ensure that the business process flow is referencing one table. Ensure that the business process flow is referencing two tables. Ensure that the business process flow is referencing one table per stage.
Send an email to the team.	Create a step. Create a stage. Create a required column.

Explanation

Graphical user interface, text, application Description automatically generated

Requirement	Configuration
Make it available offline.	Ensure that the business process flow is referencing one table.
Send an email to the team.	Create a required column.

NEW QUESTION # 178

You need to resolve the issue reported by substitute employees after they are assigned service requests.

How should you configure the system? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Aspect	Configuration
Relationship	Service Request 1:N Qualification Service Request N:N Qualification Service Request N:1 Qualification
Cascading rule	Restrict Cascade All Cascade None

Answer:

Explanation:

Aspect	Configuration
Relationship	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="border-bottom: 1px solid #ccc; padding: 2px 5px;">Service Request 1:N Qualification</div> <div style="border-bottom: 1px solid #ccc; padding: 2px 5px;">Service Request N:N Qualification</div> <div style="padding: 2px 5px;">Service Request N:1 Qualification</div> </div>
Cascading rule	<div style="border: 1px solid #ccc; padding: 5px;"> <div style="border-bottom: 1px solid #ccc; padding: 2px 5px;">Restrict</div> <div style="border-bottom: 1px solid #ccc; padding: 2px 5px;">Cascade All</div> <div style="padding: 2px 5px;">Cascade None</div> </div>

Explanation

Box 1: Service Request 1:N Qualification

When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Box 2: Cascade All

Cascade All - Perform the action on all referencing table records associated with the referenced table record.

NEW QUESTION # 179

A company is implementing advanced features for a Power Pages website.

The company hosts documents and lists in several SharePoint environments that are hosted both on-premises and online. Users of the Power Pages site must be able to view, search for, and filter this data from a single, intuitive experience.

You need to determine which advanced feature to implement.

What should you implement?

- A. Power BI embedded
- B. Content delivery network
- C. Faceted search
- D. Progressive search

Answer: D

NEW QUESTION # 180

You create a new solution for a business process.

The business process includes uploading specific file types to a web service.

You need to ensure that the business process works the same way anywhere the solution is deployed.

Which option should you use? To answer, drag the appropriate options to the correct configurations. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

- Connection reference
- Environment variable
- Solution system settings

Configuration

Blocked file types

URL to a web service

Option

- Option
- Option

Answer:

Explanation:

Explanation:

Box 1: Solution system settings

For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.

Box 2: Environment variable

When should Environment variables be used?

Some examples include:

When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.

If you're building a solution where your customer is required to provide an input value.

Application setup pages.

Incorrect:

A connection reference is a solution component that contains information about a connector.
