

C-BCBTP-2502学習関連題、C-BCBTP-2502英語版

IT業種のSAPのC-BCBTP-2502認定試験に合格したいのなら、It-Passports SAPのC-BCBTP-2502試験トレーニング問題集を選ぶのは必要なことです。SAPのC-BCBTP-2502認定試験に受かったら、あなたの仕事はより良い保証を得て、将来のキャリアで、少なくともIT領域であなたの技能と知識は国際的に認知され、受け入れられるです。これも多くの人々がSAPのC-BCBTP-2502認定試験を選ぶ理由の一つです。その理由でこの試験はますます重視されるようになります。It-Passports SAPのC-BCBTP-2502試験トレーニング資料はあなたが上記の念願を実現することを助けられるのです。It-Passports SAPのC-BCBTP-2502試験トレーニング資料は豊富な経験を持っているIT専門家が研究したもので、問題と解答が緊密に結んでいますから、比べるものがないです。高い価格のトレーニング授業を受けることはなくて、It-Passports SAPのC-BCBTP-2502試験トレーニング資料をショッピングカートに入れる限り、我々はあなたが気楽に試験に合格することを助けられます。

It-PassportsのC-BCBTP-2502問題集を利用してみたらどうですか。この問題集は最近更新されたもので、実際試験で出題される可能性がある問題をすべて含んでいて、あなたが一回で成功することを保証できますから。この問題集は信じられないほどの良い成果を見せます。試験に失敗すればIt-Passportsは全額返金のことができますから、ご安心に問題集を利用してください。It-PassportsのC-BCBTP-2502試験参考書できっとあなたが望ましい成功を取られます。

C-BCBTP-2502英語版、C-BCBTP-2502関連資格試験対応

実際に、多くの受験者はC-BCBTP-2502試験に合格したいです。難しいですが、自分自身はより良いものになりたいので、やはりチャレンジしたいです。そのような場合、C-BCBTP-2502学習教材のようないい資料が必要です。C-BCBTP-2502学習教材を利用すれば、あなたはC-BCBTP-2502試験を簡単にパスできます。

SAP C-BCBTP-2502 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">● SAP Business Technology Platformの理解: このセクションでは、SAP ソリューションアーキテクトのスキルを評価し、SAP Business Suite 戦略全体における SAP Business Technology Platformの位置付けに焦点を当てます。変革の実現、企業戦略との整合性、デジタルイノベーションの支援におけるプラットフォームの役割を理解することが含まれます。受験者は、現代のビジネスプロセスにおける SAP BTP の関連性と、他の SAP 製品との統合方法を理解することが求められます。

トピック 2

- SAP Business SuiteによるCIO変革の実現: このセクションでは、ITトランスフォーメーション・マネージャーのスキルを評価し、CIO主導のデジタルトランスフォーメーションにおける価値提供におけるSAP Business Suiteの役割について解説します。エンタープライズITにおけるSAPポートフォリオの重要性を強調し、SAP BTPの機能を紹介するとともに、エンドツーエンドのプロセスや業界固有のユースケースとの連携方法を示します。受験者は、SAP BTPに含まれる主要製品を特定し、ポートフォリオを横断するコンポーネントがどのように統合されて測定可能な価値を実現するかを説明できる必要があります。

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C-BCBTP-2502 試験問題 (Q36-Q41):

質問 # 36

Which SAP BTP component provides a centralized hub for managing enterprise APIs?

- **A. SAP API Management**
- B. SAP Ariba
- C. SAP Business Network
- D. SAP SuccessFactors

正解: A

解説:

As businesses move toward a "composable" architecture, APIs (Application Programming Interfaces) become the essential links between different software components. SAP API Management, a core capability of the SAP Integration Suite on BTP, provides a centralized hub to design, publish, secure, and monitor these APIs.

In a complex SAP Business Suite environment, APIs might be exposed from S/4HANA, SuccessFactors, or even third-party non-SAP systems. Without a centralized management tool, these connections become difficult to track, secure, and update.

SAP API Management allows IT administrators to enforce consistent security policies (such as OAuth or rate-limiting) across all enterprise services, protecting sensitive data from unauthorized access. It also includes a

"Developer Portal," which serves as a self-service catalog where developers can discover and test available APIs, significantly speeding up the development of new applications and integrations. By positioning API Management as a central pillar, SAP BTP enables "API-first" development, which is critical for digital transformation. This ensures that the enterprise is open and connectable, allowing for seamless communication between the digital core and the vast ecosystem of cloud services, mobile apps, and IoT devices.

質問 # 37

Which of the following SAP BTP components enhances enterprise data governance?

- A. SAP Concur
- B. SAP AppGyver
- C. SAP BusinessObjects BI
- **D. SAP Data Intelligence**

正解: D

解説:

Data governance is the practice of ensuring that data is accurate, available, and secure across an organization.

SAP Data Intelligence is the primary component within SAP BTP that addresses this need. It provides advanced metadata management and data cataloging capabilities, which are the foundations of governance. A data catalog acts like a "search engine" for enterprise data, allowing users to understand the origin (lineage), quality, and sensitivity of the information they are working with.

In a complex SAP Business Suite environment, data often moves through multiple stages and systems. SAP Data Intelligence tracks this "data lineage," showing how data was transformed as it moved from an ERP system to a reporting dashboard. This transparency is crucial for regulatory compliance (like GDPR) and for building trust in the data used for decision-making. If a financial report looks incorrect, governance tools allow IT to trace the data back to its source to find the error. By positioning Data Intelligence as the governance hub, SAP BTP ensures that the "Intelligent Enterprise" is built on a foundation of high-quality, trusted data. This is a significant differentiator from tools like SAP BusinessObjects (which focuses on reporting) or SAP Concur (which focuses on expenses), as Data Intelligence provides the underlying control layer for the entire data ecosystem.

質問 # 38

Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- A. SAP Ariba
- B. SAP Conversational AI
- C. SAP Business Network
- **D. SAP Workflow Management**

正解: D

解説:

In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.

The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape.

By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

質問 # 39

Which of the following are key features of SAP BTP's Integration Suite? (Choose two).

- A. Manual data processing with no automation.
- B. Restricted integration to SAP-only services.
- **C. Prebuilt connectors for SAP and third-party applications.**
- **D. Built-in API management for secure data exchange.**

正解: C、D

解説:

The SAP Integration Suite is designed to handle the complexities of a hybrid and heterogeneous IT landscape.

One of its most significant features is the availability of thousands of prebuilt connectors and integration flows for both SAP and third-party applications (such as Salesforce, ServiceNow, and various government portals). These "accelerators" significantly reduce the time and cost associated with integration projects, as developers do not have to build connections from scratch. This allows businesses to achieve a faster "time-to-value" when expanding their digital ecosystem.

Another critical feature is built-in API management. As enterprises move toward microservices and cloud-native applications, the number of APIs (Application Programming Interfaces) increases exponentially. SAP Integration Suite provides a centralized layer to govern, secure, and monitor these APIs. This ensures that data exchange between systems is not only efficient but also highly secure, protecting the enterprise from unauthorized access or data breaches. By combining prebuilt content with robust API governance, SAP BTP enables organizations to create a "composable enterprise" where different systems can be easily connected and reconfigured to meet changing business needs, moving away from the rigid, manual processes of the past.

質問 # 40

Which SAP BTP capability is crucial for supply chain resilience in the logistics industry?

- A. Restricting logistics data visibility to local servers.
- **B. Real-time data exchange and tracking with SAP Integration Suite.**
- C. Limiting automation in fleet management.
- D. Manual coordination of supply chain operations.

正解: B

解説:

Supply chain resilience depends on visibility and the ability to react to disruptions in real-time. The SAP Integration Suite on BTP is crucial here because it enables real-time data exchange and tracking across a global network of suppliers, carriers, and warehouses. In the logistics industry, delays at a single port or a shortage of specific raw materials can have a cascading effect. By integrating IoT (Internet of Things) sensors, GPS tracking, and carrier management systems through the BTP Integration Suite, companies can gain a

"control tower" view of their entire supply chain.

This connectivity allows for "event-driven" logistics. For example, if a shipment is delayed, the system can automatically trigger a notification in the SAP S/4HANA system, recalculate production schedules, and notify customers—all without manual intervention. This level of automation and visibility is what builds resilience; it allows businesses to pivot quickly when faced with unexpected challenges. Positioning SAP BTP as the integration hub for logistics ensures that data flows smoothly between the "digital core" and the physical world of shipping and receiving. This transforms the supply chain from a linear, often opaque process into a dynamic, responsive network that can withstand the pressures of modern global commerce.
