Don't doubt about it. More useful certifications mean more ways out. If you pass the Sharing-and-Visibility-Architect exam, you will be welcome by all companies which have relating business with Sharing-and-Visibility-Architect exam torrent.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q23-Q28):

NEW QUESTION # 23

A support representative at Universal Containers created a report to view all her open cases that have been created in the past 7 days and saved the report in the "Private Reports" folder.
Who can view and run the report?

- A. The report owner and users with the View All Data permission
- B. The report owner and any users who have been given access to the "My Private Reports" folder
- C. The report owner

Answer: C

NEW QUESTION # 24

Universal Containers has set the Org-Wide Sharing Default for Accounts to Private and has created some sharing rules to extend access based on certain data access policies. An architect has been asked to review access to a certain set of key customer accounts. How might this review be conducted?

- A. Use the Sharing button on each customer Account.
- B. Run a Report on Sharing in the Admin Console.
- C. Export the Account Share table and review.
- D. Log in as each user and Run the All Accounts List View.

Answer: C

NEW QUESTION # 25

Universal Containers has a private sharing model on Accounts. Apex Managed Sharing is required to share certain account records with all users who are assigned to a specific Role in the Role Hierarchy. What should be the recommended way for the Architect to implement this?

- A. Create an AccountShare record associated to each user who is assigned to the Role.
- B. Create an AccountShare record associated to the required Role.
- C. Create an AccountShare record associated to a public group containing the Role.
- D. Create an AccountShare record associated to a public group containing the Users in the Role.

Answer: C

Explanation:

Explanation

The recommended way for the architect to implement this is to create an AccountShare record associated to a public group containing the role. This way, the architect can use Apex Managed Sharing to share certain account records with all users who are assigned to a specific role in the role hierarchy. Creating an AccountShare record associated to a public group containing the users in the role is not possible because public groups can only contain users, roles, or other public groups, but not a combination of them. Creating an AccountShare record associated to each user who is assigned to the role is not efficient because it requires more sharing records and maintenance. Creating an AccountShare record associated to the required role is not valid because AccountShare records can only be associated to users or groups, not roles1

NEW QUESTION # 26

Universal Containers (UC) operates worldwide, with offices in more than 100 regions in 10 different countries, and has established a very complex Role Hierarchy to control data visibility. In the new fiscal year, UC is planning to reorganize the roles and reassign account owners.

Which feature should an architect recommend to avoid problems with this operation?

- A. Partition data using Divisions
- B. Deferred Sharing Recalculation
- C. Skinny table

Answer: B

Explanation:

Explanation

Deferred Sharing Recalculation is a feature that allows admins to postpone the recalculation of sharing rules until a scheduled maintenance window, which can improve performance and avoid locking issues when making changes to roles or account owners3. This is the best feature to recommend to avoid problems with this operation. Skinny table is a feature that improves performance by storing frequently used fields in a separate table, but it does not affect sharing recalculation. Partition data using Divisions is a feature

that allows admins to segment data into logical subsets for reporting and searching purposes, but it does not affect sharing recalculation.

NEW QUESTION # 27

Universal Containers implemented Sales Cloud and requested that sales agents have access to products and prices the company sells, and to be able to create opportunities for its customers.

What should the organization-wide defaults be for pricebook?

- A. View
- B. Public Read-Only
- C. Use

Answer: C

NEW QUESTION # 28

.....
