Free PDF JN0-460 Dumps & Accurate New JN0-460 Test Question Ensure You a High Passing Rate

You may feel astonished and doubtful about this figure; but we do make our JN0-460 exam dumps well received by most customers. Better still, the 98-99% pass rate has helped most of the candidates get the certification successfully, which is far beyond that of others in this field. In recent years, supported by our professional expert team, our JN0-460 Test Braindumps have grown up and have made huge progress. We pay emphasis on variety of situations and adopt corresponding methods to deal with. More successful cases of passing the JN0-460 exam can be found and can prove our powerful strength.

In order to make all customers feel comfortable, our company will promise that we will offer the perfect and considerate service for all customers. If you buy the JN0-460 training files from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the JN0-460 learning dumps, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our JN0-460 study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your exam.

Prepare well and Pass the Juniper JN0-460 Exam on the first attempt

JN0-460 study materials can expedite your review process, inculcate your knowledge of the exam and last but not the least, speed up your pace of review dramatically. The finicky points can be solved effectively by using our JN0-460 exam questions. With a high pass rate as 98% to 100% in this career, we have been the leader in this market and helped tens of thousands of our loyal customers pass the exams successfully. Just come to buy our JN0-460 learning guide and you will love it.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details

Topic 1	• Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 2	• Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 3	• Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 4	• Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 5	• Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q16-Q21):

NEW QUESTION # 16
You must move from a campus fabric core-distribution centrally-routed bridging (CRB) network to an edge- routed bridging (ERB) network.
In this scenario, where does the gateway for the network move?

- A. from core to distribution
- B. from access to distribution
- C. from distribution to access
- D. from distribution to core

Answer: C

Explanation:
In Juniper Mist campus fabric architectures, the location of the Layer 3 gateway (IRB interface) differentiates centrally-routed bridging (CRB) from edge-routed bridging (ERB):
In CRB, the gateway resides at the core layer- routing occurs centrally, and access/distribution layers perform Layer 2 bridging.
In ERB, the gateway moves to the edge (distribution layer), enabling routing to occur closer to endpoints, improving performance and scalability.
"In a centrally-routed bridging (CRB) topology, Layer 3 gateways reside at the core. When transitioning to an edge-routed bridging (ERB) design, the Layer 3 gateways are moved to the distribution layer, closer to the access switches and clients." Therefore, when moving from a core-distribution CRB to an ERB model, the gateway moves from the distribution to the access layer in campus terms (edge = access).

Option A:Incorrect - ERB gateways are not at the distribution layer only.
Option B:Incorrect - opposite direction.
Option C:Correct- the gateway movesfrom distribution to access (edge).
Option D:Incorrect - this describes CRB, not ERB.

NEW QUESTION # 17
Which three switch testing tools are available when using Wired Assurance?(Choose three.)

- A. cable test
- B. bounce port
- C. ping
- D. load factory-default
- E. iPerf

Answer: A,B,C

Explanation:
According toJuniper Mist Wired Assurance documentation, three built-in diagnostic tools available for testing switch functionality
areBounce Port,Ping, andCable Test.
Bounce Portallows you to disable and re-enable a port to reset connectivity.
Pingverifies Layer 3 reachability between the switch and target IPs.
Cable Testperforms diagnostics to detect wiring faults, impedance mismatches, or cable lengths.
These tools are accessed directly from theSwitch Testing Toolssection in the Mist dashboard and are available for EX Series and
QFX Series switches onboarded to the Mist cloud.

NEW QUESTION # 18
Which three sub-classifiers are part of an "Interface Anomalies" classifier? (Choose three.)

- A. Cable Issues
- B. Latecny
- C. Negotiation Failed
- D. Jitter
- E. MTU Mismatch

Answer: B,C,E

NEW QUESTION # 19
Switch events are classified into which three severity levels? (Choose three.)

- A. Ignored
- B. Bad
- C. Critical
- D. Good
- E. Neutral

Answer: B,D,E

NEW QUESTION # 20
Which provisioning process is supported by Wired Assurance?

- A. Postal mailing of configurations
- B. Zero-Touch Provisioning (ZTP)

- C. Manual entry of MAC addresses
- D. Physical device inspection

Answer: B

NEW QUESTION # 21
......

If you prepare for the JN0-460 exam using our TestBraindump testing engine, it is easy and convenient to buy. Just two steps to complete your purchase, we will send the JN0-460 product to your mailbox quickly. And you only need to download e-mail attachments to get your products.
