Free PDF Quiz Trustable Pure Storage - New FlashArray-Implementation-Specialist Exam Objectives

If you fail FlashArray-Implementation-Specialist exam unluckily, don't worry about it, because we provide full refund for everyone who failed the exam. You can ask for a full refund once you show us your unqualified transcript to our staff. The whole process is time-saving and brief, which would help you pass the next FlashArray-Implementation-Specialist Exam successfully. Please contact us through email when you need us. The FlashArray-Implementation-Specialist question dumps produced by our company, is helpful for our customers to pass their exams and get the FlashArray-Implementation-Specialist certification within several days. Our FlashArray-Implementation-Specialist exam questions are your best choice.

Pure Storage FlashArray-Implementation-Specialist Exam Syllabus Topics:

Topic	Details
Topic 1	• Pre-Installation • Upgrade: This section of the exam measures the skills of Enterprise Infrastructure Technicians and covers all preparation activities before deploying or upgrading a Pure Storage FlashArray. It includes understanding environmental requirements, verifying prerequisites, checking compatibility, and validating system readiness through appropriate tools and documentation.
Topic 2	• Post-Installation • Upgrade: This section of the exam measures the skills of FlashArray Implementation Specialists and evaluates how professionals confirm system functionality after installation or an upgrade. It involves validating connectivity, running health checks, confirming configurations, and ensuring that the deployment meets operational expectations.
Topic 3	• Upgrades: This section of the exam measures the skills of FlashArray Implementation Specialists and focuses on tasks involved in managing firmware and software upgrades. Candidates must demonstrate knowledge of upgrade planning, verification steps, and rollback procedures, ensuring that systems are updated with minimal disruption to service.
Topic 4	• Installation: This section of the exam measures the skills of Enterprise Infrastructure Technicians and focuses on executing a successful installation of FlashArray systems. It tests the ability to perform physical setup, cabling, configuration of network settings, and the application of initial system configurations necessary for full deployment.

Exam FlashArray-Implementation-Specialist Book, FlashArray-Implementation-Specialist Online Tests

When you choose to attempt the mock exam on the Pure Storage FlashArray-Implementation-Specialist practice software by ValidBraindumps, you have the leverage to custom the questions and attempt it at any time. Keeping a check on your Pure Storage Certified FlashArray Implementation Specialist exam preparation will make you aware of your strong and weak points. You can also identify your speed on the practice software by ValidBraindumps and thus manage time more efficiently in the actual Pure Storage exam.

Pure Storage Certified FlashArray Implementation Specialist Sample Questions (Q24-Q29):

NEW QUESTION # 24
A customer has ordered several FlashArrays and wants to have ActiveCluster configured. What is the maximum quantity of arrays supported with ActiveCluster?

- A. 0
- B. 1
- C. 2

Answer: C

Explanation:
FlashArray ActiveCluster is designed for synchronous replication between two FlashArray systems, enabling active-active configurations across two sites. This setup allows both arrays to serve I/O simultaneously, providing high availability and zero RPO (Recovery Point Objective). Each array in the ActiveCluster configuration maintains identical volume identities, ensuring seamless access for hosts regardless of the array they connect to. The configuration supports metro-area clustering, with a maximum round-trip latency of 11 milliseconds between arrays. Additionally, the Pure1 Cloud Mediator or an on-premises mediator is utilized to manage failover and prevent split-brain scenarios, eliminating the need for a third site or external gateway.
While ActiveCluster supports a two-site configuration, it does not support additional arrays within the same synchronous setup. For scenarios requiring protection across more than two sites, asynchronous replication solutions like ActiveDR™ can be employed. ActiveDR allows for asynchronous replication to a third site, providing broader disaster recovery capabilities.
Therefore, the maximum number of arrays supported in a single ActiveCluster configuration is two.

NEW QUESTION # 25
The customer has completed the installation document and has stated that the proxy server address is "10.24.18.120". What additional information is required?

- A. Credentials and port number
- B. Protocol prefix and credentials
- C. Protocol prefix and port number

Answer: C

Explanation:
To properly configure the proxy server, both the protocol prefix (e.g., http:// or https://) and the port number are required along with the IP address.

NEW QUESTION # 26
A data pack has been installed and the puredrive list command shows the drives in "unadmitted" status. Which command should be used to complete the admission?

- A. purearray drive admit
- B. puredrive add
- C. puredrive admit

Answer: C

Explanation:
The puredrive admit command is used to complete the admission process for drives showing as "unadmitted," integrating them fully into the FlashArray.

NEW QUESTION # 27
An Implementation Engineer is onsite to add two 4-port FC cards to a FlashArray//X20R3. In what state should the controller be in before performing the card add procedure?

- A. Primary
- B. Secondary
- C. Standby

Answer: B

Explanation:
The controller should be in the Secondary state before adding FC cards to ensure the primary controller remains operational and the procedure can be performed safely without disrupting services.

NEW QUESTION # 28
Which Purity command can be used to validate I/O is balanced across initiators?

- A. purehost list --balance
- B. purehost monitor --balance
- C. purehost iobalance --check

Answer: C

Explanation:
The purehost iobalance --check command validates whether I/O is balanced evenly across initiators, helping ensure optimal performance and distribution.

NEW QUESTION # 29
......

In the Pure Storage Certified FlashArray Implementation Specialist (FlashArray-Implementation-Specialist) Web-based Practice Test, you will get the FlashArray-Implementation-Specialist questions that are real and accurate. Furthermore, the FlashArray-Implementation-Specialist practice exam works smoothly on all operating systems including Mac, Linux, IOS, Android, and Windows. it is a browser-based Pure Storage Certified FlashArray Implementation Specialist (FlashArray-Implementation-Specialist) practice test software, there is no need for any specific software installation or additional plugins to function correctly.
