Our customers can receive questions updates for up to 1 year after purchasing the product. These free updates of questions will help them to prepare according to the latest syllabus.

## GitHub CopilotCertification Exam Sample Questions (Q63-Q68):

**NEW QUESTION # 63**
What method can be used to interact with GitHub Copilot?

- A. From a watch window in an IDE debug session
- B. By using chat capabilities in NeoVim
- C. By using a properly configured GitHub CLI
- D. From a web browser at https://github.copilot.com

**Answer: B**

Explanation:
GitHub Copilot is an AI-powered code completion tool that integrates directly into supported Integrated Development Environments (IDEs) and code editors, such as Visual Studio Code, JetBrains IDEs, NeoVim, and others. Developers interact with it through their coding environment, where it provides real-time code suggestions, autocompletions, and (in some cases) chat-like capabilities via extensions or plugins (e.g., GitHub Copilot Chat in supported editors).
Evaluation of Options:
* A. By using a properly configured GitHub CLIThe GitHub CLI (Command Line Interface) is a tool for interacting with GitHub repositories and workflows from the terminal, but it is not a method for interacting with GitHub Copilot. Copilot operates within code editors/IDEs, not through the CLI.
Incorrect.
* B. By using chat capabilities in NeoVimThis is partially correct. GitHub Copilot can be used in NeoVim with the appropriate plugin (e.g., the Copilot.vim plugin), and GitHub Copilot Chat-a feature that allowsconversational interaction-may also be available depending on the setup and version.
However, "chat capabilities in NeoVim" alone is not the primary or standard way to describe Copilot interaction, as it's more about code suggestions than chat. This is the closest option but not perfectly precise.Partially correct.
* C. From a watch window in an IDE debug sessionThe "watch window" in an IDE is used during debugging to monitor variable values, not to interact with GitHub Copilot. Copilot provides suggestions while coding, not specifically in debug sessions or watch windows.Incorrect.
* D. From a web browser athttps://github.copilot.comThere is no such URL as "https://github.copilot.
com" dedicated to interacting with GitHub Copilot. Copilot is accessed via GitHub's authentication and integrated into editors/IDEs, not through a standalone web browser interface. Information about Copilot is available on GitHub's official site (e.g.,https://github.com/features/copilot), but interaction happens in the coding environment.Incorrect.

**NEW QUESTION # 64**
Which of the following prompts can be used to guide GitHub Copilot Chat in refactoring code for quality improvements? (Each correct answer presents part of the solution. Choose two.)

- A. "Refactor my application to meet the latest coding standards."
- B. "Suggest ways to enhance the maintainability of this code segment."
- C. "Predict future coding trends and update my codebase accordingly."
- D. "Show me how to improve the readability of this function."

**Answer: B,D**

Explanation:
Effective prompts for refactoring include requests that focus on specific quality improvements, such as readability and maintainability. These prompts guide GitHub Copilot to provide relevant and actionable suggestions.

**NEW QUESTION # 65**
What GitHub Copilot pricing plan gives you access to your company's knowledge bases?

- A. GitHub Copilot Business
- B. GitHub Copilot Professional
- C. GitHub Copilot Enterprise
- D. GitHub Copilot Individual

**Answer: C**

Explanation:

GitHub Copilot Enterprise provides access to your company's knowledge bases, enabling the tool to provide contextually relevant suggestions based on your organization's specific documentation and code.

**NEW QUESTION # 66**
How does the /tests slash command assist developers?

- A. Executes test cases to find issues with the code.
- B. Constructs detailed test documentation.
- C. Creates unit tests for the selected code.
- D. Integrates with external testing frameworks.

**Answer: C**

Explanation:
The /tests slash command in GitHub Copilot Chat creates unit tests for the selected code, helping developers ensure the functionality and reliability of their code.

**NEW QUESTION # 67**
1.
blog.yatricloud.com
blog.yatricloud.com

- A. The API can refactor your code to improve productivity.
- B. The API can provide Copilot Chat specific suggestions acceptance metrics.
- C. The API can track the acceptance rate of code suggestions accepted and used in the organization.
- D. The API can generate detailed reports on code quality improvements made by GitHub Copilot.
- E. The API can provide feedback on coding style and standards compliance.

**Answer: B,C**

Explanation:
The GitHub Copilot usage metrics API provides insights into the acceptance rate of code suggestions and Copilot Chat specific suggestions acceptance metrics, helping organizations evaluate its effectiveness.

**NEW QUESTION # 68**
......
