

F5 F5CAB4 Exam | Exam F5CAB4 Vce Format - Full Refund if Failing F5CAB4: BIG-IP Administration Control Plane Administration Exam

BTW, DOWNLOAD part of Test4Cram F5CAB4 dumps from Cloud Storage: https://drive.google.com/open?id=15mOHfNdYtYjtye3QxpH1J8XPP0Db_bsK

Are you planning to appear in the BIG-IP Administration Control Plane Administration (F5CAB4) certification test and need to know where to get updated practice questions? Then you are at the right place because BIG-IP Administration Control Plane Administration (F5CAB4) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.

In addition to the F5CAB4 study materials, our company also focuses on the preparation and production of other learning materials. If you choose our F5CAB4 study materials this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our F5CAB4 Study Materials a chance to give you a chance to succeed.

Exam F5CAB4 Vce Format - 100% Pass Quiz F5 - F5CAB4 - First-grade BIG-IP Administration Control Plane Administration Certification Dumps

Our BIG-IP Administration Control Plane Administration F5CAB4 Practice Exam software is the most impressive product to learn and practice, as it is versatile in its features. Test4Cram presents its practice platform in the form of desktop practice exam software. Test4Cram offers accurate study material, trustworthy practice and latest material, and with free updates for 365 days.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which file should the BIG-IP Administrator check to determine when a Virtual Server changed its status?

- A. /var/log/audit
- B. /var/log/monitors
- C. /var/log/ltn
- D. /var/log/lastlog

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Monitoring and reporting current device status involves tracking the health of traffic objects like Virtual Servers. The Control Plane logs transition events-such as a Virtual Server moving from 'Available' (green) to 'Offline' (red) due to health monitor failures-in the /var/log/ltn file. While the audit log tracks who changed a configuration, the LTM log tracks system-initiated status changes.

NEW QUESTION # 41

An organization is performing a major release upgrade to its BIG-IP system. The system is under medium load and has enough disk space to perform the upgrade.

Which pre-upgrade task is disruptive to regular system performance and should be performed during a maintenance window? (Choose one answer)

- A. Create a QKView
- B. Generate a UCS
- C. tmsh save sys config
- D. Reactivate the license

Answer: D

Explanation:

Reactivating a BIG-IP license is a traffic-disruptive operation. During the license reactivation process, the BIG-IP system performs a configuration reload, which results in a temporary interruption of all traffic processing. Because traffic handling is affected, F5 explicitly recommends scheduling license updates during a maintenance window.

This behavior is documented in F5 Knowledge Base articles, which state that license reactivation impacts traffic and must be planned accordingly during upgrades or system changes.

The other options are not considered disruptive:

* Creating a QKView is primarily a diagnostic task and does not interrupt traffic.

* Running tmsh save sys config only saves the running configuration to disk.

* Generating a UCS is resource-intensive but does not reload configuration or interrupt traffic processing.

NEW QUESTION # 42

The BIG-IP Administrator runs the command:

```
netstat -an | grep 443
```

and sees the following output:

```
tcp 0 0 0.0.0.0:443 0.0.0.0:* LISTEN
```

What does this output indicate about the service on port 443? (Choose one answer)

- A. The service is actively listening on all interfaces for HTTPS traffic.
- B. The service is in a standby state and unable to accept connections.
- C. The service is actively listening only on the loopback interface.
- D. The service indicates no connections to the LISTEN port.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

In netstat output:

0.0.0.0:443 means the service is bound to all available IPv4 interfaces on the system.

LISTEN indicates the service is actively waiting for incoming connection requests.

Therefore, this output confirms that a service (commonly HTTPS/443, such as the BIG-IP Configuration Utility or an application listener) is actively listening on all interfaces, making B the correct answer.

Why the other options are incorrect:

A would show 127.0.0.1:443 if it were loopback-only.

C is incorrect because LISTEN explicitly indicates readiness to accept connections.

D is unrelated; standby state does not affect socket binding shown by netstat.

Hence, the correct answer is B.

NEW QUESTION # 43

Refer to the exhibit.

The BIG-IP Administrator is investigating disk utilization on the BIG-IP device. What should the BIG-IP Administrator check next? (Choose one answer)

- A. Results from the platform diagnostics test
- B. Large files on /usr file system
- C. Results from the EUD test
- D. Large files on the / file system

Answer: D

Explanation:

When troubleshooting a BIG-IP system where a partition is reported as full (100% utilization), identifying and removing large or unnecessary files is the immediate next step for restoration of system stability.

* Symptoms of Full Partitions: If a file system (such as the root / or /var) becomes full, it can result in unpredictable system behavior, failure to save configurations, and the inability to log in to the Web UI.

* The Root (/) Partition: This partition is intentionally kept small on F5 systems. It is highly sensitive to the storage of third-party software or diagnostic files that should ideally be stored in the /shared or /var directories.

* Procedural Resolution: To resolve 100% disk usage, administrators should check for large files on the affected partition using CLI commands like `du -ah` or `find / -xdev -type f -exec du {} \; | sort -rn | head -20`.

* Common Culprits: Large files typically causing these issues include old core files, tech support bundles, large diagnostic logs (packet diags), or temporary files created during administrative tasks.

* Diagnostics vs. Remediation: While tests like the EUD (End User Diagnostics) or platform diagnostics are useful for hardware verification, they do not resolve file system exhaustion issues that have already reached a critical 100% state.

NEW QUESTION # 44

A BIG-IP Administrator needs to export system configuration for migration purposes. Which file type should be used?

- A. QKView
- B. UCS
- C. SCF
- D. ISO

Answer: B

Explanation:

In F5 TMOS, a User Configuration Set (UCS) is the standard archive format used for backing up and migrating a complete system configuration.

* Composition: A UCS file contains all necessary configuration data, including system-specific files, license information, SSL certificates, private keys, and local user accounts.

* Procedural Use: When migrating to new hardware or performing an RMA replacement, the UCS file is the primary tool used to restore the entire Control Plane state to the new device.

* Restoration: It can be managed through the Configuration Utility under System > Archives or via the CLI using the `tmsh load /sys ucs` command. The correct location to restrict management access to specific subnets is D. System > Platform1.

NEW QUESTION # 45

.....

There are a lot of experts and professors in our company. All F5CAB4 study torrent of our company are designed by these excellent experts and professors in different area. We can make sure that our F5 F5CAB4 test torrent has a higher quality than other study materials. The aim of our design is to improving your learning and helping you gains your BIG-IP Administration Control Plane Administration F5CAB4 Certification in the shortest time. If you long to gain the certification, our BIG-IP Administration Control Plane Administration guide torrent will be your best choice.
