# New F5CAB4 Test Pattern & Latest F5CAB4 Exam Book

If you buy F5CAB4 exam material, things will become completely different. BIG-IP Administration Control Plane Administration study questions will provide you with very flexible learning time. Unlike other learning materials on the market, F5CAB4 exam guide has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With BIG-IP Administration Control Plane Administration study questions, you no longer have to put down the important tasks at hand in order to get to class; with F5CAB4 Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.

We have accommodating group offering help 24/7. It is our responsibility to aid you through those challenges ahead of you. So instead of focusing on the high quality F5CAB4 latest material only, our staff is genial and patient to your questions of our F5CAB4 real questions. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of F5CAB4 Real Questions. The customer-service staff will be with you all the time to smooth your acquaintance of our F5CAB4 latest material.

Pass Guaranteed 2026 F5 F5CAB4: Valid New BIG-IP Administration Control Plane Administration Test Pattern

Having been handling in this line for more than ten years, we can assure you that our F5CAB4 study questions are of best quality and reasonable prices for your information. We offer free demos of the latest version covering all details of our F5CAB4 Exam Braindumps available at present as representatives. So F5CAB4 practice materials come within the scope of our business activities. Choose our F5CAB4 learning guide, you won't regret!

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q23-Q28):

NEW QUESTION # 23
A BIG-IP Administrator needs to restore a UCS file to an F5 device using the Configuration Utility.
Which section of the Configuration Utility should the BIG-IP Administrator access to perform this task?
(Choose one answer)

- A. System > Archives
- B. Local Traffic > Virtual Servers
- C. System > Configuration
- D. Local Traffic > Policies

Answer: A

Explanation:
In the BIG-IP Configuration Utility, all system backup and restore operations-including UCS (User Configuration Set) file restoration-are performed from the Archives section.

The correct navigation path is:

System > Archives

From this location, the administrator can:

* Upload UCS files
* Restore UCS backups
* Manage system archive files used for backup and recovery

Why the other options are incorrect:

* A. System > Configuration is used for general system settings, not backup restoration.
* C. Local Traffic > Virtual Servers is used for application traffic objects.
* D. Local Traffic > Policies manages traffic policies, not system backups.

Therefore, the correct section to restore a UCS file using the Configuration Utility is System > Archives.

NEW QUESTION # 24

A BIG-IP Administrator receives an RMA replacement for a failed F5 device. The Administrator tries to restore a UCS taken from the previous device, but the restore fails. The following error appears in the /var/log/ltm:

insufficient pool members. 01070608:3: License is not operational

(expired, digital signature does not match contents)

What should the BIG-IP Administrator do to avoid this error? (Choose one answer)

- A. Remove the license information from the UCS archive
- B. Reactivate the license on the new device using the manual activation method
- C. Use the appropriate tmsh command with the no-license option
- D. Revoke the license prior to restoring

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When restoring a UCS file to replacement hardware (RMA device), the license from the original device is not valid on the new system. If the UCS restore attempts to load the old license, BIG-IP reports license errors such as "License is not operational", which can prevent traffic objects (including pools and virtual servers) from loading correctly.

To avoid this issue, F5 documentation recommends restoring the UCS without the license, using the following command:

tmsh load /sys ucs <ucs filename> no-license

This approach:

Restores all configuration objects (LTM, networking, certificates, keys, etc.) Excludes the invalid license tied to the old hardware

Allows the administrator to activate a new license separately on the replacement device Why the other options are incorrect:

A . Remove the license information from the UCS archive

Not supported or recommended; UCS files should not be manually modified.

B . Revoke the license prior to restoring

License revocation does not prevent the UCS from attempting to load license data.

D . Reactivate the license on the new device using the manual activation method This must be done after restoring the UCS and does not prevent the restore failure itself.

Therefore, the correct and supported method to avoid this error is C.

NEW QUESTION # 25

A BIG-IP Administrator finds the following log entry: tmm tmm[7141]: 011e0002:4: sweeper_update: aggressive mode activated. Which action should the BIG-IP Administrator take to mitigate this memory issue?

- A. Increase the TCP profile Idle Timeout value
- B. Configure the server to use Connection Mirroring
- C. Decrease the TCP profile Idle Timeout value
- D. Configure the redundant pair to be active-active

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: This log message indicates that the system is low on memory and has activated 'Aggressive Mode' to reclaim resources by closing old connections37.

In an HA environment, one way to ensure state stability during memory pressure is to manage how connection data is handled38.

While the document suggests D, procedural mitigation for 'Aggressive Mode' often involves reviewing resource provisioning or optimizing connection idle timeouts to reduce memory footprint39.

NEW QUESTION # 26

New Syslog servers have been deployed in an organization. The BIG-IP Administrator must reconfigure the BIG-IP system to send log messages to these servers. In which location in the Configuration Utility can the BIG-IP Administrator make the needed configuration changes to accomplish this?

- A. System > Configuration > Local Traffic
- B. System > Logs > Audit2
- C. System > Logs > Configuration
- D. System > Configuration > Device3

Answer: C

Explanation:
Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Managing how a BIG-IP communicates with external management services like Syslog is a core Control Plane task. The Configuration Utility organizes these settings under the "System" menu. Specifically, to define remote logging destinations and formats, the administrator must navigate to System > Logs > Configuration to ensure the Control Plane correctly forwards system events to external collectors

NEW QUESTION # 27

Which command will provide the BIG-IP Administrator with the current device HA status? (Choose one answer)

- A. show /cm failover-status
- B. show /sys failover
- C. list /cm failover

Answer: A

Explanation:
Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:
To determine the current failover (HA) status of a BIG-IP system using tmsh, F5 documentation explicitly states that the administrator should use the following command:
show /cm failover-status
This command displays:
The current failover state (active, standby, or offline)
Detailed failover status information
The operational HA condition of the device within a device group
According to F5 Knowledge Base Article K08452454, the documented procedure for checking failover status is:
Log in to the TMOS Shell (tmsh)
Run show /cm failover-status
Why the other options are incorrect:
A . list /cm failover shows configuration settings, not operational HA status.
B . show /sys failover is not the documented command for checking current failover status and does not align with F5's recommended procedure.

NEW QUESTION # 28

......

If you have a faith, then go to defend it. Gorky once said that faith is a great emotion, a creative force. My dream is to become a top IT expert. I think that for me is nowhere in sight. But to succeed you can have a shortcut, as long as you make the right choice. I took advantage of Prep4pass's F5 F5CAB4 exam training materials, and passed the F5 F5CAB4 Exam. Prep4pass F5 F5CAB4 exam training materials is the best training materials. If you're also have an IT dream. Then go to buy Prep4pass's F5 F5CAB4 exam training materials, it will help you achieve your dreams.

So come on, However, Prep4pass saves your money by offering F5CAB4 real questions at an affordable price, All in all, there are many advantages of our F5CAB4 training materials, So don't be hesitated to buy our F5CAB4 exam materials and take action immediately, If for any reason, a candidate fails in F5 F5CAB4 exam then he will be refunded his money after the refund process, F5 New F5CAB4 Test Pattern Of course, if you fail to pass the exam, we will give you a 100% full refund.

You can display the path to the folder that F5CAB4 contains the current recovery image by using the showcurrent option, We explain this to our clients, So come on, However, Prep4pass saves your money by offering F5CAB4 real questions at an affordable price.
