We are popular not only because our outstanding FCP\_FCT\_AD-7.4 practice dumps, but also for our well-praised after-sales service. After purchasing our FCP\_FCT\_AD-7.4 practice materials, the free updates will be sent to your mailbox for one year long if our experts make any of our FCP\_FCT\_AD-7.4 Guide materials. They are also easily understood by exam candidates. Our FCP\_FCT\_AD-7.4 actual exam can secedes you from tremendous materials with least time and quickest pace based on your own drive and practice to win.

## Fortinet FCP\_FCT\_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Zero trust and Security Fabric integration: This domain explains how to integrate EMS with the Fortinet Security Fabric, configure quarantine for compromised endpoints, and implement zero trust network access to control and secure endpoint connectivity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>FortiClient EMS design and deployment: This domain covers the architecture, core components, and deployment modes of FortiClient EMS. It also includes installing and configuring the server to ensure proper setup and initial system operation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>FortiClient provisioning and deployment: This section focuses on deploying FortiClient to endpoint devices, creating and assigning endpoint profiles, and implementing endpoint security features to enforce protection and compliance.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Troubleshooting: This section covers analyzing logs and diagnostic information to identify issues with EMS and endpoints, and resolving common deployment, connectivity, and configuration problems.</li></ul>

## New FCP\_FCT\_AD-7.4 Exam Practice - Instant FCP\_FCT\_AD-7.4 Access

As one of the most professional dealer of FCP\_FCT\_AD-7.4 practice questions, we have connection with all academic institutions in this line with proficient researchers of the knowledge related with the FCP\_FCT\_AD-7.4 exam materials to meet your tastes and needs, please feel free to choose. And we have three versions of FCP\_FCT\_AD-7.4 training guide: the PDF, Software and APP online for you. You can choose the one which you like best.

## Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q82-Q87):

### NEW QUESTION # 82

An administrator deploys a FortiClient installation through the Microsoft AD group policy After installation is complete all the custom configuration is missing

What could have caused this problem?

- A. FortiClient does not have permission to access the distribution package.
- **B. The FortiClient package is not assigned to the group**
- C. The FortiClient MST file is missing from the distribution package
- D. The FortiClient exe file is included in the distribution package

**Answer: B**

Explanation:

When deploying FortiClient via Microsoft AD Group Policy, it is essential to ensure that the deployment package is correctly assigned to the target group. The absence of custom configuration after installation can be due to several reasons, but the most likely cause is:

Deployment Package Assignment: The FortiClient package must be assigned to the appropriate group in Group Policy Management. If this step is missed, the installation may proceed, but the custom configurations will not be applied.

Thus, the administrator must ensure that the FortiClient package is correctly assigned to the group to include all custom configurations.

### NEW QUESTION # 83

Which two third-party tools can an administrator use to deploy FortiClient? (Choose two.)

- **A. B. Microsoft SCCM**
- B. QR code generator
- C. Microsoft Windows Installer
- **D. C. Microsoft Active Directory GPO**

**Answer: A,D**

Explanation:

Administrators can use several third-party tools to deploy FortiClient:

\* Microsoft SCCM (System Center Configuration Manager): SCCM is a robust tool used for deploying software across large numbers of Windows-based systems. It supports deployment of FortiClient through its software distribution capabilities.

\* Microsoft Active Directory GPO (Group Policy Object): GPOs are used to manage user and computer settings in an Active Directory environment. Administrators can deploy FortiClient to multiple machines using GPO software installation settings.

These tools provide centralized and scalable methods for deploying FortiClient across numerous endpoints in an enterprise environment.

References

\* FortiClient EMS 7.2 Study Guide, FortiClient Deployment Section

\* Fortinet Documentation on FortiClient Deployment using SCCM and GPO

### NEW QUESTION # 84

An administrator must deploy FortiClient for an organization that has BYOD and remote users.

What can the administrator use to deploy FortiClient?

- A. Microsoft Intune
- B. Group policy Object (GPO)
- **C. FortiClient zero-touch provisioning**
- D. Microsoft System Center Configuration Manager (SCCM)

**Answer: C**

Explanation:

FortiClient zero-touch provisioning is specifically designed to deploy FortiClient to BYOD and remote users without requiring manual installation or corporate device management tools.

#### NEW QUESTION # 85

An administrator has a requirement to add user authentication to the ZTNA access for remote or off-fabric users. Which FortiGate feature is required in addition to ZTNA?

- A. FortiGate certificates
- B. FortiGate endpoint control
- C. FortiGate FSSO
- **D. FortiGate explicit proxy**

**Answer: D**

Explanation:

FortiGate explicit proxy allows FortiGate to intercept web traffic for authentication purposes.

ZTNA integrates with various FortiGate features to provide secure access and ensure that users are authenticated before accessing resources.

By using an explicit proxy, FortiGate can handle web traffic and enforce authentication policies for remote users who are not directly on the corporate network (off-fabric).

#### NEW QUESTION # 86

Refer to the exhibit.

```
config user fssso
  edit "Server"
    set type fortiems
    set server "10.0.1.200"
    set password ENC ebT9fHIMXIP...WCSnG;P+Tpi/EjEdQu4hAa24LiKxHolWI7JyX
    set ssl enable
  next
end
```

Based on the CLI output from FortiGate, which statement is true?

- A. FortiGate is configured with local user group
- B. FortiGate is configured to pull user groups from AD Server.
- C. FortiGate is configured to pull user groups from FortiAuthenticator
- **D. FortiGate is configured to pull user groups from FortiClient EMS**

**Answer: D**

Explanation:

Based on the CLI output from FortiGate:

\* The configuration shows the use of "type fortiems," indicating that FortiGate is set up to interact with FortiClient EMS.

\* The "server" field points to an IP address (10.0.1.200), which is typically the address of the FortiClient EMS server.

\* The configuration includes an SSL-enabled connection, which is a common setup for secure communication between FortiGate and FortiClient EMS.

Thus, the configuration indicates that FortiGate is set up to pull user groups from FortiClient EMS.
