AACE International AACE-PSP exam sample online was produced in 2001 and popular in 2008. So far many companies built long-term cooperation with exam dumps providers. Many failure experiences tell them that purchasing a valid AACE International AACE-PSP Exam Sample Online is the best effective and money-cost methods to achieve their goal.

## AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q180-Q185):

### NEW QUESTION # 180

Each of the following accurately describes total float in a schedule EXCEPT:

- A. Computed for an activity by subtracting its early finish from its late finish, or its early start from its late start.
- B. The amount of time an activity can be delayed without delaying the overall project completion time.
- C. Can be positive or negative.
- D. The amount of time an activity can be delayed without delaying the start or occurrence of any other activity or event in the network.

**Answer: D**

### NEW QUESTION # 181

Which of the following will always describe the critical path? The path with

- A. Zero float.
- B. The shortest duration and negative float.
- C. Negative float.
- D. The longest duration through the network.

**Answer: A**

### NEW QUESTION # 182

In a graphical earned value analysis, what time-scaled value determines the reporting intervals for both schedule and cost performance?

- A. Budgeted cost of work performed
- B. Schedule performance index
- C. Budgeted cost of work scheduled
- D. Actual cost of work scheduled

**Answer: C**

Explanation:

\* Time-Scaled Value for Reporting Intervals:

BCWS (Budgeted Cost of Work Scheduled) is plotted over time to represent the planned expenditure at specific intervals. BCWS provides the basis for schedule and cost performance comparisons.

\* Evaluation of Other Options:

B: BCWP is used to track actual progress.

C: SPI is a ratio, not a time-scaled value.

D: Actual cost of work scheduled is not a standard metric in earned value analysis.

\* Verification with PSP Guidelines:

The PSP Study Guide identifies BCWS as essential for time-scaled earned value analysis (Ref: PSP Study Guide, Chapter 1D: Earned Value Analysis).

### NEW QUESTION # 183

During proofing of the product manual, a problem was discovered requiring 15 days additional time to effect a correction. How can the date of availability be maintained?

- A. Expedite printing by 5 days.
- B. Delay product release by 5 days.
- C. Delay manufacturing by 5 days.
- D. Expedite packaging by 5 days.

**Answer: A**

Explanation:

\* Situation Analysis:

Proofing of the product manual requires 15 additional days.

This impacts the Print Product Manual (Activity F), which is a critical path activity.

\* Maintaining the Availability Date:

To prevent delays in the product release (Activity H), the additional 15 days for proofing must be offset.

Reducing the printing duration (Activity F) by 5 days ensures the schedule stays on track.

Expediting other activities like manufacturing or packaging would not directly compensate for the proofing delay.

\* Cross-Verification:

Option A: Incorrect. Delaying product release impacts availability.

Option B: Incorrect. Packaging is not a direct predecessor of the product release.

Option D: Incorrect. Delaying manufacturing has no impact on proofing.

Option C: Correct. Expedites the critical path by compensating for the delay.

### NEW QUESTION # 184

Of the following update procedures, which is the least important in achieving an accurate forecast for completion of a construction schedule?

- A. Entering the time impacts of delays and change orders.
- B. Making "downstream" logic revisions as required.
- C. Estimating remaining durations of activities.
- D. The correct recording of actual start dates.

**Answer: B**

Explanation:

\* Schedule Update Procedures:

Accurate schedule updates rely on entering actual data (start/finish dates, durations) and evaluating impacts of changes.

"Downstream" logic revisions may be needed but are less critical compared to ensuring accurate historical data and reflecting immediate changes.

\* PSP Study Guide Reference:

Schedule updating emphasizes capturing accurate historical data and estimating remaining durations accurately.

\* Analysis of Options:

Option A and B: Key to progress tracking and forecasting.

Option D: Essential for reflecting impacts of delays and change orders.

Option C: While important, downstream logic revisions are less immediate compared to other procedures.

\* Conclusion: The correct answer is C, as downstream logic revisions are less critical in achieving an accurate schedule forecast compared to other updates

### NEW QUESTION # 185

.....

No one wants to own insipid life. Do you want to at the negligible position and share less wages forever? And do you want to wait to be laid off or waiting for the retirement? This life is too boring. Do not you want to make your life more interesting? It does not matter. Today, I tell you a shortcut to success. It is to pass the AACE International AACE-PSP exam. With this certification, you can live the life of the high-level white-collar. You can become a power IT professionals, and get the respect from others.

Exam4Labs will provide you with excellent AACE International AACE-PSP Exam Training materials, and allows you to achieve this dream effortlessly. Are you still hesitant? Do not hesitate, Add the Exam4Labs's AACE International AACE-PSP exam training materials to your shopping cart quickly.
