Microsoft PL-200 (Microsoft Power Platform Functional Consultant) Certification Exam is designed to validate the skills and knowledge required for individuals to become functional consultants in the Microsoft Power Platform. PL-200 exam covers various topics such as designing Power Platform solutions, creating and managing Power Apps, automating business processes with Power Automate, and analyzing data with Power BI. Passing PL-200 exam is essential for anyone who wants to prove their proficiency in using the Power Platform to solve business problems.

The Exam Details

The Microsoft PL-200 exam belongs to the associate-level role-based category of the vendor. The exams belonging to this type are 150-minute long and contain nearly 40-60 questions. PL-200 is no exception and follows the same pattern.

Since there is no fixed number of questions, one can't provide a precise passing score. However, the candidates must take note that 70% of the total score is mandatory to come up with flying colors in this test.

The exam can be taken-up in the English language and is globally available thanks to Pearson VUE as an exam proctoring system. The cost involved is \$165 per attempt. This is a standard fee that can be changed based upon the location of the test-taker. It is important to realize that the fee is payable for an exam voucher. It is neither refundable nor transferrable.

Regarding the audience, putting efforts into passing the Microsoft PL-200 Exam will be beneficial only if you are aiming at job roles like Business Analyst, Developer, and Functional Consultant. Professionals who have to deal with Microsoft Power Platform regularly can take-up this test and excel at the career front.

To prepare for the Microsoft PL-200 exam, candidates should have a good understanding of the Microsoft Power Platform and its various components. They should also be familiar with the best practices for designing, building, and deploying Power Platform applications. In addition, candidates should have experience in working with data and be able to create custom connectors and integrations between different systems.
