And as long as you study with our XK0-006 Practice Guide, you will find that the exam is just a piece of cake and the certification is easy to get. With the certification, you will find your future is much brighter.

## CompTIA Linux+ Certification Exam Sample Questions (Q61-Q66):

### NEW QUESTION # 61

An administrator must secure an account for a user who is going on extended leave. Which of the following steps should the administrator take? (Choose two).

- A. Change the user's shell to /sbin/nologin.
- B. Set the user's files to immutable.
- C. Run the command `passwd -l user`.
- D. Delete the user's /home folder.
- E. Change the date on the /home folder to that of the expected return date.
- F. Instruct the user to log in once per week.

**Answer: A,C**

Explanation:

`passwd -l user` locks the user's account by disabling the password, preventing logins.

Change the user's shell to /sbin/nologin ensures the account cannot be used for interactive logins, further securing it.

#### NEW QUESTION # 62

A systems administrator wants to review the logs from an Apache 2 `error.log` file in real time and save the information to another file for later review. Which of the following commands should the administrator use?

- A. `tail -f /var/log/apache2/error.log > logfile.txt`
- B. `tail -f /var/log/apache2/error.log | tee logfile.txt`
- C. `tail -f /var/log/apache2/error.log >> logfile.txt`
- D. `tail -f /var/log/apache2/error.log | logfile.txt`

**Answer: B**

Explanation:

Using `tee` allows output to be viewed in real time on the terminal while simultaneously writing it to `logfile.txt`. This meets both requirements: monitoring live updates and saving them for later review.

#### NEW QUESTION # 63

A Linux software developer wants to use AI to optimize source code used in a commercial product. Which of the following steps should the developer take first?

- A. Use open-source LLMs that undergo regular security reviews by the community.
- B. Verify that the company has a policy governing the use of AI in software development.
- C. Research which of the available AI chatbots are best at optimizing source code.
- D. Install a private LLM to use on the internal network for source code optimization.

**Answer: B**

Explanation:

Before using AI on commercial source code, the developer must first ensure compliance with company policies, legal requirements, and security standards. This prevents potential intellectual property, licensing, or confidentiality issues.

#### NEW QUESTION # 64

A user sends a request to access a virtual server via SSH. Which of the following commands is used to open the SSH standard port?

- A. `firewall-cmd --permanent --add-port=22/tcp`
- B. `iptables-save | grep dport-22/tcp`
- C. `iptables -A INPUT -p tcp --dport sshd -j ACCEPT`
- D. `firewall-cmd --remove-service=ssh --permanent`

**Answer: A**

Explanation:

The `firewall-cmd --permanent --add-port=22/tcp` command (commonly `firewall-cmd`) opens TCP port 22 in the permanent firewall ruleset so that SSH traffic is allowed. After running it, you'd issue `firewall-cmd --reload` to apply the change.

### NEW QUESTION # 65

A Linux user runs the following command:

```
nohup ping comptia.com &
```

Which of the following commands should the user execute to attach the process to the current terminal?

- A. renice
- B. exec
- C. jobs
- D. fg

**Answer: D**

Explanation:

The fg command brings a background job to the foreground, attaching it to the current terminal.

Since the ping process was started in the background with &, fg is the correct way to reattach it.

### NEW QUESTION # 66

.....

Contending for the success fruit of XK0-006 practice exam, many customers have been figuring out the effective ways to pass it. Due to the shortage of useful practice materials or being scanty for them, we listed these traits of our XK0-006 practice materials. Actually, some practice materials are shooting the breeze about their effectiveness, but our XK0-006 practice materials are real high quality XK0-006 practice materials with passing rate up to 98 to 100 percent.
