Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q169-Q174):

NEW QUESTION # 169

You are creating a custom trainable classifier to Identify organizational product codes referenced in Microsoft 365 content. You identify 300 files to use as seed content When? should you store the seed content?

- A. a Microsoft SharePoint Online folder
- B. a Microsoft Exchange Online shared mailbox
- C. an Azure file share
- D. a Microsoft OneDrive folder

Answer: A

Explanation:

For creating a custom trainable classifier, seed content must be stored in a Microsoft 365 content location that Purview can crawl for training-SharePoint Online (or Exchange mailboxes). OneDrive, Azure Files, or other locations are not supported for training seed

sets.

Reference: Microsoft Learn - Trainable classifiers in Microsoft Purview # seed content is uploaded to SharePoint Online or Exchange Online.

Topic 1, Contoso, Ltd Case Study 1

Instructions

This is a case study. Case studies are not timed separately from other exam sections. You can use as much exam time as you would like to complete each case study. However, there might be additional case studies or other exam sections. Manage your time to ensure that you can complete all the exam sections in the time provided. Pay attention to the Exam Progress at the top of the screen so you have sufficient time to complete any exam sections that follow this case study.

To answer the case study questions, you will need to reference information that is provided in the case. Case studies and associated questions might contain exhibits or other resources that provide more information about the scenario described in the case.

Information provided in an individual question does not apply to the other questions in the case study.

A Review Screen will appear at the end of this case study. From the Review Screen, you can review and change your answers before you move to the next exam section. After you leave this case study, you will NOT be able to return to it.

To start the case study

To display the first question in this case study, select the "Next" button. To the left of the question, a menu provides links to information such as business requirements, the existing environment, and problem statements. Please read through all this information before answering any questions. When you are ready to answer a question, select the "Question" button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, Boston, and Johannesburg.

Existing Environment

Microsoft 365 Environment

Contoso has a Microsoft 365 E5 tenant. The tenant contains the administrative user accounts shown in the following table.

Users store data in the following locations:

SharePoint sites

OneDrive accounts

Exchange email

Exchange public folders

Teams chats

Teams channel messages

When users in the research department create documents, they must add a 10-digit project code to each document. Project codes that start with the digits 999 are confidential.

SharePoint Online Environment

Contoso has four Microsoft SharePoint Online sites named Site1, Site2, Site3, and Site4.

Site2 contains the files shown in the following table.

Two users named User1 and User2 are assigned roles for Site2 as shown in the following table.

Site3 stores documents related to the company's projects. The documents are organized in a folder hierarchy based on the project.

Site4 has the following two retention policies applied:

Name: Site4RetentionPolicy1

Locations to apply the policy: Site4

Delete items older than: 2 years

Delete content based on: When items were created

Name: Site4RetentionPolicy2

Locations to apply the policy: Site4

Retain items for a specific period: 4 years

Start the retention period based on: When items were created

At the end of the retention period: Do nothing

Problem Statements

Management at Contoso is concerned about data leaks. On several occasions, confidential research department documents were leaked.

Requirements

Planned Changes

Contoso plans to create the following data loss prevention (DLP) policy:

Name: DLPpolicy1

Locations to apply the policy: Site2

Conditions:

Content contains any of these sensitive info types: SWIFT Code

Instance count: 2 to any

Actions: Restrict access to the content
Technical Requirements
Contoso must meet the following technical requirements:
All administrative users must be able to review DLP reports.
Whenever possible, the principle of least privilege must be used.
For all users, all Microsoft 365 data must be retained for at least one year.
Confidential documents must be detected and protected by using Microsoft 365.
Site1 documents that include credit card numbers must be labeled automatically.
All administrative users must be able to create Microsoft 365 sensitivity labels.
After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

NEW QUESTION # 170

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

The subscription contains the resources shown in the following table.

You create a sensitivity label named Labell.

You need to publish Labell and have the label apply automatically.

To what can you publish Labell, and to what can Labell be auto-applied? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

*All administrative users must be able to create Microsoft 365 sensitivity labels.

*After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

NEW QUESTION # 171

You have a Microsoft 365 E5 tenant.

You create a data loss prevention (DLP) policy.

You need to ensure that the policy protects documents in Microsoft Teams chat sessions.

Which location should you enable in the policy?

- A. Teams chat and channel messages
- B. Exchange email
- C. OneDrive accounts
- D. SharePoint sites

Answer: C

NEW QUESTION # 172

You have a Microsoft 365 E5 tenant.

You need to add a new keyword dictionary.

What should you create?

- A. a sensitive info type
- B. a trainable classifier
- C. a retention policy
- D. a sensitivity label

Answer: A

Explanation:

Connect to the Microsoft Purview compliance portal.

Navigate to Classifications > Sensitive info types.

Select Create and enter a Name and Description for your sensitive info type, then select Next.

<https://learn.microsoft.com/en-us/microsoft-365/compliance/create-a-keyword-dictionary?view=o365-worldwide>

NEW QUESTION # 173

HOTSPOT

How many files in Site2 can User1 and User2 access after you turn on DLPpolicy1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

□ Understanding DLP Policy Impact on File Access

The DLP policy (DLPpolicy1) applies to Site2 and restricts access when:

Content contains SWIFT Codes.

Instance count is 2 or more.

File Analysis (Based on SWIFT Codes Count)

Files that remain accessible (not restricted by DLP):

File1.docx (Contains only 1 SWIFT Code # Below restriction threshold) User access after DLP policy is applied:

□ User1 (Site Owner):

Has higher privileges and can override DLP restrictions (through admin intervention).

Can access 2 files (File1.docx + override access to another file).

□ User2 (Site Visitor):

Has read-only access but DLP blocks access to restricted files.

Can only access 1 file (File1.docx), since all others are restricted.

NEW QUESTION # 174

.....

Dear everyone, are you still confused about the SC-401 exam test. Do you still worry about where to find the best valid Microsoft SC-401 exam cram? Please do not search with aimless.
