

C_S4PM_2504 Zertifizierungsantworten - C_S4PM_2504 Antworten

Manage your profile as SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects with C_S4PM_2504 Certificate

In today's competitive job market, SAP certifications continue to stand out as powerful credentials that validate expertise and open doors to new career opportunities. One such valuable certification is **SAP Certified Associate – SAP S/4HANA Portfolio and Project Management (C_S4PM_2504)**. If you're a project manager, consultant, or professional working with SAP S/4HANA, this certification could be your next big step.

What Is the C_S4PM_2504 Certification?

The **C_S4PM_2504** certification assesses your knowledge and skills in **SAP Portfolio and Project Management (PPM)** using the SAP S/4HANA system. It verifies that you understand both the fundamental and advanced concepts needed to manage portfolios and projects within an integrated ERP environment.

This is an **associate-level** certification, which means it's ideal for those who are:

- New to SAP PPM but have some business or project management experience.
- Experienced SAP users or consultants looking to validate their expertise.

2025 Die neuesten ZertSoft C_S4PM_2504 PDF-Versionen Prüfungsfragen und C_S4PM_2504 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1k01jN6fZojPbaukrWoO-04NEGi8GVAgh>

Die SAP C_S4PM_2504 Zertifizierung ist eine der hochwertigsten Zertifizierungen zwischen vielfältigen Prüfungen. Dieses Jahrhundert ist die hohe Entwicklungszeit der IT-Industrie. Deshalb können Sie die knappe Kandidaten in der Arbeitswelt. Und wie können wir SAP C_S4PM_2504 Prüfungen bestehen? Sie sollen die Lernhilfe zur SAP C_S4PM_2504 Zertifizierung von ZertSoft benötigen. Und es ist auch nötig, einen kürzen und leichten Weg zu finden. Und wir ZertSoft sind für Sie vorhanden. Und Wenn Sie ZertSoft auswählen, wählen Sie nämlich den Erfolg. Die C_S4PM_2504 Prüfungsfragen und Testantworten sind von ZertSoft IT-Eliten gesammelt. Und unsere Produkte sind die neuesten und hochqualitativsten.

SAP C_S4PM_2504 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• SAP S • 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S • 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.

Thema 2	• Project Management • Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.
Thema 3	• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

Die anspruchsvolle C_S4PM_2504 echte Prüfungsfragen von uns garantiert Ihre bessere Berufsaussichten!

Die Prüfungsmaterialien von SAP C_S4PM_2504 Zertifizierungsprüfung von unserem ZertSoft existieren in der Form von PDF und Stimulationssoftware, in der alle Testaufgaben und Antworten von SAP C_S4PM_2504 Zertifizierung enthalten sind. Inhalte dieser Lehrbücher sind umfassend und zuversichtlich. Hoffentlich kann ZertSoft Ihr bester Helfer bei der Vorbereitung der SAP C_S4PM_2504 Zertifizierungsprüfung werden. Falls Sie leider die C_S4PM_2504 Prüfung nicht bestehen, bitte machen Sie keine Sorge, denn wir werden alle Ihre Einkaufsgebühren bedingungslos zurückgeben.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects C_S4PM_2504 Prüfungsfragen mit Lösungen (Q31-Q36):

31. Frage

In Central Business Configuration, which tasks must you conclude prior to Confirm Scoping is Completed activity? Note: There are 3 correct answers to this question.

- A. Select Group Ledger Scenarios
- B. Assign Deployment Target
- C. Define Primary Finance Settings
- D. Select the Group Currency
- E. Select Sector, Country/Region(s), and Languages

Antwort: A,B,E

32. Frage

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone. Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- A. Create a company code.
- B. Assign a different deployment target.
- C. Rename the deployment target.
- D. Define the group currency.

Antwort: C,D

Begründung:

SAP Central Business Configuration (CBC) is used to configure organizational structures and scope items for SAP S/4HANA Cloud Public Edition. The Confirm Scoping milestone marks the completion of scoping decisions, after which certain configurations are locked.

* Option A: Rename the deployment target. Correct. Before the Confirm Scoping milestone, the deployment target can be renamed

in CBC. The SAP Central Business Configuration Guide states, "The deployment target can be renamed or adjusted prior to the Confirm Scoping milestone to align with project requirements."

* Option B: Assign a different deployment target. Incorrect. Assigning a different deployment target after one has been selected is restricted before Confirm Scoping, as it requires significant reconfiguration. The CBC Guide notes, "Once a deployment target is assigned, changing it requires administrative intervention and is not supported before scoping confirmation."

* Option C: Create a company code. Incorrect. Creating a company code is a configuration task that occurs after the Confirm Scoping milestone, as it depends on finalized scoping decisions. The SAP S

/4HANA Cloud Implementation Guide explains, "Company code creation is part of the configuration phase, post-scoping."

* Option D: Define the group currency. Correct. Defining the group currency is a preliminary task that can be completed before Confirm Scoping to establish financial settings. The CBC Guide confirms,

"Group currency can be defined early in the CBC process to support financial scoping." Extract from Official Documentation:

* SAP Central Business Configuration Guide (<https://help.sap.com>): "Tasks such as renaming the deployment target and defining the group currency are available before the Confirm Scoping milestone, allowing flexibility in initial setup."

* SAP S/4HANA Cloud Implementation Guide: "The Confirm Scoping milestone locks certain configurations, but preliminary tasks like group currency definition can be completed earlier." Additional Context:

The flexibility to rename the deployment target and define the group currency before Confirm Scoping allows project teams to refine their setup without impacting downstream configurations.

33. Frage

You have created a project-specific deliverable that is not part of the SAP Activate roadmap in SAP Cloud ALM. What must you create to manage all tasks that are related to that deliverable? Note: There are 2 correct answers to this question.

- A. A custom team
- **B. A custom deliverable**
- C. A custom release
- **D. A custom task**

Antwort: B,D

Begründung:

SAP Cloud ALM is the primary tool for managing implementation tasks and deliverables for SAP S/4HANA Cloud Public Edition projects. When a project-specific deliverable is created outside the standard SAP Activate roadmap, additional elements must be defined in SAP Cloud ALM to manage related tasks effectively.

* Option A: A custom team. Incorrect. A custom team refers to a group of project members assigned to tasks, but it is not directly related to managing tasks for a specific deliverable. The SAP Cloud ALM Documentation states, "Teams in SAP Cloud ALM are used to assign resources to tasks, not to define or manage deliverables."

* Option B: A custom task. Correct. Custom tasks are created to define specific activities related to a deliverable. The SAP Cloud ALM Implementation Guide explains, "For project-specific deliverables, custom tasks must be created in SAP Cloud ALM to outline the activities required to complete the deliverable, ensuring traceability and progress tracking."

* Option C: A custom release. Incorrect. A custom release is used to manage deployment cycles, not tasks for a specific deliverable. The SAP Cloud ALM Documentation notes, "Releases in SAP Cloud ALM are for planning and executing deployments, not for managing deliverable-specific tasks."

* Option D: A custom deliverable. Correct. A custom deliverable must be defined in SAP Cloud ALM to represent the project-specific deliverable, and tasks are then associated with it. The SAP Cloud ALM Implementation Guide confirms, "To manage a project-specific deliverable outside the SAP Activate roadmap, a custom deliverable is created in SAP Cloud ALM, with custom tasks linked to it to manage all related activities." Extract from Official Documentation:

* SAP Cloud ALM Implementation Guide (SAP Help Portal, <https://help.sap.com>): "For deliverables not part of the standard SAP Activate roadmap, a custom deliverable must be created in SAP Cloud ALM.

Custom tasks are then defined and linked to the deliverable to manage all associated activities, ensuring alignment with project objectives."

* SAP Cloud ALM Documentation (SAP Community, <https://community.sap.com>): "Custom deliverables and tasks in SAP Cloud ALM allow project teams to extend the SAP Activate roadmap, providing flexibility to manage project-specific requirements while maintaining structured task management." Additional Context:

SAP Cloud ALM's flexibility allows project teams to incorporate custom deliverables and tasks, ensuring that unique project requirements are managed within the same platform used for standard roadmap activities. This approach maintains visibility and governance over all project tasks, aligning with SAP's cloud-first project management strategy.

34. Frage

Why must you schedule product upgrade windows when implementing SAP S/4HANA Cloud Public Edition?

- A. To align with semi-annual innovation cycles
- B. To plan marketing campaigns around new releases
- C. To synchronize data between test and production instances
- D. To schedule downtime for system maintenance

Antwort: A

Begründung:

SAP S/4HANA Cloud Public Edition operates on a cloud model with regular upgrades to deliver new features and innovations, requiring scheduled upgrade windows to manage these updates effectively.

* Option A: To synchronize data between test and production instances Incorrect. Data synchronization is managed through data migration or replication processes, not upgrade windows. The SAP S/4HANA Cloud Implementation Guide states, "Upgrade windows are for applying new releases, not for data synchronization, which is handled separately."

* Option B: To align with semi-annual innovation cycles Correct. SAP S/4HANA Cloud Public Edition follows semi-annual release cycles (typically February and August), and upgrade windows are scheduled to align with these cycles. The SAP S/4HANA Cloud Upgrade Guide explains, "Product upgrade windows must be scheduled to align with SAP's semi-annual innovation cycles, ensuring customers receive the latest features and enhancements."

* Option C: To schedule downtime for system maintenance Incorrect. While upgrades may involve minimal downtime, the primary purpose is to deliver new releases, not general maintenance. The SAP S/4HANA Cloud Study Guide notes, "Upgrade windows focus on release updates, with maintenance handled through separate processes."

* Option D: To plan marketing campaigns around new releases Incorrect. Marketing campaigns are unrelated to upgrade windows, which are technical activities. The SAP S/4HANA Cloud Implementation Guide clarifies, "Upgrade windows are for technical updates, not marketing activities, which are managed by business teams." Extract from Official Documentation:

* SAP S/4HANA Cloud Upgrade Guide (SAP Help Portal, <https://help.sap.com>): "SAP S/4HANA Cloud Public Edition requires scheduled upgrade windows to align with semi-annual innovation cycles, delivering new features and ensuring continuous improvement."

* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>): "Upgrade windows are planned to coincide with SAP's semi-annual releases, enabling customers to adopt the latest innovations in SAP S/4HANA Cloud Public Edition." Additional Context:

The semi-annual innovation cycles are a cornerstone of SAP's cloud strategy, ensuring customers benefit from continuous updates without managing complex upgrade projects. Scheduling upgrade windows allows for proper testing and preparation, minimizing disruptions and maximizing value.

SAP Activate Methodology Guide: Details upgrade planning.

35. Frage

You are defining the testing strategy for your project.

What would you include in a Scope of Integration test? Note: There are 2 correct answers to this question.

- A. The procedures for data migration
- B. The functionality of end-to-end business processes
- C. The connectivity with other systems
- D. The connectivity between database and application servers

Antwort: B,C
