

# New Authorized CCDAK Exam Dumps | Pass-Sure Reliable CCDAK Exam Topics: Confluent Certified Developer for Apache Kafka Certification Examination 100% Pass

BTW, DOWNLOAD part of Itcertking CCDAK dumps from Cloud Storage: <https://drive.google.com/open?id=1SPGj3RJIfEe-Vn5nHHE-aYIIOMpgeK4->

Today is the right time to advance your career. Yes, you can do this easily. Just need to pass the CCDAK certification exam. Are you ready for this? If yes then get registered in Confluent CCDAK certification exam and start preparation with top-notch CCDAK Exam Practice questions today. These CCDAK questions are available at Itcertking with up to 1 year of free updates. Download Itcertking CCDAK exam practice material demo and check out its top features.

Confluent CCDAK certification is a globally recognized certification that validates a developer's expertise in Apache Kafka. Confluent Certified Developer for Apache Kafka Certification Examination certification exam tests the developer's knowledge and skills in building and managing Kafka-based applications. The CCDAK Certification is a valuable asset for developers who want to advance their careers in the field of big data and data engineering.

## Free PDF Confluent CCDAK Confluent Certified Developer for Apache Kafka Certification Examination First-grade Authorized Exam Dumps

Our experts have prepared Confluent Confluent Certified Developer for Apache Kafka Certification Examination dumps questions that will eliminate your chances of failing the exam. We are conscious of the fact that most of the candidates have a tight schedule which makes it tough to prepare for the Confluent Certified Developer for Apache Kafka Certification Examination exam preparation. Itcertking provides you CCDAK Exam Questions in 3 different formats to open up your study options and suit your preparation tempo.

## Confluent Certified Developer for Apache Kafka Certification Examination

## Sample Questions (Q148-Q153):

### NEW QUESTION # 148

Your configuration parameters for a Source connector and Connect worker are:

- \* `offset.flush.interval.ms=60000`
- \* `offset.flush.timeout.ms=500`
- \* `offset.storage.topic=connect-offsets`
- \* `offset.storage.replication.factor=-1` Which four statements match the expected behavior?(Select four.)

- A. The offsets topic will use the broker default replication factor.
- B. The connector will wait 500ms for offset data to be committed.
- C. The connector will wait 60000ms before trying to commit offsets for tasks.
- D. The connector will commit offsets to a topic called connect-offsets.

**Answer: A,B,C,D**

Explanation:

Each of these settings plays a key role in Kafka Connect offset management:

- \* `offset.flush.interval.ms=60000` # Offset commits happen every 60 seconds.
- \* `offset.flush.timeout.ms=500` # The flush operation times out if it takes more than 500 ms.
- \* `offset.storage.topic=connect-offsets` # This is the internal topic for storing source offsets.
- \* `offset.storage.replication.factor=-1` # This uses the broker's default replication factor (commonly set via `default.replication.factor`).

From Kafka Connect Docs:

"If `offset.storage.replication.factor=-1`, the value will be determined by the broker's default replication factor." Reference: Kafka Connect Worker Configuration

### NEW QUESTION # 149

If I want to have an extremely high confidence that leaders and replicas have my data, I should use

- A. `acks=all`, `replication factor=3`, `min.insync.replicas=1`
- B. `acks=all`, `replication factor=2`, `min.insync.replicas=1`
- C. `acks=1`, `replication factor=3`, `min.insync.replicas=2`
- D. `acks=all`, `replication factor=3`, `min.insync.replicas=2`

**Answer: D**

Explanation:

`acks=all` means the leader will wait for all in-sync replicas to acknowledge the record. Also the `min in-sync replica` setting specifies the minimum number of replicas that need to be in-sync for the partition to remain available for writes.

### NEW QUESTION # 150

A consumer application runs once a week and reads from a Kafka topic. The last time the application ran, the last offset processed was 217. The application is configured with `auto.offset.reset` set to "latest". The current offsets in the topic start at 318 and end at 588.

What offset will the application start reading when it starts up for its next run?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

### NEW QUESTION # 151

Which SMTs is used to change the data type?

- A. `org.apache.kafka.connect.transforms.TimestampRouter`

- B. `io.confluent.connect.transforms.TombstoneHandler`
- C. `org.apache.kafka.connect.transforms.Cast`
- D. `org.apache.kafka.connect.transforms.Flatten`

**Answer: C**

### NEW QUESTION # 152

You have a Kafka client application that has real-time processing requirements. Which Kafka metric should you monitor?

- A. Aggregate incoming byte rate
- B. Total time to serve requests to replica followers
- C. `Consumer lag between brokers and consumers`
- D. Consumer heartbeat rate to group coordinator

**Answer: C**

Explanation:

For real-time applications, the key metric to monitor is consumer lag- the difference between the latest offset on the broker and the latest committed offset by the consumer.

From Kafka Monitoring Guide:

"Consumer lag is the most important metric for real-time applications. It tells you how far behind the consumer is from the latest data in Kafka."

\* B relates to replication, not client responsiveness.

\* C tracks group membership stability, not data delay.

\* D tracks input throughput, not processing latency.

Reference: Kafka Operations > Monitoring > Consumer Lag

### NEW QUESTION # 153

.....

The experts in our company have been focusing on the CCDAK examination for a long time and they never overlook any new knowledge. The content of our CCDAK study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our CCDAK Practice Braindumps. We will inform you by E-mail when we have a new version and send it to you right away. So as long as you buy our CCDAK learning guide, you can always have the latest exam questions and answers.
