

# Microsoft DP-700 Exam Sample Online: Implementing Data Engineering Solutions Using Microsoft Fabric - Real4dumps Sample Download Free

DOWNLOAD the newest Real4dumps DP-700 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1hPNQHauEiuoQhKV8N67FYMQUgkoVNBI>

Users can customize the time and DP-700 questions of Microsoft DP-700 practice tests according to their needs. You can give more than one test and track the progress of your previous attempts to improve your marks on the next try. These DP-700 mock tests are made for customers to note their mistakes and avoid them in the next try to pass Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) exam in a single try.

## Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Ingest and transform data:</b> This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Monitor and optimize an analytics solution:</b> This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Implement and manage an analytics solution:</b> This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li></ul>

## Evaluate Your Exam Preparation with Online Microsoft DP-700 Practice Test Engine

In contemporary society, information is very important to the development of the individual and of society DP-700 practice test. In terms of preparing for exams, we really should not be restricted to paper material, our electronic DP-700 preparation materials will surprise you with their effectiveness and usefulness. I can assure you that you will pass the DP-700 Exam as well as getting the related certification. There are so many advantages of our electronic DP-700 study guide, such as High pass rate, Fast delivery and free renewal for a year to name but a few.

### Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q77-Q82):

#### NEW QUESTION # 77

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID

Street

Neighbourhood

No\_Bikes

No\_Empty\_Docks

Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

Does this meet the goal?

- A. Yes
- B. no

**Answer: B**

Explanation:

This code does not meet the goal because this is an SQL-like query and cannot be executed in KQL, which is required for the database.

Correct code should look like:

#### NEW QUESTION # 78

You have an Azure subscription that contains a blob storage account named sa1. Sa1 contains two files named File1.csv and File2.csv.

You have a Fabric tenant that contains the items shown in the following table.

You need to configure Pipeline1 to perform the following actions:

\* At 2 PM each day, process File1.csv and load the file into fh1.

\* At 5 PM each day, process File2.csv and load the file into fh1.

The solution must minimize development effort. What should you use?

- A. a job definition
- B. a data pipeline schedule
- C. a data pipeline trigger
- D. an activator

**Answer: B**

**NEW QUESTION # 79**

You have a Fabric warehouse named DW1 that contains four staging tables named ProductCategory, ProductSubcategory, Product, and SalesOrder. ProductCategory, ProductSubcategory, and Product are used often in analytical queries.

You need to implement a star schema for DW1. The solution must minimize development effort.

Which design approach should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

**NEW QUESTION # 80**

You need to ensure that WorkspaceA can be configured for source control. Which two actions should you perform?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Configure WorkspaceA to use a Premium Per User (PPU) license
- B. From Tenant setting, set Users can sync workspace items with GitHub repositories to Enabled
- C. Assign WorkspaceA to Capl.
- D. From Tenant setting, set Users can synchronize workspace items with their Git repositories to Enabled

**Answer: C,D**

Explanation:

Topic 2, Litware, IncCase Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is a publishing company that has an online bookstore and several retail bookstores worldwide.

Litware also manages an online advertising business for the authors it represents.

Existing Environment. Fabric Environment

Litware has a Fabric workspace named Workspace1. High concurrency is enabled for Workspace1.

The company has a data engineering team that uses Python for data processing.

Existing Environment. Data Processing

The retail bookstores send sales data at the end of each business day, while the online bookstore constantly provides logs and sales data to a central enterprise resource planning (ERP) system.

Litware implements a medallion architecture by using the following three layers: bronze, silver, and gold. The sales data is ingested from the ERP system as Parquet files that land in the Files folder in a lakehouse.

Notebooks are used to transform the files in a Delta table for the bronze and silver layers. The gold layer is in a warehouse that has V-Order disabled.

Litware has image files of book covers in Azure Blob Storage. The files are loaded into the Files folder.

Existing Environment. Sales Data

Month-end sales data is processed on the first calendar day of each month. Data that is older than one month never changes.

In the source system, the sales data refreshes every six hours starting at midnight each day.

The sales data is captured in a Dataflow Gen1 dataflow. When the dataflow runs, new and historical data is captured. The dataflow captures the following fields of the source:

Sales Date  
Author  
Price  
Units  
SKU

A table named AuthorSales stores the sales data that relates to each author. The table contains a column named AuthorEmail. Authors authenticate to a guest Fabric tenant by using their email address.

Existing Environment. Security Groups

Litware has the following security groups:

Sales  
Fabric Admins  
Streaming Admins

Existing Environment. Performance Issues

Business users perform ad-hoc queries against the warehouse. The business users indicate that reports against the warehouse sometimes run for two hours and fail to load as expected. Upon further investigation, the data engineering team receives the following error message when the reports fail to load: "The SQL query failed while running." The data engineering team wants to debug the issue and find queries that cause more than one failure.

When the authors have new book releases, there is often an increase in sales activity. This increase slows the data ingestion process. The company's sales team reports that during the last month, the sales data has NOT been up-to-date when they arrive at work in the morning.

Requirements. Planned Changes

Litware recently signed a contract to receive book reviews. The provider of the reviews exposes the data in Amazon Simple Storage Service (Amazon S3) buckets.

Litware plans to manage Search Engine Optimization (SEO) for the authors. The SEO data will be streamed from a REST API.

Requirements. Version Control

Litware plans to implement a version control solution in Fabric that will use GitHub integration and follow the principle of least privilege.

Requirements. Governance Requirements

To control data platform costs, the data platform must use only Fabric services and items. Additional Azure resources must NOT be provisioned.

Requirements. Data Requirements

Litware identifies the following data requirements:

Process the SEO data in near-real-time (NRT).

Make the book reviews available in the lakehouse without making a copy of the data.

When a new book cover image arrives in the Files folder, process the image as soon as possible.

## NEW QUESTION # 81

Exhibit.

You have a Fabric workspace that contains a write-intensive warehouse named DW1. DW1 stores staging tables that are used to load a dimensional model. The tables are often read once, dropped, and then recreated to process new data.

You need to minimize the load time of DW1.

What should you do?

- A. Disable V-Order.
- B. Drop statistics.
- C. Enable V-O-der.
- D. Create statistics.

**Answer: A**

## NEW QUESTION # 82

.....

The Microsoft DP-700 PDF format is printable which enables you to do paper study. It contains pool of actual and updated Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) exam questions. You can carry this portable file of Microsoft DP-700 Real Questions to any place via smartphones, laptops, and tablets. This simple and convenient format of

Real4dumps's Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) practice material is being updated regularly.
