SC-900教育資料 & SC-900資格認定試験

市場の一般的な質問バンクとは異なり、JpexamのSC-900の実際の試験は、多くの業界専門家によって認められているさまざまな専門知識のための科学的かつ効率的な学習システムです。MicrosoftのSC-900試験トレントの内容だけでなく、最新かつ正確な情報をお客様に提供するため、レイアウトについてもデジタルデバイスの開発に応じて改革を実施しました。最新のSC-900試験問題とともにMicrosoft Security, Compliance, and Identity Fundamentals試験に合格します。

Microsoft Security, Compliance, and Identity Fundamentals 認定 SC-900 試験問題 (Q178-Q183):

質問 # 178

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Global administrators are exempt from conditional access policies	☐	☐
A conditional access policy can add users to Azure Active Directory (Azure AD) roles	☐	☐
Conditional access policies can force the use of multi-factor authentication (MFA) to access cloud apps	☐	☐

正解:

解説:

Statements	Yes	No
Global administrators are exempt from conditional access policies	☐	☒
A conditional access policy can add users to Azure Active Directory (Azure AD) roles	☐	☒
Conditional access policies can force the use of multi-factor authentication (MFA) to access cloud apps	☒	☐

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-admin-mfa>

質問 # 179

You are evaluating the compliance score in Microsoft Purview Compliance Manager.

Match the compliance score action subcategories to the appropriate actions.

To answer, drag the appropriate action subcategory from the column on the left to its action on the right. Each action subcategory may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Action Subcategories

Corrective

Detective

Preventative

Answer Area

Encrypt data at rest.

Perform a system access audit.

Make configuration changes in response to a security incident.

Microsoft

正解:

解説:

Action Subcategories

Corrective

Detective

Preventative

Answer Area

Preventative Encrypt data at rest.

Detective Perform a system access audit.

Corrective Make configuration changes in response to a security incident.

Microsoft

Action Subcategories

Corrective

Detective

Preventative

Answer Area

Preventative Encrypt data at rest.

Detective Perform a system access audit.

Corrective Make configuration changes in response to a security incident.

Microsoft

質問 # 180

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Entra ID is an identity provider used for authentication and authorization.

an extended detection and response (XDR) system

an identity provider

a management group

a security information and event management (SIEM) system

Microsoft

正解:

Answer Area

Microsoft Entra ID is an identity provider used for authentication and authorization.

an extended detection and response (XDR) system

an identity provider

a management group

a security information and event management (SIEM) system

Microsoft

Answer Area

Microsoft Entra ID is an identity provider used for authentication and authorization.

Microsoft

質問 # 181

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can create one Azure Bastion per virtual network.	☐	☐
Azure Bastion provides secure user connections by using RDP.	☐	☐
Azure Bastion provides a secure connection to an Azure virtual machine by using the Azure portal.	☐	☐

正解:

解説:

Statements	Yes	No
You can create one Azure Bastion per virtual network.	☒	☐
Azure Bastion provides secure user connections by using RDP.	☒	☐
Azure Bastion provides a secure connection to an Azure virtual machine by using the Azure portal.	☒	☐

Explanation:

Statements	Yes	No
You can create one Azure Bastion per virtual network.	☒	☐
Azure Bastion provides secure user connections by using RDP.	☒	☐
Azure Bastion provides a secure connection to an Azure virtual machine by using the Azure portal.	☒	☐

Microsoft documents describe Azure Bastion as a managed PaaS jump-host that's deployed inside a virtual network to provide secure remote access: "Azure Bastion is deployed in your virtual network and provides seamless RDP and SSH connectivity to your virtual machines directly in the Azure portal over SSL." The platform design is per-VNet, with the limit stated as: "One Bastion host can be deployed per virtual network," ensuring a single managed entry point for that network. Connectivity is delivered using the native protocols while avoiding public exposure: "Bastion enables RDP and SSH sessions... without requiring a public IP on your virtual machines, using TLS (port 443)." Access is brokered through the web experience: "You connect to the VM directly from the Azure portal using your browser," which provides an HTML5 client for RDP /SSH. These statements collectively validate that (1) deployment is one Bastion per VNet, (2) it provides secure user connections by using RDP (and SSH), and (3) it provides a secure connection to an Azure VM via the Azure portal, aligning with Zero Trust principles by eliminating inbound RDP/SSH exposure on public IPs.

質問 # 182

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
