NEW QUESTION # 375

You have a Power BI report that contains three pages. The pages are used to analyze sales across various countries.

You add a slicer named Country to each page of the report.

You need to configure the report to meet the following requirements:

- * When a user selects a country on the first page, the report must filter the other pages.

- * The second and third pages must display only the filtered results.

Which task should you perform for each requirement? To answer, drag the appropriate task to the correct requirement. Each task may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Ther

NOTE Each correct selection is worth one point.

Tasks

Add the Country field to the filters on all the pages

Configure the Country slicer to sync across all the pages

Configure the Country slicer to sync only on the second and third pages

Hide the Country slicer on the second and third pages

Answer Area

When a user selects a country on the first page, the report must filter the other pages:

The second and third pages must display only the filtered results:
