Arch-303 Latest Braindumps Ppt - Reliable Arch-303 Test Tutorial

Learning our Arch-303 study materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues. Just come to our website and pick the Arch-303 training engine. And you will become the best with our Arch-303 learning questions.

Salesforce Certified B2C Commerce Architect Sample Questions (Q18-Q23):

NEW QUESTION # 18
Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.
Which three tools have such a feature and do not require to be monitored manually?
Choose 3 answers

- A. Custom Log Settings

- B. Quota Status
- C. Job Schedules
- D. Pipeline Profiler
- E. Analytics Conversion Reports

Answer: B,C,D

Explanation:
The Salesforce B2C Commerce Business Manager tools that feature automatic notifications are:
* Option A (Job Schedules): Business Manager can send notifications based on job schedules, alerting users when a scheduled job has completed, failed, or met specific conditions. This feature helps in monitoring automated processes without manual oversight.
* Option D (Pipeline Profiler): This tool provides automatic notifications regarding the performance of different pipelines, allowing architects and developers to monitor site performance and troubleshoot issues proactively.
* Option E (Quota Status): Automatically notifies administrators when certain quotas are reached or exceeded, such as API call limits or data storage limits, which is crucial for maintaining site stability and performance.
These tools are essential for proactive site management, ensuring that administrators can address potential issues before they affect the site's operation.

NEW QUESTION # 19
A new project for a Client will involve a few different Integrations to their middleware system resulting in four different web services. All will use the same credentials to the middleware. Each will have the same timeout, but will require a separate log file prefix.
How should the Architect set this up with the Service framework using a minimal set of configuration?

- A. Four Service Configurations. Four Service Profiles, One Service Credential
- B. One Service Configuration, Four Service Profiles, One Service Credential.
- C. Four Service Configurations. One Service Profile, One Service Credential.
- D. Four Service Configurations. Four Service Profiles, Four Service Credentials

Answer: C

Explanation:
For setting up multiple integrations that require the same credentials and timeout settings but need separate log file prefixes:
* Four Service Configurations are needed to specify the unique endpoint and other specifics for each of the four web services.
* One Service Profile can be used for all these configurations because they share the same timeout and other settings, optimizing the configuration process.
* One Service Credential is sufficient since all services authenticate with the same credentials, simplifying credential management and security handling.
This setup reduces redundancy and complexity in the service framework, ensuring a streamlined and efficient integration process while meeting all specified requirements.

NEW QUESTION # 20
a B2C Commerce developer has Implemented a job that connects to an SFTP, loops through a specific number of .csv rtes. and Generates a generic mapping for every file. In order to keep track of the mappingsimported, if a generic mapping is created successfully, a custom object instance w created with the .
csv file name. After running the job in the Development instance, the developer checks the Custom Objects m Business Manager and notices there Isn't a CustomObject for each csv file that was on SFTP.
What are two possible reasons that some generic mappings were not created? Choose 2 answers

- A. The generic mappings definition need to be replicated fromStaging before running the job.
- B. Invalid format in one or more of the .csv files.
- C. The maximum number of generic mappings was reached.
- D. The job needs to run on Staging and then replicate the generic mappings and custom objects on Development

Answer: B,C

Explanation:
Two plausible reasons for some generic mappings not being created despite the SFTP job running are: A) the system reached its limit for the maximum number of generic mappings allowed, and C) there was an invalid format in one or more of the .csv files processed. When the maximum threshold for mappings is reached, the system cannot create additional mappings, thus stopping any

further imports from being registered as custom objects. Additionally, if .csv files are incorrectly formatted, the job would fail to create mappings for those files, leading to the absence of corresponding custom objects in Business Manager. It's crucial to ensure that file formats adhere to expected specifications and that system limits are adequately managed to avoid such issues.

NEW QUESTION # 21

During implementation, the team found that there is a notification controller exposed for an external service that marks the order as paid when notification is received. The notification URL is sent to the service together with the payment request and contains only the URL with orderlD as the parameter.

What should the Architect recommend to the team in order to prevent the unauthorized usage of the controller to mark the orders as paid?

- A. Add a customer number in the callback URL and match the customer number against the one stored on the order.
- B. Add a session attribute and validate it on the callback.
- C. Add HTTPS restriction to the controller start node.
- D. Add an order token in the callback URL and match the token against the one stored on the order.

Answer: D

Explanation:
To enhance the security of the notification controller exposed for marking orders as paid, the recommended approach is to add an order-specific token to the callback URL (Answer C). This token should be verified against a stored value on the order to ensure the authenticity and integrity of the payment notification. This method prevents unauthorized use of the controller, as only callbacks containing the correct, order-specific token would be allowed to mark orders as paid. This strategy is essential in maintaining secure and reliable transaction processes within Salesforce B2C Commerce.

NEW QUESTION # 22

A developer is remotely fetching the reviews for a product.
Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- A. Use custom cache
- B. Cached remote include with cache of the HTTP service
- C. Remote include with caching only the reviews
- D. Cache the HTTP service request

Answer: B

Explanation:
For efficient caching of HTTP GET requests used to fetch product reviews, the best practice is to use a cached remote include combined with caching of the HTTP service itself (Answer D). This method involves caching the output of the remote service call at the service layer and reusing it for subsequent requests. This approach minimizes the number of calls to the remote service, reduces load times, and ensures that the displayed reviews are up-to-date as per the cache's freshness settings. It optimally balances the performance benefits of caching with the need to keep content like reviews current.

NEW QUESTION # 23

......

They work together and strive hard to design and maintain the top standard of Salesforce Arch-303 exam questions. So you rest assured that the Arch-303 exam questions you will not only ace your Salesforce Certified B2C Commerce Architect certification exam preparation but also be ready to perform well in the final Arch-303 Certification Exam. The Arch-303 exam are the real Arch-303 exam practice questions that will surely repeat in the upcoming Salesforce Certified B2C Commerce Architect (Arch-303) exam and you can easily pass the exam.

Arch-303 Latest Braindumps Ppt: https://www.pass4training.com/Arch-303-pass-exam-training.html

Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real Arch-303 guide materials, By giving you the knowledge you need to ace the Arch-303 exam in one sitting, our Arch-303 exam dumps help you make the most of the time you spend preparing for the test, When you attend Salesforce Arch-303 exam, it is easy for you to keep

good mood and control your finishing time.

All of these findings are interesting, but what Arch-303 good are they in an environment where most of what we do seems to be out of obligation, This is all part of the broader shift to an Arch-303 Latest Braindumps Ppt experience economy that we believe will continue to gain strength over the next decade.

Arch-303 new questions & Arch-303 dumps VCE & Arch-303 dump collection

Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real Arch-303 Guide materials, By giving you the knowledge you need to ace the Arch-303 exam in one sitting, our Arch-303 exam dumps help you make the most of the time you spend preparing for the test.

When you attend Salesforce Arch-303 exam, it is easy for you to keep good mood and control your finishing time, If I just said, you may be not believe that, Our Arch-303 study guide can help you improve in the shortest time.
