

# Reliable 2V0-16.25 Test Labs, New 2V0-16.25 Dumps Sheet

What's more, part of that SureTorrent 2V0-16.25 dumps now are free: [https://drive.google.com/open?id=1\\_0ajUK7lrJtdRiUUVi5ycg22\\_-jF4nas](https://drive.google.com/open?id=1_0ajUK7lrJtdRiUUVi5ycg22_-jF4nas)

SureTorrent has been devoted itself to provide all candidates who are preparing for IT certification exam with the best and the most trusted reference materials in years. With regards to the questions of IT certification test, SureTorrent has a wealth of experience. SureTorrent has helped numerous candidates and got their reliance and praise. So, don't doubt the quality of SureTorrent VMware 2V0-16.25 Dumps. It is high quality dumps helping you 100% pass 2V0-16.25 certification test. SureTorrent promises 100% FULL REFUND, if you fail the exam. With this guarantee, you don't need to hesitate whether to buy the dumps or not. Missing it is your losses.

All questions on our 2V0-16.25 exam questions are strictly in accordance with the knowledge points on newest test syllabus. Also, our experts are capable of predicating the difficult knowledge parts of the 2V0-16.25 exam according to the test syllabus. We have tried our best to simply the difficult questions of our 2V0-16.25 Practice Engine to be understood by the customers all over the world. No matter the students, office staffs, even someone who know nothing about this subject can totally study it without difficulty.

## 2V0-16.25 Exam Questions and VMware vSphere Foundation 9.0 Administrator Torrent Prep - 2V0-16.25 Test Guide

They work closely and check all VMware 2V0-16.25 exam practice test questions step by step and ensure the top standard of 2V0-16.25 exam questions all the time. So rest assured that with the 2V0-16.25 exam dumps you will get everything that you need to prepare and pass the VMware 2V0-16.25 Certification Exam with good scores. Countless VMware vSphere Foundation 9.0 Administrator exam candidates have passed their 2V0-16.25 exam and they all got help from real and updated VMware 2V0-16.25 exam questions. You can also be the next successful candidate for the 2V0-16.25 certification exam.

## VMware vSphere Foundation 9.0 Administrator Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- **A. VCF Operations for Logs**
- B. Fleet Manager
- C. VCF Operations
- D. VCF Operations for Networks

**Answer: A**

Explanation:

After deploying vSphere Foundation, to centralize log collection and analysis, you must add:

\* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting

Other options:

\* B. VCF Operations# Focuses on performance/capacity, not log collection.

\* C. VCF Operations for Networks# Focuses on networking insights.

\* D. Fleet Manager# Used for multi-instance management, not logging.

References:

VMware Cloud Foundation 9.0 -Extending VCF with Logs

VMware Docs: vRealize Log Insight Deployment

### NEW QUESTION # 22

An administrator creates a cluster by joining a Medium sized VMware Cloud Foundation (VCF) Operations for Logs node to an existing Medium sized single-node deployment.

The secondary node of the cluster fails, degrading the functionality of VCF Operations for Logs.

What action should the administrator take to create a healthy active cluster?

- A. Scale up the VCF Operations for Logs primary and secondary node to size Large.
- B. Scale up the VCF Operations for Logs primary and secondary node to size Extra Large.
- **C. Rebuild the VCF Operations for Logs cluster secondary node and place the cluster back into operation.**
- D. Rebuild the VCF Operations for Logs cluster secondary node and add an additional node to the cluster.

**Answer: C**

Explanation:

In VMware Cloud Foundation (VCF) Operations for Logs, clusters require a minimum of three healthy nodes to function in a fully active and resilient state. When a cluster is deployed with only two nodes (primary + one secondary), the environment does not meet the minimum recommended requirement. If the secondary node fails, the cluster becomes degraded and functionality is reduced.

The correct remediation is:

\* Rebuild the failed secondary nodes so that the cluster can return to a healthy state.

\* After rebuilding, the node must be rejoined to the primary using the Management # Cluster workflow (secure token, IP/hostname of primary, etc.).

Why not the other options?

\* A. Scale up to Extra Large## Scaling up affects resource capacity (vCPU, RAM, disk) but does not solve the problem of missing nodes.

\* B. Scale up to Large## Same reason as above, scaling up does not restore HA.

\* D. Rebuild the secondary and add an additional node## While adding more nodes is a best practice (since HA clusters require three nodes), the minimum action required to restore a healthy active cluster is to rebuild the failed node. Adding more nodes is optional for increased resiliency.

Therefore, the immediate and verified answer is to rebuild the failed secondary node.

Foundation 9.0.2 Documentation -Joining and Rebuilding Worker Nodes in a Logs Cluster VMware Cloud Foundation 9.0.1

Documentation -High Availability VCF Operations for Logs requires minimum of three nodes (1 primary, 2 workers)

### NEW QUESTION # 23

Which action allows a Content Library in VMware vSphere Foundation (VVF) to be accessed by other VMware vCenter Server

instances?

- A. Store the library on a vSAN datastore.
- B. Store the library on a shared NFS datastore.
- C. Enable automatic synchronization.
- **D. Publish the Content Library.**

**Answer: D**

Explanation:

To allow a Content Library in vSphere Foundation to be accessed by other vCenter Server instances, it must be published.

\* Once published, other vCenters can subscribe to the library.

\* Synchronization ensures subscribed vCenters receive updated templates and ISOs.

Other options:

\* A. Automatic synchronization# Works only for subscribers, not for publishing.

\* B. Store on vSAN datastore# Storage choice does not enable multi-vCenter access.

\* C. Store on NFS datastore# Similar, datastore type does not matter.

### NEW QUESTION # 24

The operations team is tasked with the preparation of a weekly health status overview of a VMware vSphere Foundation (VVF) environment to senior management with the following requirements:

\* It should be sent every Monday morning.

\* It must include KPIs related to cluster health, storage usage, and virtual machine (VM) growth trends.

\* Operational overhead should be minimized.

Which two actions must the administrator perform to satisfy these requirements? (Choose two.)

- A. Export the desired metrics from the Metrics Explorer to CSV.
- B. Export the built-in Cluster Summary report via FTP.
- **C. Create a custom View with the KPIs and add it to a new Report Template.**
- **D. Configure the scheduler to send the report via e-mail weekly.**
- E. Create a custom dashboard with the required KPIs.

**Answer: C,D**

Explanation:

VMware vSphere Foundation (VVF) integrates VMware Aria Operations (vRealize Operations) for intelligent operations management, enabling automated reporting to minimize operational overhead. To meet the requirements for a weekly health status overview including cluster health, storage usage, and VM growth trends, an administrator must first create a custom View in Aria Operations to define the specific KPIs (e.g., cluster availability, datastore capacity, and VM count trends over time). This View is then added to a new Report Template, which compiles the data into a structured report format like PDF or CSV. Next, the scheduler in Aria Operations is configured to generate and email the report every Monday morning, ensuring delivery without manual intervention. This approach leverages built-in automation for recurring tasks, reducing effort compared to ad-hoc exports or manual configurations.

Other options do not fully satisfy the requirements: Option A creates a dashboard for interactive visualization but not a scheduled report; Option C uses a built-in report with limited customization and no direct FTP export or scheduling; Option E involves manual CSV exports from Metrics Explorer, increasing overhead and lacking automation.

### NEW QUESTION # 25

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- **A. Trend**
- B. Text
- C. Table
- D. Distribution

**Answer: A**

Explanation:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

- \* Trend view displays data over time, showing both past and predicted future behavior.
- \* This makes them ideal for capacity planning, performance forecasting, and demand analysis.
- \* Table (A) # Shows raw values but lacks predictive visualization.
- \* Distribution (B) # Useful for comparing values across objects but not for time-based or forecasted trends.
- \* Text (C) # Displays static values or metrics, not historical/forecasting data.
