Esri EAEP2201 Dumps For Quick Exam Preparation 2026
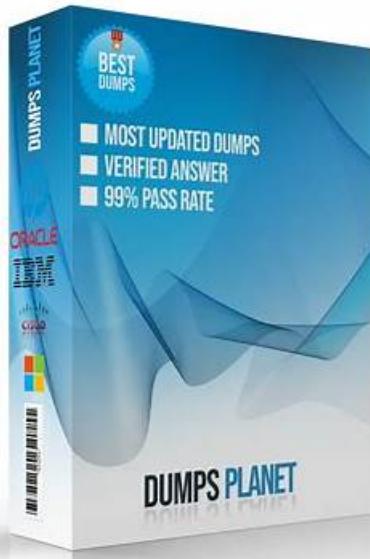

Due to busy routines, applicants of the Enterprise Administration Professional 2201 (EAEP2201) exam need real Esri exam questions. When they don't study with updated Esri EAEP2201 practice test questions, they fail and lose money. If you want to save your resources, choose updated and actual EAEP2201 Exam Questions of Itcertmaster. At the Itcertmaster offer students Esri EAEP2201 practice test questions, and 24/7 support to ensure they do comprehensive preparation for the EAEP2201 exam.

Esri EAEP2201 (Enterprise Administration Professional 2201) Exam is a certification that validates the skills and knowledge of individuals in administering and managing ArcGIS Enterprise systems. Enterprise Administration Professional 2201 certification is designed for professionals who are responsible for the deployment, configuration, and maintenance of ArcGIS Enterprise systems in an organization. EAEP2201 exam covers topics such as installation, configuration, security, and performance tuning of ArcGIS Enterprise components.

Passing the Esri EAEP2201 Exam is a significant achievement that demonstrates a candidate's expertise in managing ArcGIS Enterprise deployments. It is a valuable certification for GIS professionals who wish to advance their careers and take on more challenging roles. Certified professionals can also differentiate themselves in the job market and increase their earning potential. Enterprise Administration Professional 2201 certification is valid for two years, after which candidates must pass a renewal exam to maintain their certification.

Exam EAEP2201 VCE

One advantage is that if you use our EAEP2201 practice questions for the first time in a network environment, then the next time you use our study materials, there will be no network requirements. You can open the EAEP2201 real exam anytime and anywhere. It means that it can support offline practicing. And our EAEP2201 learning braindumps are easy to understand for the questions and answers are carefully compiled by the professionals.

Esri Enterprise Administration Professional 2201 Sample Questions (Q45-Q50):

NEW QUESTION # 45

Some members of an ArcGIS Enterprise organization are unable to create web maps and web scenes. The users are only responsible for creating stories with ArcGIS StoryMaps.

What should the GIS administrator do to prevent confusion about non-accessible functionality to those users?

- A. Configure a maintenance notification to explain the access limitation in Portal for ArcGIS
- B. Configure the ArcGIS Enterprise home page to show only items that are accessible to the signed-in user
- C. Configure Page visibility settings to remove web maps and web scenes from the navigation bar

Answer: B

Explanation:

To prevent confusion among users who do not have access to certain functionalities, such as creating web maps and web scenes, the GIS administrator should configure the ArcGIS Enterprise home page to display only the items and tools that are accessible to the signed-in user. This customization ensures that users see a tailored interface that aligns with their permissions and responsibilities, reducing the likelihood of encountering inaccessible options.

Configuring a maintenance notification (Option A) is more appropriate for temporary service outages or updates, not for managing user interface elements. Adjusting Pagevisibility settings (Option B) affects the visibility of entire pages but does not provide the granular control needed to tailor the home page based on user roles and permissions.

Reference Source:ArcGIS Enterprise documentation on customizing the home page and user experience

NEW QUESTION # 46

An organization has a requirement to geocode crime incidents from a CSV uploaded to the ArcGIS Enterprise portal. How should the organization configure their ArcGIS Server site to meet this requirement?

- A. With a registered geodatabase
- B. As an ArcGIS GeoEvent Server
- C. As the hosting server

Answer: C

Explanation:

To enable geocoding of addresses from CSV files uploaded to the ArcGIS Enterprise portal, the organization must designate a federated ArcGIS Server site as thehosting server. This hosting server must have a relational data store configured. Once set up,the portal can utilize a geocode utility service to process the addresses. This configuration allows users to map addresses from CSV files added to the portal.

Reference Source:ArcGIS Enterprise documentation on configuring the portal to geocode addresses

NEW QUESTION # 47

ArcGIS Server is installed with its Web Adaptor on the same server. The configuration is as follows:

* ArcGIS Server is federated with Portal for ArcGIS
* Portal is set up to use Integrated Windows Authentication
* The environment was set up using a domain certificate
* The attempted login account is a Windows account with admin privileges A GIS administrator tries to connect to ArcGIS Server Manager through ArcGIS Web Adaptor but the connection fails. Why did the connection fail?

- A. The Web Adaptor was not set to allow administrative access to the server
- B. The certificate must come from a valid Certificate Authority and not a Domain Certificate Authority
- C. The connection must be made with an internal admin account and not a Windows account

Answer: A

Explanation:

When using aWeb Adaptorto accessArcGIS Server Manager,administrative access must be explicitly enabled during Web Adaptor configuration. If this setting is not enabled, even valid administrator accounts (including Windows accounts with elevated privileges) will be unable to access ArcGIS Server Manager via the Web Adaptor.

This is a common configuration oversight. The federation, IWA setup, and domain certificate are not the causes here. A domain certificate is valid within trusted enterprise networks, and Windows accounts can access services through IWA once configured correctly.

NEW QUESTION # 48
An organization buys an additional 25 licenses for ArcGIS Pro and needs to assign the licenses to ArcGIS Enterprise users.
Which license file is required to make those assignments?

- A. An updated license file with only the 25 additional ArcGIS Pro licenses
- B. Any existing license file used previously
- C. New license file with just the 25 ArcGIS Pro licenses
- D. An updated license file with 25 additional ArcGIS Pro licenses

Answer: D

Explanation:
When an organization purchases additional licenses (e.g., ArcGIS Pro), anew combined license filemust be generated that includesboth the existing entitlements and the newly purchased ones. This updated license file reflects thetotal number of licenses(original + new).
From the ArcGIS Enterprise Licensing documentation:
"When downloading a new license file from My Esri to assign additional licenses, the license file must reflect the complete set of user types and extensions required. You must generate a new license file that includes both the existing and new entitlements."
* OptionAis incorrect because a license file with only the new licenses wouldoverwritethe previous file.
* OptionBis incorrect for the same reason-partial license files arenot valid for mergingwith existing licenses.
* OptionDdoes not accommodate the new licenses.

NEW QUESTION # 49
A GIS administrator is installingPortal for ArcGIS and ArcGIS Server on separate machines. They need services torun continuouslyand comply withenterprise password policies.
Which account should be used to deploy the software?

- A. A GIS administrator account
- B. A specific group-managed service account
- C. Windows built-in account with local admin privileges
- D. Create local accounts for every machine being used

Answer: B

Explanation:
For multi-machine deployments, aGroup Managed Service Account (gMSA)is the best option. It supports running services across multiple servers without requiring manual password updates, making it ideal forhigh- availability and enterprise security compliance.
From Esri's deployment guidance:
"Use a group managed service account (gMSA) when installing ArcGIS Enterprise on multiple machines.
gMSAs allow centralized password management and seamless cross-machine authentication."
* OptionAcould lead to password expiration issues.
* OptionClacks centralized management and complicates maintenance.
