SPLK-1003 Exam is computer-based, and candidates will receive their results immediately upon completion.

Splunk Enterprise Certified Admin Sample Questions (Q159-Q164):

NEW QUESTION # 159

Which of the following lists the three phases of the Splunk Indexing process in order?

- A. Ingest phaseLicensing phaseParsing phase
- B. Sourcetype phaseIndex phaseWrite-to-disk phase
- C. Ingest phaseTransforming phaseIndexing phase

- **D. Input phase**Parsing phaseIndexing phase

Answer: D

Explanation:

The Splunk indexing process consists of three main phases: Input, Parsing, and Indexing. Understanding these phases is crucial for configuring data inputs and managing data flow within Splunk.

- * Input Phase: Splunk receives data from various sources, such as files, network ports, or scripted inputs.
- * Parsing Phase: Splunk breaks the data into individual events, applies transformations, and extracts timestamps.
- * Indexing Phase: Splunk writes the parsed events to disk and creates indexes for efficient searching.

From the official Splunk documentation:

"The data pipeline consists of three main phases: input, parsing, and indexing."

- How the Splunk platform indexes data - Splunk Documentation

Therefore, the correct order of the indexing process is: Input phase # Parsing phase # Indexing phase.
