SAP Certified Associate - Project Manager - SAP Activate Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which of the following tools can support you in managing requirements and software development for implementation projects?

Note: There are 2 correct answers to this question

- **A. SAP Cloud ALM**
- B. Focused Insights for SAP Solution Manager
- C. SAP Focused Run
- **D. Focused Build for SAP Solution Manager**

Answer: A,D

Explanation:

* B is correct because Focused Build for SAP Solution Manager is a tool that supports the management of requirements and software development for implementation projects. It provides features such as requirements-to-deploy process, collaboration platform, quality gate management, and test management.

* D is correct because SAP Cloud ALM is a tool that supports the management of requirements and software development for implementation projects. It provides features such as project task management, solution documentation, change request management, and test management. Verified References:

NEW QUESTION # 53

What findings do you document in the Explore Phase workshops? Note: There are 3 correct answers to this question.

- **A. Confirmation of scope**
- B. Business role mapping
- **C. Process models**
- **D. Key business decisions**
- E. Detailed design of extensions

Answer: A,C,D

Explanation:

* B is correct because key business decisions are one of the findings that you document in the Explore Phase workshops. Key business decisions are the choices that the customer makes regarding their business processes, such as organizational structure, master data, reporting, or integration. These decisions affect the configuration and customization of the solution, and need to be documented and approved by the customer.

* D is correct because confirmation of scope is one of the findings that you document in the Explore Phase workshops. Confirmation of scope is the validation that the customer agrees with the scope items that are selected for their solution, and that they understand the functionality and limitations of each scope item. This helps to ensure that there are no misunderstandings or misalignments between the customer and the project team.

* E is correct because process models are one of the findings that you document in the Explore Phase workshops. Process models are graphical representations of the business processes that show the sequence of activities, roles, and systems involved in executing the process. Process models help to visualize and communicate the business requirements and scenarios, and identify any gaps or extensions that need to be addressed. Verified References:
