NCP-MCI-6.10 Latest Test Discount - Reliable NCP-MCI-6.10 Exam Testking

DOWNLOAD the newest Exam4Docs NCP-MCI-6.10 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=19S_K5w-RJ1iKWpBCXuusmY8i4PxcY8b9

Our desktop Nutanix NCP-MCI-6.10 practice exam software is designed for all those candidates who want to learn and practice in the actual Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) (NCP-MCI-6.10) exam environment. This desktop practice exam software completely depicts the Nutanix NCP-MCI-6.10 Exam scenario with proper rules and regulations so you can practice all the hurdles and difficulties.

If you want to study with computer, then you can try our Software or APP ONLINE versions. These two versions of our NCP-MCI-6.10 practice guide helps you to test your knowledge and over the exam anxiety. They have various self-assessment and self-learning tools, like timed exam and exam history, test series etc Which help you to manage time during actual NCP-MCI-6.10 Exam and arrange multiple tests which you can attempt on different intervals. Also you may improve your test skills by attempting NCP-MCI-6.10 exam questions multiple times.

Free PDF Trustable NCP-MCI-6.10 - Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Latest Test Discount

Nutanix certification will be a qualification assess standard for experienced workers, it is also a breakthrough for some workers who are in bottleneck. NCP-MCI-6.10 new test camp materials are a good helper. For most IT workers it also increases career chances. For companies one certification increases strong competitive power. NCP-MCI-6.10 New Test Camp materials will make you stand out from peers in this field applicable in all over the world.

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) Sample Questions (Q100-Q105):

NEW QUESTION # 100
An administrator has deployed two Nutanix clusters and is now establishing synchronous replication between them. However, the replication is failing immediately.
Which two responses show the reason and corrective action an administrator can take to resolve the issue?
(Choose two.)

- A. Use the command modify_firewall to open the ports on eth1 interface.
- B. If the primary and the recovery clusters are on the same subnet, open the ports manually for communication.
- C. If the primary and the recovery clusters are in different subnets, open the ports manually for communication.
- D. Use the command modify_firewall to open the ports on eth0 interface

Answer: A,C

Explanation:
When synchronous replication fails immediately between two clusters, it is often due to blocked communication across the required

ports (2009 and 2020). These must be open manually if the clusters are in different subnets or if network policies block traffic.

From the Nutanix Enterprise Cloud Administration (ECA) course materials:

"Replication communication relies on specific ports, which must be allowed through the firewall. If the clusters are in different subnets or if there are external firewalls, these ports must be explicitly opened."

"The modify_firewall command is used to open or close ports on cluster nodes. For replication and remote site communication, eth1 is typically used for external replication traffic." Since eth1 is typically used for external connectivity and replication traffic, opening ports on this interface using modify_firewall resolves the communication block.

NEW QUESTION # 101

An administrator migrated a physical MySQL database from a legacy 3-tier environment to a Nutanix cluster.

After migration, the administrator finds that at peak load, the number of IOPS is lower than expected, and latency is higher.

Which two steps should the administrator take to improve performance? (Choose two.)

- A. Ensure that the SQL data vDisks are thin provisioned.
- B. Use LVM to stripe the SQL data across multiple vDisks.
- C. Ensure that the SQL data vDisks are thick provisioned.
- D. Create additional vDisks for SQL data.

Answer: B,D

Explanation:
For high-performance databases like MySQL, optimizing storage access is critical.
* Option B (Create additional vDisks for SQL data) is correct:
* Multiple vDisks allow better parallelism in Nutanix DSF (Distributed Storage Fabric), improving IOPS.
* Option C (Use LVM to stripe SQL data across multiple vDisks) is correct:
* Striping across multiple disks distributes the load, reducing latency.
* Option A (Thick provisioned vDisks) is incorrect:
* Nutanix always provisions vDisks thinly, and thick provisioning does not improve IOPS.
* Option D (Thin provisioned vDisks) is incorrect:
* All Nutanix vDisks are thin-provisioned by default.

* Nutanix Bible #Optimizing SQL Performance on Nutanix
* Nutanix KB #Best Practices for Running MySQL on Nutanix

NEW QUESTION # 102

Which Nutanix feature allows administrators to expand a cluster by adding new nodes without downtime?

- A. Metro Availability
- B. AHV Protection Domains
- C. Prism Central
- D. Scale-out Architecture

Answer: D

NEW QUESTION # 103

In an RF2 cluster, what is the minimum number of nodes required to allow a host removal?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:
In a Nutanix cluster, Replication Factor 2 (RF2) means that each piece of data has two copies: a primary and a replica. To safely remove a node while ensuring data redundancy and cluster health, the system must have enough nodes to maintain the RF2 protection and complete the removal.

From the Nutanix Enterprise Cloud Administration (ECA) documentation:
"The minimum number of nodes required for a safe host removal in an RF2 cluster is four. This ensures that even after removing a node, there are enough remaining nodes to continue hosting the primary and replica data copies, meeting the RF2 requirement." The logic is:
* In a 3-node RF2 cluster, there isn't enough redundancy to safely remove a node without impacting data availability.
* A 4-node RF2 cluster allows safe removal of one node while still ensuring two copies of all data remain.
Thus, the minimum number of nodes required for a safe host removal in an RF2 cluster is 4

NEW QUESTION # 104
A cluster has an RF3 storage container with many VMs. Before the cluster runs out of space, the administrator has created a new RF2 storage container and would like to live migrate the vDisks.
Which check should be done before performing vDisk migration?

- **A. Ensure storage optimization options match between storage containers**
- B. Verify Multichannel Support is enabled.
- C. Validate network latency is below 5 milliseconds.
- D. Remove VMs from Protection Domains or Protection Policies.

Answer: A

NEW QUESTION # 105
......

The high efficiency method is targeted learning rather than comprehensive learning. Comprehensive learning can improve your basic knowledge but it is not the best to clear exams and obtain certifications. Our valid Nutanix NCP-MCI-6.10 exam cram review can help you pass this subject in a short time. If your goal is passing all exams and obtain a useful certification. The best shortcut is to buy Valid NCP-MCI-6.10 Exam Cram Review. Most experienced people can prove that. Good products are here waiting for you.

Reliable NCP-MCI-6.10 Exam Testking: https://www.exam4docs.com/NCP-MCI-6.10-study-questions.html

Nutanix NCP-MCI-6.10 Latest Test Discount Do you want to be an excellent talent, What is most surprising and considerate of the Reliable NCP-MCI-6.10 Exam Testking - Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) exam study material is that it still works well offline after downloading and installing, Nutanix NCP-MCI-6.10 Latest Test Discount Three versions of excellent products: PDF version, Soft version, APP version, Nutanix NCP-MCI-6.10 Latest Test Discount We like a person who acts, in hands, of course are considered; but the plan or policy already was decided, to that goal, cannot again be uncertain attitude, this is the indomitable attitude.

Delimited by the `` tag pair, this element Reliable NCP-MCI-6.10 Exam Testking is usually used for a short descriptive document title, Listening to Local Files on Your Mobile Device.

Do you want to be an excellent talent, What is most surprising NCP-MCI-6.10 Practice Mock and considerate of the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI v6.10) exam study material is that it still works well offline after downloading and installing!

NCP-MCI-6.10 Latest Test Discount – The Best Reliable Exam Testking for your Nutanix NCP-MCI-6.10

Three versions of excellent products: PDF version, Reliable NCP-MCI-6.10 Exam Testking Soft version, APP version, We like a person who acts, in hands, of course are considered; but the plan or policy already was decided, **NCP-MCI-6.10 Latest Test Discount** to that goal, cannot again be uncertain attitude, this is the indomitable attitude.

As you can see, we have established strategic NCP-MCI-6.10 cooperative relationship with Credit Card--the most reliable payment in the world.
