The IAPP CIPT Exam Dumps are similar to real exam questions. Our IAPP CIPT practice test software is suitable for computer users with a Windows operating system.

## IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q177-Q182):

### NEW QUESTION # 177

1905 Blue Stones Way, a California-based home furnishings organization, is implementing a new online helpdesk solution for customer call information. Before implementation, a privacy technologist should complete a privacy impact assessment that includes performing which one of the following activities?

- A. Mapping helpdesk solution data flows to determine where personal data is used.
- B. Analyzing the user population characteristics and needs.
- C. Identifying usability issues that may occur in the solution.
- D. Assessing whether the helpdesk used a security-by-design approach.

**Answer: A**

Explanation:

A core step of any PIA per CIPT is:

# Mapping data flows to understand where personal data is collected, stored, processed, and transmitted.

This allows identification of:

- \* Privacy risks
- \* Unauthorized data flows
- \* Third-party exposures
- \* Retention and access points
- \* Compliance gaps
- \* Necessary controls for purpose limitation and minimization

Data-flow mapping is foundational in:

- \* CIPT PIA module
- \* ISO/IEC 29134 (Privacy Impact Assessment)
- \* GDPR DPIA expectations
- \* NIST Privacy Framework (Data Processing Ecosystem Mapping)

Why the others are not core PIA activities:

- \* B: User research is design-related, not PIA-specific.
- \* C: Security by design is evaluated later, not the key PIA task.
- \* D: Usability issues are user-experience concerns, not privacy-risk mapping.

# Correct answer: A

#### NEW QUESTION # 178

What would be an example of an organization transferring the risks associated with a data breach?

- A. Applying industry standard data handling practices to the organization's practices.
- B. Using a third-party service to process credit card transactions.
- C. Purchasing insurance to cover the organization in case of a breach.
- D. Encrypting sensitive personal data during collection and storage.

**Answer: D**

#### NEW QUESTION # 179

A user who owns a resource wants to give other individuals access to the resource. What control would apply?

- A. Discretionary access control.
- B. Context of authority controls.
- C. Mandatory access control.
- D. Role-based access controls.

**Answer: D**

#### NEW QUESTION # 180

An organization must terminate their cloud vendor agreement immediately. What is the most secure way to delete the encrypted data stored in the cloud?

- A. Transfer the data to another location.
- B. Invoke the appropriate deletion clause in the cloud terms and conditions.
- C. Destroy all encryption keys associated with the data.
- D. Obtain a destruction certificate from the cloud vendor.

**Answer: C**

Explanation:

Destroying all encryption keys associated with encrypted data stored on a cloud server would make that encrypted data inaccessible even if it still exists on that server 4.

#### **NEW QUESTION # 181**

Which Organization for Economic Co-operation and Development (OECD) privacy protection principle encourages an organization to obtain an individual's consent before transferring personal information?

- A. Collection limitation.
- B. Purpose specification.
- C. Accountability.
- **D. Individual participation.**

**Answer: D**

Explanation:

The OECD privacy protection principle that encourages an organization to obtain an individual's consent before transferring personal information is individual participation. This principle asserts that individuals should have the right to know about the collection and use of their personal data, and to consent to its transfer.

It emphasizes transparency and individual control over personal information (IAPP, Certified Information Privacy Technologist (CIPT) materials).

#### **NEW QUESTION # 182**

.....

Our CIPT study materials include 3 versions and they are the PDF version, PC version, APP online version.
