NEW QUESTION # 22

What enables SAP's Suite as a Service approach? Note: There are 3 correct answers to this question.

- A. Harmonized data
- B. Integrated applications
- C. Scalable intelligence
- D. Embedded AI

Answer: A,B,D

Explanation:

SAP's Suite as a Service approach is enabled by integrated applications, harmonized data, and embedded AI, as outlined in SAP Business AI documentation. Integrated applications ensure seamless connectivity across SAP's suite, enabling unified workflows and consistent user experiences. Harmonized data provides a single, standardized data model across applications, ensuring data consistency and enabling AI-driven insights. Embedded AI integrates intelligent capabilities directly into SAP applications, enhancing automation, analytics, and decision-making. These components collectively deliver a cohesive, cloud-based service model that drives efficiency and innovation. Scalable intelligence, while important, is not explicitly listed as a core enabler of this approach, and coordinated automation is a benefit rather than a foundational element.

NEW QUESTION # 26

(What are some generative AI enhancements in ABAP Cloud? Note: There are 2 correct answers to this question.)

- A. Generate integrations with preconfigured connectors.

- B. Generate unit-tests for ABAP classes and CDS views.
- C. Generate business objects using the ABAP RESTful application programming model.
- D. Generate digital assistants.

Answer: B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI enhancements in ABAP Cloud include generating unit tests for ABAP classes and CDS views to improve testing efficiency, and generating business objects using the ABAP RESTful Application Programming Model (RAP) to streamline development and maintain a clean core approach.

Exact extracts supporting this:

Generate unit-tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently."

community.sap.com Generate business objects: "The first scope of features will cover business object ..."

learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."

community.sap.com Other options are incorrect because:
Option A: Generating digital assistants is not a specific enhancement in ABAP Cloud; Joule is the assistant, but generation is for code artifacts.

Option D: Generating integrations is supported in broader SAP Build, but not highlighted as a generative AI enhancement specific to ABAP Cloud.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Extracted from SAP Help Portal "Generative AI in ABAP Cloud" and community blogs like "Unveiling today: SAP Build meets ABAP Cloud."

These position generative AI for code generation and testing in ABAP as part of custom AI solutions in the SAP Business Suite, per C_BCBAI_2502 certification.
