

300-620 Reliable Learning Materials - 300-620 Test Pass4sure

BTW, DOWNLOAD part of ExamsTorrent 300-620 dumps from Cloud Storage: https://drive.google.com/open?id=1m-Nln3djHFOGcx1kI3Muwq38uVXw4n1_

Attempting these 300-620 practice test questions, again and again, enhances your learning and eliminates errors in your readiness for the Implementing Cisco Application Centric Infrastructure certification exam. Customization features of Implementing Cisco Application Centric Infrastructure (300-620) practice test software give you chance to adjust the settings of the Implementing Cisco Application Centric Infrastructure (300-620) practice exams sessions. Windows laptops and PCs support the desktop-based software of the Cisco 300-620 practice test. These Implementing Cisco Application Centric Infrastructure (300-620) practice exams create situations that replicate the actual 300-620 exam.

Our 300-620 training guide boosts three versions which include PDF version, PC version and APP online version. The 300-620 test guide is highly efficient and the forms of the answers and questions are the same. Different version boosts their own feature and using method, and the client can choose the most convenient method. For example, PDF format of 300-620 Guide Torrent is printable and boosts instant access to download. You can learn at any time, and you can update the 300-620 exam questions freely in any day of one year.

300-620 test questions, 300-620 dumps torrent, 300-620 pdf

ExamsTorrent is a specialized IT certification exam training website which provide you the targeted exercises and current exams. We focus on the popular Cisco Certification 300-620 Exam and has studied out the latest training programs about Cisco certification 300-620 exam, which can meet the needs of many people. Cisco 300-620 certification is a reference of many well-known IT companies to hire IT employee. So this certification exam is very popular now. ExamsTorrent is also recognized and relied by many people. ExamsTorrent can help a lot of people achieve their dream. If you choose ExamsTorrent, but you do not successfully pass the examination, ExamsTorrent will give you a full refund.

Understanding functional and technical aspects of Implementing Cisco Application Centric Infrastructure (300-620 DCACI) Network Intrusion Analysis

The following will be discussed in **CISCO 300-620 exam dumps pdf**:

Cisco ACI provides a network that is deployed, monitored, and managed in a way that benefits different teams in the IT organization. It supports rapid application change by reducing complexity with a common policy framework that can automate provisioning and resource management. In addition, it enhances business agility, reduces TCO, automates IT tasks, and accelerates data center application deployments.

- Implement service graph (managed and unmanaged)
- Implement VMware vCenter DVS integration
- Describe resolution immediacy in VMM

Upon successful completion of the Cisco 300-620 Exam, candidates will earn the Cisco Certified Specialist – ACI Implementation certification. Implementing Cisco Application Centric Infrastructure certification demonstrates that the candidate has the skills and knowledge necessary to implement and manage Cisco's Application Centric Infrastructure. It is highly valued by enterprises, as it signals the candidate's ability to modernize and secure their infrastructure in order to meet the rapidly evolving demands of the modern business environment.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q228-Q233):

NEW QUESTION # 228

Which service graph option creates a permit entry for the traffic from the provider EPG to the provider connector of the PBR node?

- A. direct connect
- B. share encap
- C. single context aware
- D. promiscuous mode

Answer: C

Explanation:

In Cisco ACI, when using a service graph with Policy-Based Redirect (PBR), the single context aware option creates a permit entry specifically for traffic flowing from the provider Endpoint Group (EPG) to the provider connector of the PBR node. This ensures that the traffic is properly redirected and allowed to flow through the specified service graph for further processing.

NEW QUESTION # 229

A network engineer is integrating a new Hyperflex storage cluster into an existing Cisco ACI fabric. The Hyperflex cluster must be managed by vCenter so a new vSphere Distributed switch must be created. In addition, the hardware discovery must be performed by a vendor-neutral discovery protocol. Which set of steps meets these requirements?

- Configure an Interface Policy group, select CDP, and apply it to the desired interfaces. Enter the vCenter IP and credentials in the Create vCenter Controller dialog box. In the Create VMware VMM domain dialog box, select Read-Only Mode.
- Configure an Interface Policy group, select CDP, and apply it to the designated interfaces. Create a VMware VMM domain, add it to the VLAN pool, and associate it to the designated interfaces. Select Read Only Mode In the Create VMware VMM domain dialog box.
- Configure an Interface Policy group, select LLDP, and apply it to the selected interfaces. Create a VLAN pool, add it to the VMware VMM domain, and include the appropriate interfaces. Enter the vCenter IP and credentials in the Create vCenter Controller dialog box.
- Configure a Switch Policy group, select LLDP, and apply it to the indicated interfaces. Set up a VMware VMM domain and apply it to the appropriate interfaces. Enter the APIC management IP and credentials in the Create vCenter Controller dialog box.

- A. Option C
- B. Option A
- **C. Option B**
- D. Option D

Answer: C

Explanation:

To integrate a new Hyperflex storage cluster into an existing Cisco ACI fabric and manage it with vCenter, the following steps should be taken:

Create a new vSphere Distributed Switch (vDS): This is done within the vCenter interface. The vDS acts as a single virtual switch across all associated hosts in the data center, providing centralized management and monitoring of the network configuration¹.

Configure the vDS for the Hyperflex cluster: This involves setting up the correct port groups, VLANs, and uplink profiles to ensure proper network segmentation and performance².

Enable hardware discovery using a vendor-neutral protocol: This could involve using protocols like LLDP (Link Layer Discovery Protocol) or CDP (Cisco Discovery Protocol), which are supported by vCenter and can help in identifying and managing physical network devices³.

Integrate the Hyperflex cluster with ACI using the Application Policy Infrastructure Controller (APIC): This involves creating the necessary policies and profiles in ACI to manage the Hyperflex storage traffic effectively⁴.

NEW QUESTION # 230

Edit Stats Threshold

transmit B2B credit cumulative

Normal Value: 300

Threshold Direction: Both Rising Falling

Rising Thresholds to Config: ☒ ☐

- ☒ Critical
- ☐ Major
- ☐ Minor
- ☒ Warning

Rising

Set

Reset

Critical 500

Major

Minor

Warning 400

300

Refer to the exhibit. A client reports that the ACI domain connectivity to the fiber channel storage is experiencing a B2B credit oversubscription. The environment has a SYSLOG server for state collection messages. Which value should be chosen to clear the critical fault?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Section: ACI Management

NEW QUESTION # 231

How is an EPG extended outside of the ACI fabric?

- A. Create an external bridged network that is assigned to a leaf port.
- B. Enable unicast routing within an EPG.
- C. Statically assign a VLAN ID to a leaf port in an EPG.
- D. Create an external routed network that is assigned to an EPG.

Answer: C

Explanation:

An EPG is extended outside of the ACI fabric by statically assigning a VLAN ID to a leaf port in an EPG. This method maps the

traffic received on the leaf port to the EPG, and the policy for this EPG is enforced

NEW QUESTION # 232

What happens to the traffic flow when the Cisco ACI fabric has a stale endpoint entry for the destination endpoint?

- A. The leaf switch floods the traffic to the endpoint throughout the fabric.
- B. The leaf switch sends the traffic to the wrong destination leaf.
- C. The leaf switch drops the traffic that is destined to the endpoint.
- D. The leaf switch does not learn the source endpoint through data plane learning.

Answer: C

Explanation:

NEW QUESTION # 233

• • • • •

With the advent of the era of big data, data information bringing convenience to our life at the same time, the problem of personal information leakage has become increasingly prominent. For preventing information leakage, our 300-620 test torrent will provide the date protection for all customers. It is not necessary for you to be anxious about your information gained by the third party. At the same time, the versions of our Implementing Cisco Application Centric Infrastructure exam tool also have the ability to help you ward off network intrusion and attacks and protect users' network security. If you choose our 300-620 Study Materials, we can promise that we must enhance the safety guarantee and keep your information from revealing.
