If you are determined to get the certification, our SAFe-Practitioner question torrent is willing to give you a hand; because the study materials from our company will be the best study tool for you to get the certification. Now I am going to introduce our SAFe-Practitioner Exam Question to you in detail, please read our introduction carefully, we can make sure that you will benefit a lot from it. If you are interest in it, you can buy it right now.

In addition to the above, the SP certification exam is designed to help practitioners develop the skills needed to work with stakeholders and customers. This includes understanding customer needs, defining business objectives and key results, and managing customer feedback. By focusing on these areas, the SP certification is helping organizations improve their relationships with stakeholders and deliver products and services that meet their needs.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q125-Q130):

NEW QUESTION # 125

What is a minimum viable product? (MVP)

- A. A minimal version of a new product used to test a hypothesis
- B. A prototype that can be used to explore user needs
- C. A Feature that can be delivered in an Iteration
- D. A minimal product that can be built to achieve market dominance

Answer: A

Explanation:

According to the SAFe-for-Teams-SAFe-Practitioner-6-0 documents, a minimum viable product (MVP) is an early and minimal version of a new solution sufficient to prove or disprove an epic hypothesis¹. An MVP is not a prototype, a feature, or a product. It is a learning tool that helps validate assumptions, reduce uncertainty, and increase the likelihood of building the right thing².

Therefore, the correct answer is A. A minimal version of a new product used to test a hypothesis. References: Epic - Scaled Agile Framework, What is a Minimum Viable Product (MVP)? | Agile Alliance

NEW QUESTION # 126

Which component of the Continuous Delivery Pipeline is the ability to make value available to customers all at once, or in a staggered fashion based market and business needs?

- A. Continuous Deployment
- B. Continuous Exploration
- C. Continuous Integration
- **D. Release On Demand**

Answer: D

NEW QUESTION # 127

What is the purpose of the Team Sync?

- **A. To coordinate daily work**
- B. To make announcements to the entire ART
- C. To identify Iteration goals
- D. To identify ART PI risks

Answer: A

Explanation:

n: The Team Sync is a short meeting (usually 15 minutes or less), typically held about daily, to inspect progress toward the team goals, communicate, and adjust upcoming planned work¹. The Team Sync helps the team members align their activities, identify and resolve impediments, and collaborate effectively. The Team Sync is also an opportunity to share information, celebrate achievements, and foster team spirit. The other options are incorrect because:

* A. The Team Sync is not the place to identify ART PI risks. Risks are identified and managed at the Program level, using the ROAM board and other tools².

* C. The Team Sync is not the place to identify Iteration goals. Iteration goals are defined and agreed upon during the Iteration Planning event, which happens at the beginning of each Iteration³.

* D. The Team Sync is not the place to make announcements to the entire ART. The Team Sync is a team-level event, where only the team members and the Scrum Master participate. Announcements to the entire ART are made during the ART Sync, which is a program-level event that happens weekly or biweekly⁴. References: 1: Team Sync - Scaled Agile Framework, 2: Program Risks - Scaled Agile Framework, 3: Iteration Planning - Scaled Agile Framework, 4: ART Sync - Scaled Agile Framework

NEW QUESTION # 128

Which of the following is not a value of the Agile Manifesto?

- A. Individuals and Interactions over Processes and Tools
- B. Working Software over Comprehensive Documentation
- **C. Contract Negotiation over Customer Collaboration**
- D. Responding to Change over Following a Plan

Answer: C

NEW QUESTION # 129

What is "precisely specify value by product" central to?

- A. Agile Manifesto
- **B. Lean Thinking**
- C. SAFe Principles
- D. SAFe Core Values

Answer: B

Explanation:

Precisely specify value by product" is one of the five key principles of Lean Thinking, as defined by James Womack and Daniel Jones in their book "Lean Thinking". It means that value should be determined by the customer's needs and preferences for each specific product or service, rather than by the producer's assumptions or standards. This principle helps to eliminate waste, optimize flow, and increase customer satisfaction. References: Lean-Agile Mindset, Lean Manufacturing, What is Lean?
