## ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q15-Q20):

### NEW QUESTION # 15

In Discovery, which one of the following causes a pattern to fail during discovery?

Response:

- A. No parse variable operation used in a step
- **B. No pattern attached to a classification**
- C. No firewalls installed on the host
- D. No CI Identifier exists

**Answer: B**

#### NEW QUESTION # 16

Which of the below choices are needed for Quick Discovery? (Choose two.)

- **A. Target IP**
- B. Discovery Schedule
- **C. MID Server**
- D. PID

**Answer: A,C**

Explanation:

Quick Discovery is a wizard that helps you get up and running with Discovery quickly. It discovers both physical and logical components, including virtual machines, servers, storage, databases, applications, and more. To use Quick Discovery, you need to have a MID Server installed and configured, and provide a target IP range or subnet to scan. You do not need to create a Discovery Schedule or a PID for Quick Discovery.
