He can solve any problems you have encountered while using H12-841_V1.5 exam simulating for all of our staffs are trained to be professional to help our customers. And they are kind and considerate.

Huawei HCIP-Datcom-Campus Network Planning and Deployment V1.5 Sample Questions (Q190-Q195):

NEW QUESTION # 190

In a wide area network (WAN) IPv6 transition scenario, if "an enterprise needs to provide both IPv4 and IPv6 services to the outside world, but only deploys IPv4 internally," which of the following technologies should be adopted?

- A. IPv4/IPv6 dual-stack technology (internal devices must support IPv6)
- B. IPv6 over IPv4 tunnel (only allows access from IPv6 terminals)
- C. Disable IPv6 service and only provide IPv4 service.

- D. NAT464 (translates external IPv6 addresses into internal IPv4 addresses, allowing direct access from external IPv4 addresses)

Answer: D

NEW QUESTION # 191

In Huawei's SD-WAN solution, which of the following functions can "remotely diagnose branch equipment faults without the need for on-site maintenance personnel intervention"?

- A. Perform diagnostics by remotely logging into the device's command-line interface (such as SSH).
- B. Disable remote access to the device and allow only local diagnostics.
- C. On-site maintenance personnel need to connect the equipment for diagnosis.
- D. Only device alarms can be viewed; remote diagnostics are not possible.

Answer: A

NEW QUESTION # 192

In Huawei's SD-WAN solution, which of the following technologies can "automatically upgrade the software version of branch devices without manual on-site operation"?

- A. Manually download the software version and import it to the device via USB flash drive for upgrade.
- B. Automatic SD-WAN software version management (the management platform pushes the version, and the device automatically downloads and installs it).
- C. Disable device version upgrades and keep the initial version.
- D. Only notify maintenance personnel to manually log in to upgrade the device; do not execute automatically.

Answer: B

NEW QUESTION # 193

In an MPLS VPN network, which of the following failures will cause "the CE device to fail to learn the VPN routes advertised by the PE device"?

- A. OSPF neighbor between CE and PE is established normally.
- B. The PE device does not have a routing protocol configured between CE and PE.
- C. MPLS LSPs between PEs are established normally.
- D. The VRF instance and interface are correctly bound on the PE device.

Answer: B

NEW QUESTION # 194

In Huawei's SD-WAN solution, which of the following technologies can "automatically re-establish a VPN tunnel with headquarters after a branch device changes its public IP address, without manual intervention"?

- A. Disable the VPN tunnel automatic reconnection function; manual triggering is required.
- B. SD-WAN Dynamic IP Adaptation Technology (Automatically detects changes in public IP address and re-initiates tunnel connection)
- C. Fixed public IP address for branch offices; dynamic changes are not supported.
- D. Manually reconfigure VPN tunnel parameters and update the public IP address.

Answer: B

NEW QUESTION # 195

.....

You can pass your Huawei H12-841_V1.5 certification exam in less time, without wasting time and money on outdated or unreliable
