2026 CompTIA Unparalleled Reliable 220-1201 Test Pass4sure Pass

Guaranteed

The CompTIA 220-1201 practice exam material is available in three different formats i.e CompTIA 220-1201 dumps PDF format, web-based practice test software, and desktop 220-1201 practice exam software. PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for 220-1201 Exam from them. Applicants can also make notes of printed CompTIA A+ Certification Exam: Core 1 (220-1201) exam material so they can use it anywhere in order to pass CompTIA 220-1201 Certification with a good score.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q125-Q130):

NEW QUESTION # 125

A technician is troubleshooting issues occurring on a user's mobile device. Applications and the OS have slow response times, even when performing simple tasks, such as writing an email. Additionally, new applications occasionally fail to launch. Which of the following should the technician do next?

- A. Move the device to a room with a colder temperature.
- B. Check the battery health of the device.
- C. Reset to factory default settings.
- **D. Close unnecessary programs.**

Answer: D

Explanation:

The symptoms - slow response and failed app launches - indicate that the device's memory or processing resources are overutilized. Closing unnecessary apps can free up RAM and CPU resources, improving performance.

Option A: Overheating may cause sluggishness, but that's not indicated here.

Option C: Factory reset is a last resort, not the next logical step.

Option D: Battery health would affect uptime, not system speed.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 1.6: Given a scenario, configure basic mobile device network connectivity and application support.

NEW QUESTION # 126

A customer has bare-metal servers running Windows, Linux, and Unix. They want consolidation while maintaining isolation and compatibility. What should the technician recommend?

- **A. IaaS**
- B. Containers
- C. VDI
- D. Type 2 hypervisor

Answer: A

Explanation:

The customer wants to consolidate multiple physical servers running different operating systems, including Windows, Linux, and Unix, while maintaining strong isolation between systems. CompTIA A+ identifies Infrastructure as a Service (IaaS) as the best model for hosting fully isolated virtual machines in a cloud environment, allowing each OS to run independently on its own virtual hardware.

IaaS provides virtualized computing resources-CPU, RAM, networking, and storage-while allowing the customer full control over the OS and application layer. This means Windows, Linux, and Unix VMs can coexist without compatibility concerns because each VM runs its native OS without modification.

Containers (B) are unsuitable because they share the host OS kernel, meaning they cannot run different OS families. A Type 2 hypervisor (C) is workstation-based and not designed for enterprise server consolidation. VDI (D) provides user desktops, not server workload consolidation.

Thus, IaaS is the correct solution for compatibility, isolation, and consolidation across multiple OS types.

NEW QUESTION # 127

A user keeps getting an error message when trying to print a letter. The printer is normally used to print cards and invitations. The user tries printing from a different computer, but the issue persists. Which of the following should the user do to resolve the issue?

- A. Print fewer pages.
- **B. Change the paper tray setting.**
- C. Replace the rollers.
- D. Print on card stock

Answer: B

Explanation:

If a printer is set to use a special tray (for cards/invitations) but a different type of print job is attempted (like a letter), a paper tray setting mismatch can cause errors. Changing the tray setting to match the print media resolves the issue.

From CompTIA A+ 220-1101 Official Study Guide, Objective 4.3 - Troubleshooting printers:

"If print jobs fail when media type changes, verify and adjust the paper tray settings to match the required output." Verified Source:

* CompTIA A+ Core 1 (220-1101) Official Study Guide, Chapter 4: Printer Troubleshooting

* CompTIA Exam Objectives 220-1101, Domain 4.3

NEW QUESTION # 128

A technician is troubleshooting internet connectivity issues after a firewall update. Users report that they can access local network resources, such as printers and shares, but cannot access the internet. Which of the following settings is most likely causing the issue?

- **A. Default gateway**
- B. VLANs
- C. Static IP assignments
- D. Subnet mask

Answer: A

Explanation:

If users can access local network resources but not the internet, the most likely culprit is a misconfigured or missing default gateway.

The default gateway routes traffic from the local network to external networks (i.e., the internet). If it's not properly set or was altered during a firewall update, internet traffic won't be forwarded correctly.

Option A: Static IPs could cause conflict, but wouldn't affect only external access if configured correctly.

Option C: An incorrect subnet mask could isolate devices, but local communication would likely be impacted too.

Option D: VLANs segment networks; while misconfigured VLANs could cause access issues, they'd more likely isolate local traffic as well.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 2.6: Given a scenario, configure and troubleshoot network connectivity.

NEW QUESTION # 129

Which of the following types of connectors does an IDE hard drive use for power?

- A. F type
- B. Lightning
- C. SC
- **D. Molex**

Answer: D

Explanation:

An IDE hard drive uses a Molex connector for power. This 4-pin connector is a standard for older drives.

Why Not A (F type): F type connectors are used for coaxial cables in video and internet applications.

Why Not B (SC): SC connectors are for fiber optic cables.

Why Not D (Lightning): Lightning connectors are for Apple devices.

CompTIA A+ Exam Reference: Core 1 (220-1201), Section 3.1, cable types and connectors.
