New 3V0-32.23 Test Question, 3V0-32.23 Exam Forum

If you are really not sure which version you like best, you can also apply for multiple trial versions of our 3V0-32.23 exam questions. We want our customers to make sensible decisions and stick to them. 3V0-32.23 study engine can be developed to today, and the principle of customer first is a very important factor. 3V0-32.23 Training Materials really hope to stand with you, learn together and grow together.

VMware 3V0-32.23 Exam is intended for IT professionals who have experience working with vRealize Automation, vRealize Orchestrator, vRealize Operations, and other VMware cloud management and automation technologies. 3V0-32.23 exam requires the candidate to have a deep understanding of the core concepts of cloud computing, virtualization, automation, and orchestration. Candidates should also have a good understanding of networking, storage, and security concepts.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q238-Q243):

NEW QUESTION # 238
An architect is responsible for reviewing the requirements for an existing Cloud Management solution design.
Which requirement would be considered as a functional requirement?

- A. The solution must meet a Recovery Time Objective of four hours.
- B. The solution must support the management of workloads within a public cloud.
- C. The solution must meet a monthly uptime Service Level Agreement of 99.5%.
- D. The solution must meet a Recovery Point Objective of one day.

Answer: B

Explanation:
Functional requirements describe what the solution must do (features or capabilities), such as managing workloads in a public cloud. The other options are non-functional requirements (related to performance, availability, or recovery objectives).

NEW QUESTION # 239
Which of the following is an example of an availability concern in system design?

- A. Ensuring the system can handle a sudden surge in user traffic.
- B. Applying role-based access controls for user authentication.
- C. Encrypting sensitive data during transmission.
- D. Implementing regular data backups to prevent data loss.

Answer: A

NEW QUESTION # 240
A company has recently completed an audit and has found that there are many virtual machines in their production environment which no longer appear to be in use. To prevent this from happening in the future, the company is deploying vRealize Automation and would like all provisioned VMs to meet the following requirements:
Virtual machines to have a default lease of 90 days but no more than 365 days Lease policy can be changed Upon initial lease expiration, the virtual machine should be kept for 10 days, after which they will be destroyed Which policy design will meet the technical requirements?

- A. Create a lease policy with the organization scope, setting 90 days lease, 365 total lease, and grace period to 10 and a soft enforcement
- B. Create a lease policy with the project scope, setting 90 days lease, 365 total lease, and grace period to 10 and a hard enforcement
- C. Create a lease policy with the project scope, setting 90 days lease, 365 total lease, and grace period to 10 and a soft enforcement
- D. Create a lease policy with the organization scope, setting 90 days lease, 365 total lease, and grace period to 10 and a hard enforcement

Answer: B

Explanation:
Defining the lease policy at the project scope allows different projects to have tailored policies. Setting a default lease of 90 days, a maximum of 365 days, and a 10-day grace period with hard enforcement ensures that expired VMs are automatically destroyed, preventing unused VMs from lingering.

NEW QUESTION # 241
Which scenario aligns with the use of VMware Identity Manager in a Cloud Management logical design?

- A. Designing a new company logo
- B. Tracking employee attendance
- C. Managing inventory in a retail store
- D. Securing remote access to cloud resources

Answer: D

NEW QUESTION # 242
An architect is designing a Cloud Management solution for a customer to create a private cloud. The customer wants to enable self-service provisioning for their business users to their existing VMware virtual environment.
What should the architect document as a risk in the design?

- A. The solution will not support provisioning to VMC on AWS without additional licensing.
- B. The solution will not support the provisioning to public cloud without additional licensing.
- C. The solution will not support the monitoring of workloads on the private cloud.

- D. The solution cannot be upgraded to support the provisioning of public cloud services.

Answer: B

Explanation:
If the customer only enables self-service for their existing VMware environment, extending provisioning to public cloud platforms typically requires additional licenses and configuration, making this a relevant risk to document.

NEW QUESTION # 243
......

The price for 3V0-32.23 study materials is quite reasonable, no matter you are a student at school or an employee in the company, you can afford it. Just think that you just need to spend some money, you can get the certificate. What's more, 3V0-32.23 exam materials are compiled by skilled professionals, and they cover the most knowledge points and will help you pass the exam successfully. We have online and offline chat service stuff, they have the professional knowledge about 3V0-32.23 Exam Dumps, and you can have a chat with them if you have any questions.
