Eliminates confusion while taking the Cisco 300-745 exam

As we always want to do better in this career, our research center has formed a group of professional experts responsible for researching new technology of the 300-745 study materials. The technology of the 300-745 practice prep will be innovated every once in a while. As you can see, we never stop innovating new version of the 300-745 Exam Questions. We really need your strong support. We always adopt the kind and useful advices of our loyal customers who wrote to us and gave us their opinions on their study.

It is convenient for the user to read. The 300-745 test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the 300-745 quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of 300-745 Test Prep more conveniently at the same time. As far as concerned, the online mode for mobile phone clients has the same function.

Valid New 300-745 Exam Camp & Leading Offer in Qualification Exams & Effective Cisco Designing Cisco Security Infrastructure

Our 300-745 test guide is suitable for you whichever level you are in right now. Whether you are in entry-level position or experienced exam candidates who have tried the exam before, this is the perfect chance to give a shot. A growing number of exam candidates are choosing our 300-745 Exam Questions, why are you still hesitating? As long as you have make up your mind, our Designing Cisco Security Infrastructure study question is available in five minutes, so just begin your review now! This could be a pinnacle in your life.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q23-Q28):

NEW QUESTION # 23
After a recent security breach, a financial company is reassessing their overall security posture and strategy to better protect sensitive data and resources. The company already\ deployed on- premises next-generation firewalls at the network edge for each branch location. Security measures must be enhanced at the endpoint level. The goal is to implement a solution that provides additional traffic filtering directly on endpoint devices, thereby offering another layer of defense against potential threats. Which technology must be implemented to meet the requirement?

- A. web application firewall
- B. traditional firewall
- C. host-based firewall
- D. distributed firewall

Answer: C

Explanation:
A host-based firewall runs directly on endpoint devices, providing traffic filtering and protection at the endpoint level. This adds another layer of defense beyond the network edge firewalls, ensuring threats are mitigated closer to where sensitive data resides.

NEW QUESTION # 24

A construction company recently introduced a BYOD policy, where contractors can bring personal devices and connect to the wireless network. The network engineer configured a Wi-Fi network with a guest splash page to provide internet access only. Although the policy was limited to wireless devices, contractors started bringing devices that needed wired connections without authorization and connecting to the network. The network team suggested shutting down ports where unauthorized devices are connected. Which technology must be implemented to ensure that wired and wireless devices are granted network access only after successful authentication?

- A. VxLANs
- B. private VLANs
- C. 802.1x
- D. VACLs

Answer: C

Explanation:
802.1X provides port-based network access control, requiring devices (wired or wireless) to authenticate before gaining network access. This ensures that only authorized users and devices can connect, enforcing the BYOD policy and preventing unauthorized wired connections.

NEW QUESTION # 25

A global energy company moved a monolithic application from the data center to public cloud.
Over time, the company added many capabilities to the application, and it is now difficult for the application team to scale it. The application owner decided to modernize the application by moving to a Kubernetes cluster. However, he wants to ensure that the new application architecture provides a container network interface that is scalable, offers options for cloud-native security, and helps with visibility and observability. Which solution must be used to accomplish the task?

- A. ingress gateway
- B. Cilium
- C. security group
- D. ENI

Answer: B

Explanation:
Cilium is a Kubernetes Container Network Interface (CNI) that provides scalability, cloud-native security with eBPF-based enforcement, and strong visibility/observability into network traffic between microservices. It is purpose-built to modernize applications running in Kubernetes clusters.

NEW QUESTION # 26

A product manager is focused on maintaining the security integrity of a microservice-based application as new features are developed and integrated. To ensure that known software vulnerabilities are not introduced into the product, it is crucial to implement a robust application security technique. The technique must be applied during the build phase of the software development lifecycle, which allows the team to proactively entity and address vulnerability risks before deployment. Which application security technique must be applied to accomplish the goal?

- A. secret detection
- B. Open API specification analysis
- C. container scanning
- D. infrastructure as code scanning

Answer: C

Explanation:
Container scanning during the build phase ensures that no known software vulnerabilities are introduced into the application. It scans container images for outdated libraries, misconfigurations, and security flaws before deployment, allowing proactive remediation. This directly supports maintaining the security integrity of a microservice-based application.

NEW QUESTION # 27

An engineering company's Chief Financial Officer recently fall victim to a phishing scam by responding to an urgent email. The mail appeared to be from a trusted business partner, and it requested sensitive tax information. The incident led to significant financial and reputational damage. To prevent similar occurrences in the future, the security team must implement an effective mitigation strategy. Which mitigation strategy must the security team implement to prevent similar occurrences in the future?

- A. upstream traffic filter
- B. granular port security strategy
- C. data loss prevention strategy
- D. targeted education campaign

Answer: D

Explanation:
A targeted education campaign directly addresses phishing by training employees, especially high-value targets like executives, to recognize social engineering attempts. While technical controls help, phishing primarily exploits human behavior, so awareness and training are the most effective preventive measures.

NEW QUESTION # 28

......

Can you imagine that ust a mobile phone can let you do 300-745 exam questions at any time? With our 300-745 learning guide, you will find studying for the exam can be so easy and intersting. If you are a student, you can lose a heavy bag with 300-745 Study Materials, and you can save more time for making friends, traveling, and broadening your horizons. Please believe that 300-745 guide materials will be the best booster for you to learn.
