Our goal is to increase customer's satisfaction and always put customers in the first place. As for us, the customer is God. We provide you with 24-hour online service for our Workday-Pro-Time-Tracking study tool. If you have any questions, please send us an e-mail. We will promptly provide feedback to you and we sincerely help you to solve the problem. Our specialists check daily to find whether there is an update on the Workday-Pro-Time-Tracking study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our Workday-Pro-Time-Tracking Test Torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our Workday-Pro-Time-Tracking exam materials are absolutely safe and virus-free. If you encounter installation problems, we have professional staff to provide you with remote online guidance. We always put your needs in the first place.

Workday ProTime Tracking Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which report should you run to ensure a worker only has one period schedule?

- A. View Worker's Time Eligibility
- B. View Work Schedule Calendar
- C. View Period Schedule
- **D. Audit - Workers with Multiple Time Period Schedules**

Answer: D

Explanation:

The correct answer is D. Audit - Workers with Multiple Time Period Schedules .

In Workday Time Tracking, a worker should generally have only one active time period schedule so that time entry, approvals, period close, and downstream payroll processing function correctly. When a worker is assigned to more than one time period schedule, it can create confusion around which period controls their time entry deadlines, submission windows, and approval timing. Because this is a setup and data integrity issue, Workday provides a specific audit report to identify workers who have this problem. The report Audit - Workers with Multiple Time Period Schedules is designed exactly for this purpose. It helps administrators quickly find workers with conflicting schedule assignments so corrective action can be taken. This makes it the best report to run when validating time tracking configuration and ensuring clean administrative setup.

The other options are not intended for this audit purpose. View Work Schedule Calendar shows schedule- related calendar details, not duplicate period schedule assignments. View Period Schedule displays the schedule itself, but not necessarily workers with multiple assignments. View Worker's Time Eligibility is used to review time tracking eligibility rules and related setup, not to detect duplicate period schedules.

NEW QUESTION # 42

Refer to the following scenario to answer the question below.

Refer to the following scenario to answer the question below.

Day	1-Hours Worked	Hours	Not Submitted
Mon, 3/25	10 Hours	10	Not Submitted
Tue, 3/26	15 Hours	15	Not Submitted
Wed, 3/27	6 Hours	6	Not Submitted
Thu, 3/28	8 Hours	8	Not Submitted
Fri, 3/29	10 Hours	10	Not Submitted

Enter Time screen for Amanda Baker. Week view for March 25 - 31, 2024

- For Monday 3/25 Hours equal 10.
 - 1-Hours Worked. 10 hours. Not submitted.
- For Tuesday 3/26. Hours equal 15.

ActualtestsIT

- For Monday 3/25 Hours equal 10.
 - 1-Hours Worked. 10 hours. Not submitted.
- For Tuesday 3/26. Hours equal 15.
 - 1-Hours Worked. 15 hours. Not submitted.
- For Wednesday 3/27. Hours equal 6.
 - 1-Hours Worked. 6 hours. Not submitted.
- For Thursday 3/28. Hours equal 8.
 - 1-Hours Worked. 8 hours. Not submitted.
- For Friday 3/29. Hours equal 10.
 - Pay date: 03/18/2024 - 03/24/2024.
 - 1-Hours Worked. 10 hours. Not submitted.
- For Saturday 3/30. Hours equal 6.
 - 1-Hours Worked. 6 hours. Not submitted.
- For Sunday 3/31. Hours equal 4.
 - Time Period End: 03/24/2024 - 03/31/2024.
 - 1-Hours Worked. 4 hours. Not submitted.

Amanda Baker is eligible for the following calculations: Daily OT > 8 regular hours in a day, Daily double time > 12 regular hours in a day, Weekly OT > 40 regular hours in a week.

How many time calculation tags are assigned on the calculated tab for Tuesday?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

The correct answer is C. 3 . On Tuesday , Amanda Baker reported 15 hours . Based on the rules provided, Workday Time Tracking would evaluate those 15 hours against the applicable daily and weekly thresholds.

The first 8 hours remain regular hours . Since she worked more than 8 hours in the day, the next block of hours qualifies for daily overtime . Because she also exceeded 12 hours in the same day , the hours above 12 qualify for daily double time .

That means Tuesday's calculated results would typically be split into three calculation tag categories: Regular

, Daily Overtime , and Daily Double Time . This produces a total of 3 time calculation tags on the calculated tab for that day.

The weekly overtime rule does not add a fourth tag for Tuesday. Weekly overtime applies only after total regular hours for the week exceed 40 . By the end of Tuesday, Amanda has worked 10 hours on Monday +

15 hours on Tuesday = 25 total hours , which is still below the weekly 40-hour threshold. Therefore, weekly overtime has not yet been triggered on Tuesday.

So the correct count of calculation tags assigned for Tuesday is 3 .

NEW QUESTION # 43

In what time-related business object can you find a True/False condition calculated field for Day of Week = Sunday?

- A. Worker
- B. Time Block
- C. Time Week
- **D. Time Day**

Answer: D

Explanation:

The correct answer is A. Time Day .

In Workday Time Tracking, when a calculation needs to evaluate a specific day-level attribute such as whether the day is Sunday , the appropriate business object is Time Day . This is because the concept of Day of Week belongs to a single calendar day, and Workday stores day-based evaluation logic on the object that represents an individual day in the time calculation framework.

A True/False condition calculated field for something like Day of Week = Sunday is used when time calculations need to identify specific days for purposes such as weekend premiums, seventh-day rules, special overtime treatment, or other schedule-driven logic. Since the condition is testing one day at a time, Time Day is the correct and most precise object.

The other options are less appropriate. Time Week is used when calculations need to look across an entire week, such as weekly totals or weekly thresholds. Time Block focuses on individual reported or generated entries, not the calendar-day attribute itself.

Worker is used for worker-specific attributes and eligibility logic, not for determining the day of week within time calculations.

So, for a True/False calculated field checking whether the day is Sunday, the correct time-related business object is Time Day .

NEW QUESTION # 44

The time tracking administrator asks you to confirm that workers are reporting their scheduled hours each day.

What type of time calculation will you use?

- **A. Minimum Daily**
- B. Time Block Conditional
- C. Shift Differential
- D. Standard Overtime

Answer: A

Explanation:

The correct answer is B. Minimum Daily .

In Workday Time Tracking, a Minimum Daily time calculation is used when the business needs to compare the amount of time a worker reported in a day against an expected minimum threshold. When the requirement is to confirm that workers are reporting their scheduled hours each day , this is essentially a daily minimum- hours validation and calculation scenario. Workday uses Minimum Daily logic to evaluate whether reported time meets the expected number of hours for that day and to identify shortfalls when the worker reports less than the required amount.

This calculation type is commonly used in situations where organizations need to ensure daily schedule compliance, guaranteed minimums, or identify underreported time based on work expectations. Since the question is about confirming scheduled daily hours,

Minimum Daily is the best fit because it focuses directly on the comparison of daily reported hours against the expected daily amount.

The other options are not correct for this purpose. Shift Differential is used for premium treatment based on shift timing, such as evening or night work. Time Block Conditional evaluates conditions on individual time blocks, but it is not the standard calculation type for checking whether daily scheduled hours were fully reported. Standard Overtime applies to hours exceeding thresholds, not to verifying whether minimum scheduled hours were entered.

So the correct calculation type is Minimum Daily.

NEW QUESTION # 45

The tenant includes a daily overtime calculation (regular hours > 8) with the priority of USA0045. You need to configure a daily double time calculation (regular hours > 12).

What priority should you assign to the Daily Double Time calculation so it calculates before the Daily Overtime?

- A. USA0050
- **B. USA0040**
- C. USA0045
- D. USA0055

Answer: B

Explanation:

The correct answer is A. USA0040 .

In Workday Time Tracking, time calculation priority determines the order in which calculations are processed. A calculation with a lower priority value runs before a calculation with a higher value. Since the existing Daily Overtime calculation has a priority of USA0045 , any new calculation that must run earlier needs a priority number lower than 0045.

Because the organization wants the Daily Double Time rule for hours greater than 12 to calculate before Daily Overtime, the proper priority is USA0040 . This ensures that the double time logic evaluates first and can correctly identify the hours that should receive double time treatment before the broader overtime calculation processes the remaining qualifying hours.

The other options are incorrect for the following reasons. USA0045 would place the new calculation at the same priority as Daily Overtime, which does not ensure the correct processing sequence. USA0050 and USA0055 are higher values, so they would run after the overtime calculation, which could lead to incorrect tagging or pay treatment of hours above 12.

In Workday, correct priority sequencing is critical whenever multiple calculations interact, especially for overtime and premium scenarios. Therefore, the correct priority is USA0040 .

NEW QUESTION # 46

.....

In informative level, we should be more efficient. In order to take the initiative, we need to have a strong ability to support the job search. And how to get the test Workday-Pro-Time-Tracking certification in a short time, which determines enough qualification certificates to test our learning ability and application level. We hope to be able to spend less time and energy to take into account the test Workday-Pro-Time-Tracking Certification, but the qualification examination of the learning process is very wasted energy, so how to achieve the balance? The Workday-Pro-Time-Tracking exam prep can be done to help you pass the Workday-Pro-Time-Tracking exam.
