The SSE-Engineer dumps of ExamPrepAway include valid SSE-Engineer questions PDF and customizable Palo Alto Networks

Security Service Edge Engineer (SSE-Engineer) practice tests. Our 24/7 customer support provides assistance to help SSE-Engineer Dumps users solve their technical hitches during their test preparation. The SSE-Engineer exam questions of ExamPrepAway come with up to 365 days of free updates and a free demo.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which two configurations must be enabled to allow App Acceleration for SaaS applications? (Choose two.)

- A. Trusted Root CA for the CA certificate
- B. Acceleration agent for the client machines
- C. QoS for user traffic
- D. Forward Trust Certificate for the CA certificate

Answer: A,D

Explanation:

To enable App Acceleration for SaaS applications in Prisma Access, the following configurations must be enabled:

Trusted Root CA for the CA certificate ensures that Prisma Access can validate and trust the SaaS application's certificates, allowing seamless inspection and acceleration of traffic without security warnings.

Forward Trust Certificate for the CA certificate enables SSL decryption for SaaS applications, allowing Prisma Access to optimize traffic and apply acceleration techniques while maintaining security policies.

NEW QUESTION # 27

How can a senior engineer use Strata Cloud Manager (SCM) to ensure that junior engineers are able to create compliant policies while preventing the creation of policies that may result in security gaps?

- A. Configure role-based access controls (RBACs) for all junior engineers to limit them to creating policies in a disabled state, manually review the policies, and enable them using a senior engineer role.
- B. Run a Best Practice Assessment (BPA) at regular intervals and manually revert any policies not meeting company compliance standards.
- C. Use security checks under posture settings and set the action to "deny" for all checks that do not meet the compliance standards.
- D. Configure an auto tagging rule in SCM to trigger a Security policy review workflow based on a security rule tag, then instruct junior engineers to use this tag for all new Security policies.

Answer: C

Explanation:

By using security checks under posture settings in Strata Cloud Manager (SCM), the senior engineer can enforce policy compliance standards by automatically denying any security policy that does not align with best practices. This ensures that junior engineers can create policies while preventing configurations that might introduce security gaps. This proactive approach eliminates manual oversight and enforces compliance at the time of policy creation, reducing risk and ensuring consistent security enforcement.

NEW QUESTION # 28

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

* The solution must meet these requirements:

* The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

* The branch locations must have internet filtering and data center connectivity.

* The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

* The security team must have access to manage the mobile user and access to branch locations.

* The network team must have access to manage only the partner access.

Which two components can be provisioned to enable data center connectivity over the internet? (Choose two.)

- A. SD-WAN Connector

- B. Service connections
- C. Colo-Connect
- D. ZTNA Connector

Answer: B,C

Explanation:

Service connections enable secure connectivity between Prisma Access and on-premises data centers, allowing mobile users and branch locations to access internal applications. They facilitate seamless integration of internal networks with Prisma Access while maintaining security policies. Colo-Connect provides a dedicated and optimized pathway for traffic between Prisma Access and data centers, ensuring stable performance and reduced latency over the internet. Both components together support secure and efficient data center connectivity while aligning with the customer's access control and filtering requirements.

NEW QUESTION # 29

Which advanced AI-powered functionality does Strata Copilot provide to enhance the capabilities of Prisma Access security teams?

- A. Real-time traffic analysis for automated threat prevention
- B. Initial configuration of Prisma Access using a natural language interface
- C. Customized guidance for resolving issues through recommended next steps
- D. Automated remediation of misconfigured security policies

Answer: C

Explanation:

Strata Copilot enhances the capabilities of Prisma Access security teams by providing AI-powered insights and recommendations to help resolve security issues efficiently. It analyzes security events, misconfigurations, and alerts and offers contextual guidance with recommended next steps for troubleshooting and improving security posture. This assists teams in quickly identifying and addressing security challenges without requiring deep manual investigation.

NEW QUESTION # 30

Which policy configuration in Prisma Access Browser (PAB) will protect an organization from malicious BYOD and minimize the impact on the user experience?

- A. One that allows access to applications with data masking or watermarking
- B. One for session recording
- C. One that blocks file exchange
- D. One that blocks elements such as screen scrapers

Answer: A

Explanation:

In Prisma Access Browser (PAB), allowing access to applications while enforcing data masking or watermarking provides security for BYOD (Bring Your Own Device) users without heavily impacting the user experience. Data masking ensures that sensitive information is obscured, reducing the risk of data leakage, while watermarking can deter unauthorized screenshots or data exfiltration. This approach balances security and usability, allowing users to work efficiently while protecting corporate data.

NEW QUESTION # 31

.....

The SSE-Engineer authorized training exams provided by ExamPrepAway helps you to clear about your strengths and weaknesses before you take the exam. You can get exam scores after each practice test with SSE-Engineer test engine, which allow you to self-check your knowledge of the key topical concepts. The frequently updated of SSE-Engineer Latest Torrent can ensure you get the newest and latest study material. You will build confidence to make your actual test a little bit easier with SSE-Engineer practice vce.
