Salesforce Certified Tableau Data Analyst Sample Questions (Q28-Q33):

NEW QUESTION # 28

You have a dataset that has four fields named Category, Profit Sates and Customer Name. You need to create the following visualization.

Answer:

Explanation:

Explanation:

Sales: B. Columns

Profit: D. Rows

Customer Name: C. Detail on the Marks card

Category: A. Color on the Marks card

To create the visualization, you need to drag Sales to Columns, Profit to Rows, Customer Name to Detail on the Marks card, and Category to Color on the Marks card. This will create a scatter plot that shows the relationship between Sales and Profit for each Customer Name, with different colors for each Category.

NEW QUESTION # 29

A Data Analyst has the following bar chart.

The analyst wants the chart to appear as shown in the following exhibit.

What should the analyst add?

- A. A reference line
- **B. A distribution band**
- C. A reference band
- D. An average line

Answer: B

NEW QUESTION # 30

You create the following story that contains two story point.

You want to change the story point format to show the current story point number out of the total number of story points. Which Layout option should you use?

- A. Caption boxes
- **B. Numbers**
- C. Arrows only
- D. Dots

Answer: B

Explanation:

To change the story point format to show the current story point number out of the total number of story points, you should use the Numbers option in the Layout tab. This option will display the story points as numbers in a horizontal or vertical sequence, such as 1/2, 2/2. You can also choose to show or hide the next and previous arrows for navigation. The Numbers option will help you indicate the progress and order of your story points more clearly than the other options. References:
