Salesforce Certified Sales Cloud Consultant Sample Questions (Q49-Q54):

NEW QUESTION # 49

Cloud Kicks has 300,000 account records and 16 million invoices in a custom object with a master-detail relationship to the Account. Each account record takes a long time to display due to the rendering time of the invoice related list.

What should the consultant do to solve this issue?

- A. Move the invoice related list to a separate tab on the Lightning page.
- B. Enable Collapsible Sections for the Invoice related list
- C. Convert the Invoice object into a lookup relationship.
- D. Enable indexing on all visible fields on the invoice related list.

Answer: A

Explanation:

Moving the invoice related list to a separate tab on the Lightning page can solve the issue of long rendering time, as it allows the account record to load faster without loading the invoice related list at the same time. The user can then click on the tab to view the invoice related list when needed. This also improves the user experience and the page layout by reducing clutter and scrolling.

NEW QUESTION # 50
