## Get Free Updates Up to 365 days On Developing Certified Implementation Specialist - Platform Analytics CIS-PA Braindumps

You only need 20-30 hours to learn our CIS-PA Test Braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our CIS-PA prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our Certified Implementation Specialist - Platform Analytics exam torrent. Owing to the superior quality and reasonable price of our exam materials, our exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects.

### ServiceNow CIS-PA Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Administration and Solutions: This domain covers administrative tasks using the Admin Console and accelerating deployment with pre-built Content Packs.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>This section addresses identifying and resolving issues using Spotlight diagnostic tools to monitor system health and performance.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Data Visualization: This section focuses on presenting data through widgets, interactive filters, appropriate visualizations, dashboards, and analyzing data using Analytics Hub and KPI Details.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Perform Diagnostics and Troubleshooting</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Configure Indicators and Indicator Sources: This domain addresses creating and configuring indicators (performance metrics), including source conditions, fact tables, indicator types, properties, and aggregation scripts.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Configure Breakdowns and Breakdown Sources: This section covers setting up breakdowns to analyze indicators across different dimensions, including breakdown mappings, matrices, exclusions, scripted mappings, and bucket groups.</li> </ul>

## ServiceNow Certified Implementation Specialist - Platform Analytics Sample Questions (Q52-Q57):

### NEW QUESTION # 52

What is the purpose of a Breakdown Source?

- A. It defines a default elements filter
- **B. It identifies unique breakdown elements for classification**
- C. It specifies which indicators are available to a breakdown
- D. It specifies the options available for non-categorical data

**Answer: B**

Explanation:

A Breakdown Source defines how data is classified into distinct breakdown elements for analysis. It identifies the table and field (or script) used to generate the unique values—such as categories, priorities, assignment groups, or buckets—that segment indicator scores.

Default element filters are configured on the Breakdown, not the Breakdown Source. Indicators are linked to Breakdowns through Breakdown Mappings, not selected at the source level. While bucket-based sources support non-categorical data, their core purpose remains identifying unique breakdown elements. ServiceNow documentation emphasizes that the Breakdown Source is responsible for defining where breakdown values come from and how they are identified, making option C the correct answer.

### NEW QUESTION # 53

What is a Breakdown?

- A. It is a choice list of possible attribute values
- B. It is the ability to group or filter report data
- C. It is a source table for categorization data
- **D. It is the ability to group or filter indicator scores**

**Answer: D**

Explanation:

In Platform Analytics, a Breakdown is used to group or filter indicator scores based on specific attributes, such as priority, category, assignment group, or age ranges. Breakdowns allow users to analyze how different segments contribute to overall performance and to compare trends across those segments over time.

Breakdowns operate on indicator scores, not on raw report data. While reports can also be grouped or filtered, that functionality is separate from Performance Analytics. A Breakdown does not define the source table itself (that is the role of the Breakdown

Source), nor is it merely a choice list. ServiceNow documentation clearly defines Breakdowns as a core analytics concept used to slice indicator data for deeper performance insight, making option D the correct answer.

#### NEW QUESTION # 54

Where are Next Experience Dashboards and Data Visualizations created?

- A. In the Analytics Hub
- B. In Analytics Administration
- C. In the Analytics Center
- D. In Reports Administration

**Answer: C**

Explanation:

Analytics Center is the workspace used to create and manage Next Experience Dashboards and Data Visualizations. It provides a unified interface for building modern, interactive analytics experiences, including metric visualizations, time series, breakdown views, and dashboards.

Analytics Hub is primarily used for viewing and exploring existing analytics, not creating them. Reports Administration and Analytics Administration serve different purposes and do not support Next Experience dashboard creation. ServiceNow documentation explicitly identifies Analytics Center as the creation and management environment for Next Experience analytics content, making option D the correct answer.

#### NEW QUESTION # 55

What does the "Allow formula component to be NULL" setting for a Formula Indicator do?

- A. It converts NULL values to zero
- B. It skips the formula calculation if any component is NULL
- C. It allows components to be NULL without aborting the formula
- D. It always returns zero if any component is NULL

**Answer: C**

Explanation:

The Allow formula component to be NULL setting controls how a Formula Indicator behaves when one or more component indicators return NULL values. When enabled, the formula continues to calculate using the available components instead of aborting the calculation.

If this setting is disabled and any component returns NULL, the entire formula result becomes NULL. The setting does not automatically convert NULLs to zero, nor does it skip calculation entirely. ServiceNow documentation explains that this option provides flexibility in environments where some component indicators may not have data for every period, ensuring the formula can still produce meaningful results.

Therefore, option D accurately describes the behavior.

#### NEW QUESTION # 56

What happens when you select a predefined filter condition in the data source selection screen?

- A. The filter is saved and it will be automatically applied in future uses of the same data source
- B. The filter is applied and the data source is automatically selected
- C. The data source is automatically selected without any further options
- D. The filter is applied and it can be refined under the Conditions section

**Answer: D**

Explanation:

When a predefined filter condition is selected during data source configuration, Platform Analytics applies the filter immediately and displays it in the Conditions section, where it can be reviewed, modified, or extended.

This allows administrators to start with a standard filter and refine it to meet specific analytics requirements.

The filter is not automatically saved for future use, nor does it automatically select the data source without user confirmation.

ServiceNow documentation clarifies that predefined filters act as starting templates, not locked or persistent filters. Administrators

retain full control to adjust conditions before saving the indicator or data source. Therefore, option D accurately describes the behavior.

## NEW QUESTION # 57

.....

The privacy protection of users is an eternal issue in the internet age. Many illegal websites will sell users' privacy to third parties, resulting in many buyers are reluctant to believe strange websites. But you don't need to worry about it at all when buying our CIS-PA learning engine: CIS-PA. We assure you that we will never sell users' information because it is damaging our own reputation. In addition, when you buy our CIS-PA simulating exam, our website will use professional technology to encrypt the privacy of every user to prevent hackers from stealing. We believe that business can last only if we fully consider it for our customers, so we will never do anything that will damage our reputation. Hope you can give our CIS-PA exam questions full trust, we will not disappoint you.
