## 2026 C\_SEC\_2405 Test Dumps.zip | Efficient C\_SEC\_2405 100% Free PDF VCE

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed, to be specific, you can get immediately our C\_SEC\_2405 training materials only within five to ten minutes after purchase after payment. At the same time, your personal information on our C\_SEC\_2405 Exam Questions will be encrypted automatically by our operation system as soon as you pressed the payment button, that is to say, there is really no need for you to worry about your personal information if you choose to buy the C\_SEC\_2405 exam practice from our company.

## SAP Certified Associate - Security Administrator Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Which of the following is part of the SAP S/4HANA central UI component?

- A. SAP Fiori launchpad
- B. SAP Fiori object page
- C. SAP Fiori transactional application
- D. SAP Fiori analytical application

**Answer: A**

Explanation:

The SAP Fiori launchpad is the central UI component in SAP S/4HANA, serving as the primary entry point for users to access Fiori applications. It provides a unified, role-based interface where users can navigate to transactional, analytical, or object page applications via tiles organized in catalogs and spaces. The launchpad integrates with the SAP Fiori infrastructure, ensuring consistent user experience and secure access to applications. SAP Fiori object pages, transactional applications, and analytical applications are specific types of Fiori apps accessed through the launchpad, not central UI components themselves. The launchpad's role as the central hub supports personalized navigation, single sign-on, and application management, making it a cornerstone of the S/4HANA user interface. By centralizing access, the Fiori launchpad enhances usability and security, ensuring that users only interact with applications authorized by their roles, aligning with SAP's modern, user-centric design philosophy for enterprise systems.

### NEW QUESTION # 62

In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- A. The SAP Fiori applications it was defined for
- B. The business roles it is to be assigned to
- C. The business area it was designed for
- D. The software release it was created for

**Answer: C**

### NEW QUESTION # 63

Which of the following can you use to check if there is an application start lock on an application contained in a PFCG role? Note: There are 2 correct answers to this question.

- A. Transaction SUIM - Transactions Executable with Profile report
- B. Transaction SM01\_DEV
- C. Transaction SM01\_CUS
- D. Transaction SUIM - Executable Transactions report

**Answer: A,D**

Explanation:

To check if there is an application start lock on an application within a PFCG role, the SUIM (System User Information System) reports "Executable Transactions report" and "Transactions Executable with Profile report" are used. The Executable Transactions report (transaction SUIM) identifies transactions within a role and can indicate if any are locked, preventing their execution, by cross-referencing with system lock settings.

The Transactions Executable with Profile report analyzes transactions executable via a role's profile, highlighting any locked transactions that would block application starts. These reports provide detailed insights into role-based access and lock status, ensuring administrators can verify application availability.

Transaction SM01\_CUS is used for locking transactions system-wide, not for checking role-specific locks, and SM01\_DEV is not a standard SAP transaction for this purpose. By leveraging SUIM reports, administrators can efficiently manage and troubleshoot application access, ensuring that PFCG roles align with security requirements and that locked applications do not disrupt business processes.
