

ISO-IEC-42001-Lead-Auditor Valid Exam Pdf & ISO-IEC-42001-Lead-Auditor Exam Topics Pdf

BONUS!!! Download part of Pass4suresVCE ISO-IEC-42001-Lead-Auditor dumps for free: https://drive.google.com/open?id=1s0A1JPK64_T4h4WAYsgke2yCmNaQN9PT

If you want to know more about our test preparations materials, you should explore the related ISO-IEC-42001-Lead-Auditor exam Page. You may go over our ISO-IEC-42001-Lead-Auditor brain dumps product formats and choose the one that suits you best. You can also avail of the free demo so that you will have an idea how convenient and effective our ISO-IEC-42001-Lead-Auditor exam dumps are for ISO-IEC-42001-Lead-Auditor certification. With Pass4suresVCE, you will not only get a single set of PDF dumps for ISO-IEC-42001-Lead-Auditor Exams but also a simulate software for real exams. Rather we offer a wide selection of braindumps for all other exams under the ISO-IEC-42001-Lead-Auditor certification. This ensures that you will cover more topics thus increasing your chances of success. With the multiple learning modes in ISO-IEC-42001-Lead-Auditor practice exam software, you will surely find your pace and find your way to success.

If you ask me why other site sell cheaper than your Pass4suresVCE site, I just want to ask you whether you regard the quality of ISO-IEC-42001-Lead-Auditor exam bootcamp PDF as the most important or not. Sometime I even don't want to explain too much. Sometime low-price site sell old version but we sell new updated version. If you want to get the old version of ISO-IEC-42001-Lead-Auditor Exam Bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this PECB ISO-IEC-42001-Lead-Auditor exam has old version.

PECB ISO-IEC-42001-Lead-Auditor Exam Topics Pdf | Reliable ISO-IEC-42001-Lead-Auditor Cram Materials

You are in a quest for high quality practice materials like our ISO-IEC-42001-Lead-Auditor preparation exam. We avail ourselves of this opportunity to approach you to satisfy your needs. In order to acquaint you with our ISO-IEC-42001-Lead-Auditor practice materials, we wish to introduce a responsible company dealing with exclusively in area of ISO-IEC-42001-Lead-Auditor training engine and it is our company which keeps taking care of the readers' requests, desires and feeling about usage of our ISO-IEC-42001-Lead-Auditor study questions in mind.

PECB ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

Scenario 3 (continued):

ArBank is a financial institution located in Brussels, Belgium, which offers a diverse range of banking and investment services to its clients. To ensure the continual improvement of its operations, ArBank has implemented a quality management system QMS based on ISO 9001 and an artificial intelligence management system AIMS based on the requirements of ISO/IEC 42001.

Audrey, an experienced auditor, led an internal audit focused on the AIMS within ArBank. She assessed the chatbots integrated into the bank's website and mobile app, analyzing communications using big data technology to identify potential noncompliance, fraud, or unethical conduct. Instead of relying solely on the information provided by the chatbots, Audrey sought out evidence that would either confirm or challenge the validity of the data, ensuring her conclusions were based on reliable and accurate information. Her review of selected chatbot interactions confirmed they met their intended purpose.

For the specific context of ArBank's operations, Audrey utilized an AI system to assess the efficiency of the bank's digital infrastructure, focusing on tasks critical to the Finance Department. This AI system was able to analyze the functionality of chatbots integrated into ArBank's website and mobile app to determine if it adheres to ISO/IEC 42001 requirements and internal policies governing customer service in the banking sector.

In addition, Audrey conducted a deeper assessment of the bank's AIMS. Her evaluation included observing different stages of the AIMS life cycle, from development to deployment, to ensure that roles and responsibilities were clearly defined and aligned with ArBank's operational goals. She also evaluated the tools used to monitor and measure the performance of the AIMS.

Audrey continued the audit process by auditing ArBank's outsourced operations. Upon checking the contractual agreements between the two parties, Audrey decided that there was no need to gather audit evidence regarding the contractual agreement. She reviewed the company's processes for monitoring the quality of outsourced operations, determined whether appropriate governance processes are in place with regard to the engagement of outsourced persons or organizations, and reviewed and evaluated the company's plans in case of expected or unexpected termination of the outsourcing agreement.

Based on the scenario above, answer the following question:

Question:

What big data technology did Audrey utilize? Refer to Scenario 3.

- A. Text analytics
- B. Data management
- C. Visual analytics
- D. Predictive analytics

Answer: A

Explanation:

Audrey used Text Analytics, which involves processing and analyzing textual interactions (like chatbot conversations) to derive meaningful information.

* ISO/IEC 20546:2019 (Big Data Overview and Vocabulary) Clause 3.6 defines text analytics as the application of AI techniques to understand and extract information from unstructured text.

* In ISO/IEC 42001:2023, the standard stresses in Clause 8.2 (Data Management) the need for organizations to ensure that textual data is analyzed correctly to validate AI system effectiveness.

Reference: ISO/IEC 20546:2019 Clause 3.6; ISO/IEC 42001:2023 Clause 8.2 (Data Management).

NEW QUESTION # 33

Scenario 9 (continued):

Scenario 9: Securisai, located in Tallinn, Estonia, specializes in the development of automated cybersecurity solutions that utilize AI systems. The company recently implemented an artificial intelligence management system AIMS in accordance with ISO/IEC 42001. In doing so, the company aimed to manage its AI-driven systems' capabilities to detect and mitigate cyber threats more efficiently and ethically. As part of its commitment to upholding the highest standards of AI use and management, Securisai underwent a certification audit to demonstrate compliance with ISO/IEC 42001.

The audit process comprised two main stages: the initial or stage 1 audit focused on reviewing Securisai's documentation, policies, and procedures related to its AIMS. This review laid the groundwork for the stage 2 audit, which involved a comprehensive, on-site evaluation of the actual implementation and effectiveness of the AIMS within Securisai's operations. The goal was to observe the AIMS in operation, ensuring that it not only existed on paper but was effectively integrated into the company's daily activities and cybersecurity strategies.

After the audit, Roger, Securisai's internal auditor, addressed the action plans devised to rectify nonconformities identified during

the certification audit. He developed a long term strategy, highlighting key AIMS processes for triennial audits. Roger's internal audits play a key role in advancing Securisai's goals by employing a systematic and disciplined method to assess and boost the efficiency of risk management, governance processes, and strategic decision-making. Roger reported his findings directly to Securisai's top management.

Following the successful rectification of nonconformities, Securisai was officially certified against ISO/IEC 42001.

Recently, the company decided to transfer its ISO/IEC 42001 certification registration from one certification body to another despite being initially bound by a long-term agreement with the current certification body.

This decision was motivated by the desire to partner with a certification body that offers deeper insights and expertise in the rapidly evolving field of artificial intelligence in cybersecurity.

To ensure a smooth transition and uphold its certification status, Securisai is diligently compiling the required documentation for submission to the new certification body. This includes a formal request, the most recent audit report underscoring its adherence to ISO/IEC 42001, the latest corrective action plan that highlights its continuous efforts toward improvement, and a copy of its current valid certification registration.

A year following Securisai's initial certification audit, a subsequent audit was carried out by the certification body on its AIMS. The purpose of this audit was to assess compliance with ISO/IEC 42001 and verify the ongoing improvement of the AIMS. The audit team concluded that Securisai's AIMS consistently meets the requirements set by ISO/IEC 42001.

Question:

Based on Scenario 9, what should Securisai's certification be?

- A. Transferred
- B. Suspended
- C. Withdrawn

Answer: A

Explanation:

Securisai requested a transfer of its certification from one certification body to another, which is fully legitimate.

* ISO/IEC 17021-1:2015 Clause 9.6.5 supports certificate transfer under defined conditions, ensuring the organization remains certified without interruption.

* The IAF MD2 (Mandatory Document for Management of Transfers of Accredited Certification) further elaborates: "A valid certification may be transferred between certification bodies provided that the original certification remains valid."

Reference: ISO/IEC 17021-1:2015 Clause 9.6.5; IAF MD2 Guidelines.

NEW QUESTION # 34

What precautions must the certification body take when conducting short-notice audits?

- A. Inform clients in advance about the conditions under which the audits will be conducted
- B. Obtain consent from clients for the selection of audit team members
- C. Prioritize audits based on the client's schedule

Answer: A

Explanation:

According to ISO/IEC 17021-1:2015 Clause 9.6.4, certification bodies must notify clients in advance of short-notice audits and define the conditions and procedures under which these audits are conducted. This ensures transparency, preparedness, and impartiality during the audit process.

Reference:

ISO/IEC 17021-1:2015 Clause 9.6.4 - Short-notice audits

ISO/IEC 42001:2023 Clause 9.2 - Internal audit and external audit consistency

NEW QUESTION # 35

Which among the following is NOT a core element of AIMS?

- A. Safety and reliability
- B. Independence and honesty
- C. Privacy and security
- D. Fairness and non-discrimination

Answer: B

Explanation:

While Independence and honesty are general auditing values (as per ISO 19011:2018, Clause 4 on audit principles), they are not listed as core principles of an AI Management System (AIMS) under ISO/IEC 42001:2023.

The recognized core principles and values within an AIMS - according to the standard and PECB training - include:

- * Fairness and Non-Discrimination
- * Privacy and Security
- * Safety and Reliability
- * Accountability
- * Transparency and Explainability
- * Human-Centered Design

These principles guide the risk management, operational control, and ethical alignment of AI systems throughout their lifecycle, as required in Clauses 4.2, 6.1, and 8.2 of ISO/IEC 42001.

NEW QUESTION # 36

Why is it important to have a clear and agreed audit scope?

- A. To reduce the time required for the audit
- **B. To ensure all aspects of the management system are audited**
- C. To maintain confidentiality of audit findings
- D. To prevent any legal liabilities

Answer: B

Explanation:

A clear and agreed audit scope ensures that the audit will adequately cover all relevant areas of the AI Management System and that the audit team understands:

- * Boundaries of the audit (departments, processes, AI systems)
- * Objectives and criteria
- * What must be included or excluded

As per ISO 19011:2018 - Clause 5.2, determining the audit scope is critical to ensuring the audit is effective, relevant, and complete. Similarly, in ISO/IEC 42001:2023 - Clause 9.2.1, the scope must be defined to evaluate the full effectiveness of the AIMS.

The PECB Lead Auditor Guide reinforces that without a clear scope, the audit risks missing critical operational, ethical, or compliance-related areas.

Reference: ISO 19011:2018 - Clause 5.2 (Establishing the audit program) ISO/IEC 42001:2023 - Clause 9.2.1 (Internal audit planning) PECB Lead Auditor Guide - Domain 4: "Audit Scope and Objectives"

NEW QUESTION # 37

.....

Our company has successfully launched the new version of the ISO-IEC-42001-Lead-Auditor study materials. Perhaps you are deeply bothered by preparing the exam. Now, you can totally feel relaxed with the assistance of our study materials. Our products are reliable and excellent. What is more, the passing rate of our ISO-IEC-42001-Lead-Auditor Study Materials is the highest in the market. Purchasing our ISO-IEC-42001-Lead-Auditor study materials means you have been half success. Good decision is of great significance if you want to pass the exam for the first time.
